

Is the baby too thin?
Does he increase too slowly in weight?
Are you in constant fear he will be ill?
Then give him more flesh. Give him more power to resist disease. He certainly needs a fat-forming food.
Scott's Emulsion is just that food. It will make the baby plump; increase the weight; bring color to the cheeks, and prosperity to the whole body. Thin children take to it as naturally as they do to their milk.

See and know, all druggists.
SCOTT & BOWNE, Chemists, Toronto.

Of Special Interest to our Farmers

Good Results from the Plowing Under of Green Clover.

BY DR. SAUNDERS, DIRECTOR OF EXPERIMENTAL FARMS, OTTAWA.

Among the many things of interest seen by the large number of farmers who have visited the Central Experimental Farm at Ottawa during the past few weeks, none have awakened greater surprise than the striking illustrations made this season, showing the advantage to crops of the plowing under of green clover. This is particularly seen in a field of oats of about ten acres. This land in its preparation in the spring was treated the same throughout; the field was all sown the same day with one variety of oats—the Bavarian. Last autumn, about eight acres of this field had a good mat of red clover turned under, which was grown from seed sown (10 lbs. per acre) with a barley crop in the spring. One acre was plowed which had been in Bromegrass for two years; one acre which had been occupied with other pasture grasses for a similar period; and one acre with a mixture of pasture grasses and clover.
Over the whole area where the clover was turned under, the increase in the growth of the oat crop is most striking. The difference in the height of the grain will average about twenty inches, and the deep green color of the leaves on this part of the field, and the vigor of the plants, are in striking contrast to the crop on the adjoining land where there was no clover. This remarkable increase in growth affords convincing proof of the added fertility given to land by the plowing under of green clover.

In another field, which has been planted with potatoes, a strip of the land covering eight rows of this crop had clover grown on it last year, which was plowed under. On that strip the growth of the potatoes, as compared with the same variety on the land adjoining where there has been no clover, was quite remarkable, the plants being much larger and more vigorous. The results of the crop in both these instances will be watched with interest.

Last year a little illustration was given on eight plots of land on another part of the Farm, on four of which red clover had been sown with grain in the spring of 1897; while on the other four grain was sown without clover. This land was all plowed in the autumn of 1897, and in the spring of 1898 the whole area was sown with Banner oats. The greater vigor in the growth of the grain where the clover had been turned under was very noticeable quite early in the season and became more striking as growth advanced. These results were brought under the notice of a large number of visiting farmers during the season of 1898. When this crop matured, the grain on these eight plots was harvested and threshed separately, and the yield per acre on the four plots on which the clover had been grown exceeded that obtained from the plots on which there was no clover by an average of eleven bushels and one pound per acre.

In another field clover was similarly sown in 1897, in different quantities, with grain on a series of plots, with three left as check plots without clover. As these were all to be planted with Indian corn, they were not plowed until May 23rd, 1898, by which time the clover had made a heavy growth. After plowing and harrowing, the corn was planted, and when harvested in the autumn the average crop on all the

Of your money unless you get value received for it. For that reason we are always glad to have you look around our store and learn how much better you can do here than anywhere else.

John McKenna
Queen Street,

plots on which not less than eight pounds of red clover had been sown and plowed under exceeded in weight the average yield of the three check plots on which there was no clover, by 4 tons 233 lbs per acre.

Cultivation and Pruning of Raspberries.

A raspberry plantation should be set in spring as early as there is warmth in the land. The stock set out should be vigorous suckers of the previous year's growth, taken from productive plots of good variety. The land to receive the plants should be prepared in the previous autumn by deep and thorough cultivation and liberal manuring. The plants should be set in rows six feet apart and four feet apart in the rows. The plants should be trimmed back to about one foot in length at planting. The ground between the plants should be kept cultivated on the surface during the fore part of the season, and then mulched with damp straw to keep down the weeds and preserve moisture. The following spring the canes may be tied up to stakes loosely with soft string or strips of cotton, but this is not generally considered necessary. The ground should be cultivated as during the previous season, or a mulch may be applied soon after the fruit is set on the canes. After the fruit has been harvested, the old wood may be removed and burned, or left till the fall or following spring, and the latter is probably the better course. The tops of the canes should be cut back in the spring, leaving them about three feet high. They will thus grow stronger, and will be less liable to fall down with their own weight. It is wise to thin out the canes each spring to four or five vigorous canes in a hill or group. The soil should be kept in rich condition and when the plantation shows an inclination to run out, a new one should be set out and some other crop grown on the ground for a few years. By renewing the plot in this way every five or six years good results should be realized, if general, intelligent care is given to all the details of the work.—Farmer's Adv.

IT'S TOO RISKY
To undergo an operation for itching. Piles when Dr. A. W. Chase's Ointment is a surer, cheaper, easier way to cure.

Cruel, barbarous methods belong to the dark ages of the past. There was a time when a surgical operation was considered the only possible cure for piles. Not so now. Occasionally there is still found a physician who adheres to this dangerous and expensive method, but to every one who still believes in using the knife, ninety and nine recommend the use of Dr. Chase's Ointment.
Dr. C. M. Harlan, writing in The American Journal of Health, said:
"We know that 'Dr. Chase's Ointment' meets all the requisitions of the highest standard of worth, that it will be held in high esteem wherever it is used, and consequently we endorse it to every reader."
By force of merit alone Dr. Chase's Ointment has won its way into this wide, wide world, until it has made the name of Dr. Chase familiar in almost every home, and won for the venerable discoverer the title of "America's Greatest Physician."
Dr. Chase's Ointment has never been known to fail as a cure for piles. It matters not whether blind, itching, bleeding or protruding, Dr. Chase's Ointment is an absolute and perfect cure.
Dr. A. W. Chase's Ointment is the discovery of the author of Dr. Chase's Recipe Book, whose portrait and signature is on every box of the genuine. For sale by all dealers, at Edmondson, Bates & Co., Toronto.

CONFIRMED BY MR. TUTTLE

A Brantford Man Testifies that Dodd's Kidney Pills will cure Permanently.

Brantford, Aug. 7.—R. S. Tuttle proprietor of the American Hotel here, received a letter lately from a Toronto gentleman, asking whether his cure of Bright's Disease by Dodd's Kidney Pills had been permanent or not. It seems the writer is especially interested in Kidney disease and their cure and was anxious to ascertain if Dodd's Kidney Pills cured these complaints permanently.
Mr. Tuttle's reply read as follows:
Brantford, May 31st, 1899

Dear Sir—Yours of the 25th received and in reply would say that Dodd's Kidney Pills have done me any amount of good. The cure has been entirely satisfactory.

Yours truly, R. S. Tuttle
Mr. Tuttle had Bright's disease for six years, and used five boxes of Dodd's Kidney Pills.

Weary of Experimenting

With salves, suppositories and ointments and dressing a surgical operation, scores and hundreds have turned to Dr. A. W. Chase's Ointment and found it an absolute cure for piles. The first application brings relief from the terrible itching, and it is very seldom that more than one box is required to effect a permanent cure.

There is a better half in every wedding—but the best man doesn't get her.

Minard's Liniment is used by Physicians.

Great Britain, the United States, and France represent one-half of the total wealth of all nations.

Keep Minard's Liniment in the House.

DR. A. W. CHASE'S CATARRH CURE... 25c.
Is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

The evil that men do is soon forgotten—by themselves.

HIS OWN FREE WILL

DEAR SIR,—I cannot speak so strongly of the excellence of MINARD'S LINIMENT. It is THE remedy in my household for burrs, sprains, etc., and we would not be without it.

It is truly a wonderful medicine.
JOHN A. MACDONALD,
Publisher Inpropr Chronicle.

A literary statistician declares that for the year 1898 eight novels a day were published, Sundays and holidays not included.

Ask for Minard's and take no other.

A New York despatch states that the Standard Oil Co. has increased its capital stock from \$100,000,000 to \$110,000,000.

School Girls' Nerves

Many a poor, weak school girl, suffering the evil effects of an exhausted nervous system, and thin, watery blood, has been fully restored to the vigor and buoyancy of robust health, by using A. W. Chase's Nerve Food. The healthful glow on the cheek and the brightness in the eye tell of the building up process which is taken place in the body.

The average man who tries heroic measures gets a misfit.

Rheumatism Can't Exist

When the kidneys are kept healthy and vigorous by the use of A. W. Chase's Kidney-Liver Pills. It is Uric Acid left in the blood by defective kidneys that causes rheumatism. Dr. A. W. Chase's Kidney-Liver Pills make the kidneys strong and active in their work of filtering the blood, and thus removes the cause of rheumatism. One pill a dose, 25 cents a box.

The annual interest charge on the Spanish national debt is \$125,000,000 and the total revenue is only \$150,000,000.
