THE persistency of the North Star in its evil course, and its resolution to persevere therein, even unto the death that the fool dieth, reminds us of a speech which, as it was uttered by a Western orator in Congress, lately, cannot offend any American toady like its editor:—

"I will stand here, Mr. Speaker, until the angel snaps his last gun. I will stand here until the little rats carry me out piecemeal through the key hole. I will stand here until Gabriel fires the crack of doom amid the wreck of matter, and the crush of boards, until Asia tumbles into Africa, and the polar (North) Star is left to gleam like the eye of hell or a mighty void of collateral chaos."

SEVERAL barrels of oysters have already been brought into market. They sold for 8s. per barrel.

THE roads are now in a shocking bad state. If some stones were now thrown into the holes and ruts they would be of good service.

A public meeting for the purpose of appointing Fire Wardens and Assessors for Summerside, for the ensuing year, will be held on Wednesday, the 5th May, in the Court Room.

We were shown the other day a very beautiful painting, the work of Mr. ROBERT GIBSON, of this place. The scene represented is the visit of the Magi or wise men from the East, to the infant Jesus in Bethlehem.

It is rumored that the Government will adopt a new and bold policy as to the Spanish Cuban question. Belligerent rights are to be conceded to the Cuban insurgents, assistance rendered, and the independence of the Island assured.

London, April 21.

During a debate on the Educational Bill in the Bavaria Chambers to-day, the Prime Minister Prince Hohenloe made a remarkable speech. After protesting against the entrance of any party feeling whatever in the consideration of questions concerning the Church, he proceeded to stigmatize the encyclical letter of the Pope as contrary to the spirit of the age, and as one of the causes of the differences which have arisen between the Church and the State.

Madrid advices states that another informal meeting of members of the majority in the Cortes, was held to-day, to nominate a candidate for the throne. So great was the diversity of opinion, that the meeting broke up without result, leaving the meeting more widely divided than before on the subject.

Prime Minister Serrano declared that the choice of Montpensier for King, or a declaration of a Republic, were the only possible alternatives. Gen. Prim who was also present, remained silent throughout the proceedings.

His conduct has given rise to a widespread belief that he would not be unwilling to accept the Presidency of a Spanish Republic. The Cortes is considering a project for the re-organization of the army on the Prussian system.

London, April 28.

The "Morning Post" has an elaborate editorial article on the Cuban question.

The writer says it is asserted that President Grant has a longing eye on Cuba, and is not unwilling to distract the attention of the people from their internal affairs by a foreign war.

The issue of a conflict between the United States and Spain cannot be doubtful unless England and France interfere. A blow at Cuba would be a blow at all the West Indies, and the acquisition of Cuba might be followed by the acquisition of Jamaica and Martinique etc. The "Post" goes on to quote the recent acquisitions of Territory by the United States in proof of her desire to acquire piece-meal the possessions of the European powers in America. It would be natural to begin with Cuba, belonging to the weakest of the three powers holding possessions in the West Indies. It may be that France and England will determine whether, in the event of the execution of the designs of Cuba, they will aid Spain to retain her colony, or calmly look on.

The French papers agitate the question in much the same way. Special meetings of the French Cabinet were held yesterday, and on Tuesday, on the same subject. A special agent was despatched to London last night, to communicate with the English Government in regard to the complications.

Washington, April 22.

At an interview between the Spanish Minister and Secretary Fish, on Tuesday, the latter refused to issue a proclamation discouraging filibustering expeditions to Cuba. He also informed Senator Roberts that the United States Government considered the English Government liable for the capture of the brig Mary Lowell, and reparation had therefore been demanded through the British Ministers.

He also said that he had demanded full reparation and indemnity from Spain for the capture of the schr. Lizzie Major, and that if an answer was not forthcoming shortly war would ensue. Secretary Fish's action has caused great excitement in England, Spain, and the United States.

The second number of a new journal, the Imperialist, has appeared. It announces that its object is to prepare the people of the United States for revolution, which is alike desirable and inevitable. Democracy, though theoretically plausible, has resulted in failure—has been found to mean nothing but lawlessness and insecurity to person and property—robbery of personal creditors and civil war; while monarchical institutions on the other hand, mean law, order, and security, public faith, and peace.

We quote, verbatim as follows: "That the Government of the United States is as thoroughly corrupt as the skillful villainy of knaves, swindlers and thieves, placed in office by the will of people can make it, is a fact that none can deny. That we have reached a crisis in our national affairs, when the establishment of a pure, strong, central government, is essential to the prosperity of our national life, is equally apparent. The only question to be decided is, how can this change be effected?"
