Big Cities Less Civic-Minded

TORONTO (CP) — A survey of Canadian interest in municipal affairs shows the people of smaller communities show more interest in local government than do residents of big cities.

The facts are drawn from a voting survey of 122 Canadian towns and cities recently completed by the Canadian Federation of Mayors and Municipalities.

The survey shows residents of the small towns of Quebec display the greatest interest in voting in some communities reaching more than 90 per cent. No municipality outside Quebec came near 80 per cent.

In the last municipal elections, 57 per cent of the voters turned out to vote in Canadian municipalities of less than 25,000. In cities of more than 100,000, the turnout was 44 per cent.

The range of voting interest across Canada varies the survey shows. In municipalities of less than 10,000 the turnout at the polls ranged from 21 per cent to 96.7 per cent in Montmorency, Que.

In cities with more than 100,000 the turnout ranged from 28.3 per cent to 58 per cent.

WHY HAVE SORE FEET?
JUST RUB IN
MINARD'S "KING OF PAIN" LINIMENT

Skinny men, women gain 5, 10, 15 lbs.
Get New Pep, Vim, Vigor
What a thrill! Bony limbs fill out; ugly hollows fill up, neck no longer scrawny; body loses half-starved, sickly "bean-pole" look. Thousands who never could gain before are now proud of shapely, healthy-looking figures. They thank Ostrex Tonic Tablets. Helps build up body skinny because of poor appetite due to lack of iron. Improves digestion, nourishment; puts flesh on bare bones. Increases pep. "Get-acquainted" size only 60¢. Try famous Ostrex for new pounds, pep, vim, vigor, this very day. At all druggists.

Worry of
FALSE TEETH
Slipping or Irritating?
Don't be embarrassed by loose false teeth slipping, dropping or wobbling when you eat, talk or laugh. Just sprinkle a little FASTEETH on your plates. This pleasant powder gives a remarkable sense of added comfort and security by holding plates more firmly. No gummy, gooey, pasty taste or feeling. It's alkaline (non-acid). Get FASTEETH at any drug counter.

BEDTIME STORIES

Chatterer Watches And Plans

"If you would do the best you can Be sure to make a careful plan." —Chatterer

Chatterer the Red Squirrel really should be named "Mischief." He is full of it. No one in all the Green Forest is quite so full of mischief as Happy Jack's small cousin in the red coat. Wherever Chatterer is there is sure to be trouble sooner or later. Sometimes it is trouble for himself but more often it is trouble for others. That is one reason Chatterer is disliked by most of his neighbours. Another reason is that he is at times so noisy.

In the spring and early summer, when most of his feathered neighbors are nesting, Chatterer is really hateful. Anyway that is what they think, and they don't hesitate to tell him so. It is all on account of his appetite. Yes, sir, at that time Chatterer's appetite

"I must be sure there are eggs in that nest before I try getting out there."

makes a lot of trouble for othres and for himself too. He likes eggs. My, how he does like eggs! Of course eggs don't grow like nuts and seeds. The only way Chatterer can get eggs is to steal them. To him there is nothing wrong with that. If he could get them in any other way it would be a very different matter. But there is no othher way.

'If the birds don't want me to have their eggs they should hide them so that I can't find them. It is their own fault if they leave them where I can get them," says Chatterer. I suspect he really believes that.

So Chatterer spends much time in the spring hunting for eggs. It is fun, and he hasn't much of anything else to do. To him it is a kind of game, a game of wits. He is all the time trying to outsmart his feathered neighbours by stealing their eggs in spite of them. Now to that red-coated scamp an egg is an egg and all eggs taste good but a few taste better than others. They are the ones that are hardest to get.

This year he had found the nest of Goldie the Oriole. He could hardly help finding it. That nest was made wholly of white string and no one could fail to see it hanging from the tip of one of the long spreading limbs of the big elm tree in Farmer Brown's dooryard.

"I've never tasted one of Goldie's eggs. I believe I can get out to that nest if I have a chance when Goldie and Mrs. Goldie are not around. I suppose they think I can't get way out there. Perhaps they think I am araid to try it because It is so high above the ground and the limb is so very small way out there. If that is what they think they don't know me. I never yet have been afraid up a tree I'm as much as home up there as they are. One chance is all I am likely to get, but one chance is all I want."

So said Chatterer to himself as he hid where he could watch that nest yet by himself unseen. "I must be sure there are eggs in that nest before I try getting out thought he. "It will be useless to try until Mrs. Goldie begins sitting. Then I'll know she has all the eggs she is going to have. Until then I might find only one, or two."

So, keeping out of sight of other feathered neighbors as well as the Goldies, Chatterer hid where he could watch that nest and its owners find out if and when the nest was left unguarded, and learn all he could about the ways of Mr. and Mrs. Goldie. Now and then he licked his lips. He was sure those eggs when he got them would be the best eggs he ever had tasted. The more difficult it was to get them the better they were sure to taste.

Leading Scientists To Foregather At Pugwash

PUGWASH, N.S. (CP)—Scientists from 14 nations meet in this quiet Nova Scotia village Monday to ponder one of the world's hottst questions: The dangers of atomic radiation.

They're coming here to the family home of 73-year-old Cyrus Eaton, Cleveland industrialist, for three days of thought and informal discusion behind closed doors.

Thirty-eight men have been invited and almost 30 are expected. Lord Bertrand Russell, British philosopher and mathematician, heads the group. He drew up the agenda and invitation list.

Four Soviet scientists arrived Friday night. Twelve United States scientists and scholars have been asked, five from Great Britain, three from Germany and two each from Canada, India and Japan.

Others are expected from Australia, Austria, Brazil, China, Denmark, France and Poland.

FOUR PRIZE WINNERS

The list includes four Nobel Prize winners. Lord Russell won a Nobel Prize for literature, Prof. C. F. Powell of Bristol, Eng., for physics, Dr. Adolf Butenandt of Munchen, Germany, for chemistry and Dr. Hideki Yukawa of Tokyo for physics.

Canadians invited are Dr. G. Brock Chisholm, former director general of the World Health Organization, and Prof. John Stuart Foster, McGill University physics professor.

Americans include Dr. J. Robert Oppenheimer, who had much to do with the first atomic bomb. However, he may not be able to come. Dr. Oppenheimer now is physics director at the Princeton Institute of Advanced Study.

Another U.S. delegate is Dr. George W. Beadle of California, president of the American Association for the Advancement of Science.

The Soviet representatives are Vladimir Pavlivich Pavlichenko, assistant general scientific secretary of the U.S.S.R. Academy of Sciences; A. M. Kuzin and A. V. Topchiev of the Academy of Sciences, and D. F. Skobeltzyn of the Soviet National Academy. Chou Pei Yuan, Peiping University's vice rector, will represent Red China.

THIRD SESSION

This is the third summer Mr. Eaton has been host to world scientific and educational leaders.

When he announced his plans in 1955 he said he aimed to give thinking men an opportunity to "relax together, exchange views, sharpen their own thinking and design formulas for us to live in this brand new world."

"My conviction is," he said, "that we have now entered a new world and in order to meet the requirements each and everyone of us must be physically and mentally alert."

His guests find this fishing and lumbering village on Northumberland Strait a good place to relax, he says. Its citizens, who number less than 1,000, will open their homes this weekend to help house the visitors.

The 15-room Eaton home can't accommodate them all. Town blacksmith Walter Simmons, undertaker Irving Mundle and the local hardware dealer, Everett Mundle, are among those who will be hosts. Some will sleep in railroad cars at Pugwash station.

Th scientists started arriving Friday. They will continue trickling in from the four corners of the world until the discussion sessions open Monday morning. The talks will last three days.

The official topic is "nuclear energy hazards in war and peace." The men are expected to range over such aspects as control and development of atomic and hydrogen weapons, an international code for dealing with radioactive materials and the diversion of fuels for war purposes.

They will meet in a room at the local Masonic Hall used until last week as a temporary classroom for primary school pupils.

The old Eaton house has been dubbed the "home for thinkers" since the first group of scholars vacationed here in 1955.

Two other groups will come later—U.S. college presidents beginning July 15 and university deans July 26.

Huge Iceberg Causes Damage

OLD PERLICAN, Nfld. (CP)—Residents on the Avalon Peninsula sweltered under blue skies Sunday high 70s and low 80s. Despite the as temperatures hovered in the weather, residents of this Trinity Bay fishing community had an unexpected fling with winter.

A huge iceberg overturned as it drifted by on an unseasonal call and destroyed an untold number of net cod traps. Salvage attempts are now underway and some fishermen believe the damage may mean a far too early evil to this year's fishery.

High Consumer Credit Rates Scored By Ass'n

OTTAWA (CP) —The Canadian Association of Consumers, expressing concern over interest rates on consumer credit, says it would like to see chartered banks "much more involved" in providing such loans.

Competition from the banks should bring down interest rates charged by finance companies, the association said in statements published in the current edition of the CAC bulletin.

The interest cost of most consumer credit was "unnecessarily high." Calculated on a yearly bases, it ranged upwards from 18 per cent.

"CAC would like to see the chartered banks much more involved in the instalment and small loan business, even if this means increasing moderately the maximum interest rate of six per cent they now are permitted to charge on cash personal loans."

The amount of consumer borrowing had reached a record $2,469,000 12 per cent of disposable personal income. The danger point to family income, considered to be 20 per cent, had been passed in many cases.

The association criticized advertising which, it said, attracts customers by so-called "easy terms" instead of good merchandise. Advertising which quoted prices only in terms of monthly payments, without mentioning total cost or the payment period, was "highly misleading."

The 17,000-member consumer group said public education is needed for more intelligent borrowing and suggested these pointers:

1. Try first to borrow from your bank, where rates are lower before going to finance companies.
2. Find out the cash price of an article you're interested in the "list price" often incudes an amount to cover credit purchasing.
3. If you can't afford 10 per cent down, or if you need more than two years to pay, you probably can't afford the purchase.

CONTRACT BRIDGE

By B. JAY BECKER

♦ Q 10 6 4 2
♣ 10 3

SOUTH
♠ A K 5
♥ K 6 2
♦ A K 9 5
♣ K J 8

The bidding:

South	West	North	East
1 ♦	Pass	1 ♥	Pass
3 NT			

Opening lead—five of clubs.

Bridge would be a much easier game to play if, when a crucial point in the play was reached, some kind soul would come along and ring a bell to alert you to be careful.

The trouble is most of these situations kind of sneak up on you unawares, and when you do something that at the time seems like a perfectly natural thing to do, all of a sudden a trick or two later you wish you'd done something else.

I wouldn't want to condemn West to the hoosegow for the rest of his days for what he did during the defense—it was all so natural—but it just goes to show how in bridge you can never relax.

The bidding was pretty normal, so was West's opening lead, and so was declarer's play. South saw nothing could be done to make three notrump unless he could bring in the heart suit.

So he won the ten of clubs with the jack, played the king of hearts, both defenders playing low, and led a small heart. West played the queen and South let him hold the trick. Not from any sense of affection, you know, but West looked like a nice guy to have on lead.

West couldn't do anything good for his side at this point. South was now looking at nine solid tricks, and that's what he wound up making.

If you couldn't figure out how declarer was going to get nine tricks when you first looked at the hand, now you know. But he shouldn't have gotten them, and do you know who the culprit was? West.

All he had to do was drop his queen of hearts on the king when South led it. Declarer could now stand on his head and he couldn't make the hand.

The queen was no earthly good to West. If South had the jack the queen was dead, and if East had the jack the queen was too hot a card to hang on to.

Somebody shoulda rung a bell.
