

LEVEE AND RECEPTION.

To Meet Their Excellencies Lord and Lady Aberdeen.

THEIR EXCELLENCIES THE GOVERNOR-GENERAL and LADY ABERDEEN will hold a RECEPTION at Government House on FRIDAY, the 10th inst., at 10.30 a.m.

Each visitor must be provided with two cards.

Entrance by the Eastern door. Morning dress.

By order, F. S. MOORE, Lieut.-Col., A. D. C. to His Honor the Lieutenant-Governor, Government House, Aug. 9, 1894.

LOCAL AND OTHER ITEMS.

MANILA SPECIALTY.—Beer Bros.

S. O. E. B. S.—Special meeting tonight at 9 o'clock.

LADY ABERDEEN'S picture has arrived from exhibition at E. W. Taylor's store.

SPONSOR.—Neil McQuarrie, Esq., was today sworn in before the Master of the Rolls as Returning Officer for West Prince.

Pimples, boils, and other humors of the blood are liable to break out in the warm weather. Prevent it by taking Hood's Sarsaparilla.

DISASTROUS FIRES.—Destructive fires have lately been raging in the southwestern portion of Manitoba; and thousands of acres of timber lands have been burned over.

PROBATION.—There was a large attendance at the meeting of Probation on Friday. The usual standing committee were appointed, and some other business transacted.

MUSIC IN THE GARDENS.—Should the weather prove favorable, the Citizen Band will give another of their popular concerts in Queen Square Gardens this evening.

THEY WERE HANDSOME.—The following appears in a small provincial paper: "The bridegroom's present to the bride was a handsome brooch, besides many other beautiful things set in glass."—The Bits.

P. E. ISLAND RAILWAY.—The regular afternoon train for Summerside will be detained here until 5.05 p. m., and for Summerside until 5.25 p. m., standard, tomorrow, the 10th inst., to accommodate farmers and others attending the Agricultural Conference. The special train for Tignish will leave on return at 4.45 p. m., standard.

NOTICE TO SHIPPERS.—The "Fastnet" is engaged for a tour from Halifax to Arichat, and consequently will not arrive here till Saturday morning. She will afterward sail for Summerside and will go from there direct to Halifax, making connection there with the steamer "Halifax City" from London. Steamer shippers and others should make a note of this.

THE HEAVENS.—Mr. Hamilton's lecture on the "Starry Heavens," on Monday next will attract not only students of astronomy, but all who love to look and meditate on the wonders of the heavens. The Artillery Band will be in attendance. Tickets 10 cents, to be had at the bookstores or at the Philharmonic Hall. Don't miss it. —wky & dy ll.

A NECESSITY.—Complaint has been made to the Examiner that the filling of the watering carts at the hydrant on Grafon Street, near Great George, a good deal of water is spilled about the ground in the vicinity of the hydrant, and this wasted water works its way into the arch into a cellar in the immediate neighborhood. This is very annoying. The gentleman who complained to THE EXAMINER says he has spoken to some persons in authority concerning the matter, but the nuisance has not been abated.

CALEDONIAN CLUB.—Saturday, the 11th inst., will be a gala day at Georgetown. Lord and Lady Aberdeen, Governor Howland and Mrs. Howland, the officers of the fleet and other distinguished visitors are expected at Georgetown at noon. The Club will present their address to Lord Aberdeen there, after which lunch will be served in Carter's best style. A special train leaves Charlottetown at 8 a. m., local, and with a good programme of events, everything points to another successful day for the Caledonian Club.

HANDSOME MEDALS.—Mr. Dillon showed THE EXAMINER today the gold medals won by Mr. John Moar, of New Perth, for the largest quantity of milk sent to any cheese factory in the Province for the number of cows kept on the farm. The medals, which was awarded by the Dairy Commissioner, is a beautiful lot of work. It is of solid gold, and on the plate in the centre is the inscription, "Won by Mr. John Moar, New Perth factory." Around the plate are entwined stalks of corn and leaves, and on each end of the bar is a sunflower, the whole being emblematic of the Robertson Food Combination. We have also seen shown the silver medals, which are of the same design. The medals will be presented by Lady Aberdeen at the Agricultural Conference on Friday.

MUSICAL OPERA HOUSE.—Harry Lindley's company should receive two bumper houses on Friday and Saturday, August 10th and 11th. The company is large and excellent. They were successful here last week and gave entire satisfaction. Mr. Lindley is one of the best comedians that ever trod the stage. He is said to play an ideal negro in "Over the Hills to the Poor House," a play which has been successful for 20 years. On Saturday evening he plays a tramp member of his own profession and sings his famous song "Hamlet." The bill is high, classical and beautiful; the costumes elaborate; the toilettes beautiful and the play is called "Divorce." The prices are low, and his little daughter Ethel will sing on both occasions. The play opened this morning at Doherty's and Rankin's.

For cramps in the stomach take a few drops of Dr. Manning's German remedy diluted in either warm or cold water. The effect is instantaneous. Sold by all druggists.

THE DAIRYING SERVICE OF THE DOMINION DEPARTMENT OF AGRICULTURE.

The action of the Government in creating the office of Dairy Commissioner for the Dominion has more than realized the predictions and expectations of those who asked for it, in the first Dominion Dairy Convention held at Ottawa in 1889. The appointment was made in 1890, and every farmer knows that James W. Robertson was the man chosen for the place. In view of our farmers' conference and demonstration, planned by Professor Robertson, in which Lord Aberdeen will take part tomorrow, the following report and statement will be found interesting as well as useful.

During the first year the Dairy Commissioner visited all the provinces to make personal examination of the condition of dairy farming, and the resources adapted thereto in each, with a view to reporting to the Government what could be done for the benefit of that branch of agriculture.

As an outcome of the season's investigations and observation of the needs of the different Provinces, he recommended the establishment of Branch Experimental Dairy Stations to the number of at least one in every Province, where the conditions were ready. The Government placed a sum of \$10,000 in the estimates for that purpose.

The object of these Stations was to give practical illustration to the farmers, in different districts, of the benefits that would result to the majority of farmers, from the best methods of dairying. These Stations were to become the means of introducing and extending new departures in dairy practice which were profitable but not well known to the majority of farmers.

For the Province of Ontario, the first purpose was to investigate the qualities of cheese which would result from different methods of handling the curdling and ripening of the cheese. It was also to discover whether it would be practicable to pay for milk on a fair basis according to its quality and quantity. The two branches of work were taken up and the full details of experiments conducted were published widely. As a result, the monthly bulletins of notes for cheesemakers are generally followed in all the Provinces; and the Babcock milkers, where by milk can be paid for justly according to the fat which it contains, is becoming common. However, the main work of the Dairy Stations in Ontario has been to encourage farmers to take up the manufacture of butter during the winter in factories where cheese are made during the months of summer.

Two Winter Dairying Stations were started in 1891-92. The farmers were well satisfied with returns, which were about 90 cents per 100 lbs. of milk besides the skim-milk returned to them. By the winter of 1892-93, butter was made at five Dominion Dairy Stations in Ontario during the winter; and 18 other winter creameries were run by private enterprise on the lines laid down at the Dairy Stations.

The butter-making of the province has been much improved and a very large expansion of the manufacture of creamery butter during the winter is sure to go on. At the same time, the attention of farmers has been particularly called to the advantage of providing corn ensilage or some similar cheap bulky feed for winter, and large numbers of new silos should be built.

IN QUEBEC. For the province of Quebec, the aim of the Dairying Service has been to improve the quality of the cheese and butter up to an equality with the best from any part of the Dominion. The Assistant Dairy Commissioner and an expert in cheese-making travelled in the province during 1892 and 1893, working in conjunction with the inspectors of syndicates of factories. In the autumn of 1892, it was decided to combine the branch Dominion Dairy Station for Quebec with a Dairy School to be established at St. Hyacinthe under the supervision of syndicates of factories. In the autumn of 1892, it was decided to combine the branch Dominion Dairy Station for Quebec with a Dairy School to be established at St. Hyacinthe under the supervision of syndicates of factories. That was done, the school building and equipment were provided by the Association and the Dairy Commissioner took charge as Director. Practical instructions in cheese-making, butter-making and milk testing are given in the short courses lasting two weeks each. Students may take one or both courses. The terms of

FREE TO CUSTOMERS.

As a premium for each trade we will give away a large Cradock Portrait, copied from any Photograph desired, to all who make cash purchases from us amounting to \$2.50. These pictures are made by a thoroughly reliable firm in Toronto, and we guarantee them to be satisfactory and up to the samples on exhibition at our stores. The Company who do this work supply their own frames, for which a charge of \$2.50 is made. This is all the expense attached, and we deliver the framed Portrait in any part of Charlottetown.

Johnson & Johnson, THE RELIABLE DRUGGISTS.

Cor. Kent and Prince Streets. Cor. Queen and Richmond Streets.

Hungry all the Time!

We're about the same with business as the boys are with the pig—always hungry. Our appetite is increasing, and our capacity for business. The chief reason for this is our knowledge of this fact. The larger our sales of Furniture the cheaper we make the goods—i. e., six pieces of Furniture made at one time costs five dollars each, twenty-five of the same made at one time cost only four dollars and a half each, and our customers do—ought to—save money by our enterprise.

tion are free to all who are members of the Dairy Association of the Province of Quebec. The annual fee is only \$1. In 1892-93 two hundred and fourteen students attended the school, and in 1893-94 the number had risen to two hundred and sixty-eight. A special course is reserved for the Inspectors of Syndicates. Besides the practical instruction in the working-rooms, 12 lectures are given in the evening course. These include the following subjects: Dairy Farming, the Dairy Cow, the Feeding of Dairy Cattle, the Use of By-products, Cheese-making, Butter-making, Milk testing, the Elementary Chemistry of Milk.

The quality of the cheese of Quebec has been very much improved during recent years. Whereas the average price a few years ago was from 1 to 1 1/4 cents per lb. lower than the price of first-class cheese in Ontario, the prices in the two provinces are not now much if any more than 1 cent per lb. apart. Since 1890 the value of the cheese produced in Ontario has increased nearly 50 per cent, while the value of the output of cheese from Quebec has increased nearly 150 per cent.

In the Province of New Brunswick a butter-making station was conducted for two summers at Kingsclear, and butter-making was carried on during the winters at Sussex, N. B. A number of new cheese factories have been started within the last few years. During the present summer the Dominion Travelling Dairy will visit over 60 places in the Province, and give practical illustration of the process of making butter.

One of the main features of the season's work will be the holding of three enormous picnics or conferences of farmers in the three Provinces by the sea. His Excellency the Governor-General will be the chief speaker. Probably from 6000 or 10,000 people will attend each one; and it is hoped there will be occasions through which the excellent cheese products will be mentioned favorably in the British newspapers. The reports of the conferences will also be means through which the resources of the Provinces and the changes which they offer to dairy farmers will be made widely known. The size of the meeting will give enough impetus to the reports to carry them into nearly every newspaper on the continent and in Great Britain.

IN NOVA SCOTIA. In the Province of Nova Scotia, a Dairy Station was started two years ago on the Experimental Farm at Nappan. Butter made from November to the end of June, and cheese for the remainder of the year. The quantity of milk supplied has been doubled in the two years and the patrons express themselves as pleased with the returns. Several new factories have been built in different parts of the Province. Here, and also in New Brunswick, the Provincial Government give a bonus of money to new cheese factories, and in Nova Scotia \$400 per factory for the first two in a county, the payment being spread over three years.

IN PRINCE EDWARD ISLAND. In Prince Edward Island one branch Dairying Station was established in 1892. The total output for the season was about \$7,000. The number had gone up to eleven factories in 1894, with an output of \$49,000. During the present year there are sixteen cheese factories and creameries, with the prospect of an output in butter and cheese of about \$100,000 during the summer months. All the factories are owned by Joint Stock Companies of farmers, and about 1000 patrons supply milk. In 1890 the acres of Indian corn grown on the Island for cattle feeding could have been counted on one's fingers; and at present it is estimated that not less than 3,000 acres of Indian corn for cattle-feeding are being grown there.

The dairying service which has been outlined naturally falls under three divisions. One is concerned with the general and extending co-operative methods of dairying into new districts as in P. E. Island, New Brunswick and Nova Scotia. Another is aiming to get the making of butter during the winter joined to the making of cheese in the same premises during the summer; and the third is engaged in improving the quality of butter and cheese from all sections of all the Provinces to an equality with the best made anywhere.

One direct gain which is largely due to the great success won by our cheese at Chicago last year at the World's Fair is evident from the market reports. For several weeks the reports of the prices paid at the cheese markets in Canada have been half a cent per lb. higher, than the prices paid at the same time in the markets of the United States equally distant from Great Britain. The increased revenue to the farmers from this, alone, for a like quantity of milk, for one reason only will represent seventy times more than the cost of exhibiting Canadian Dairy Products at the World's Fair last year. The value of the cheese exported from Canada has grown from six and three-quarters millions of dollars in 1887 to nearly thirteen and a half millions of dollars in 1893. The returns for the year up to the end of June, 1894, will probably show an increase of a million and a quarter of dollars over 1893.

In this brief sketch nothing has been said of the work of the Dairying Service in Manitoba and the Northwest Territories. That will be reserved for another article. In the meantime, there and in the other parts of the Dominion the Dairying Service is earnestly trying to serve the farmers according to the needs of their localities and circumstances.

PERSONAL.

Cyrus Shaw, M. L. A., New Perth, is in the city.

J. C. Underlay, Esq., Bay Fortune, is visiting the city.

Hon. Alexander Laird, Bellevue, is in town to-day.

The Northern Enterprise, Campbellton, N. S., of August 2nd, says: "Mr. C. E. Kennedy is being congratulated upon the arrival of a little stranger—a boy."

Mr. Wm. Earle of the Bell Telephone Company Montreal, is home on a holiday.

Mr. Wm. E. M. Curtis, Ph. G., son of J. F. Curtis, Esq., of the Customs Department, arrived here from London, Ohio, last evening on a brief visit to his parents. His many friends here are pleased to see him.

J. A. McDonald and wife and K. McKinnon are at the Victoria en route to St. Augustine, Florida, after a pleasant visit to their home in P. E. Island. Both gentlemen have been in Florida for about twenty years. Mr. McDonald acted as superintendent, and Mr. McKinnon as foreman in the construction of St. Augustine's two big hotels, the Palace de Leon and the Royal Ponce de Leon, the former with accommodation for four hundred and twenty-five persons, and the latter five hundred and sixty.—St. John's Sun.

Prof. Robertson and party arrived in the city last night and registered at the Hotel Davies. The party comprises, besides the professor, ex-Governor W. D. Hoard, of Wisconsin, D. M. MacPherson, M. P., of Alexandria, Ont., and Prof. Fletcher, entomologist of Ottawa. Prof. Robertson attended the Farmers' and Dairymen's meeting in Market Hall this forenoon, and is to visit some of the dairy stations. The other gentlemen will probably enjoy a drive through some of the country districts. All will attend the Agricultural Conference on the Driving Park to-morrow.
