

NEWSY NOTES

By AGRICOLA

A GOOD HISTORICAL NOVEL

It is a hard task to write a historical story. Did you ever question...

Two British writers, Fairy and Williams have succeeded in representing the spirit of a little known...

Part One is entitled St. Eric's Day, (1002), a day when King Ethelred...

Eleven years passed away, and Swyn came again. How much tracher prevailed and made him master of Britain is well told...

ODDS AND ENDS

Aloysius from the Ivory Coast in the West. This is the title of another good book...

On Boiling Potatoes

I am told that the water in which potatoes are boiled, is not good for anything...

Jupiter Pluvius

On Thursday last (Aug. 3rd) the moon was in conjunction with the planet Jupiter...

SCANDIA

Fox Farm Choppers

On Thursday last (Aug. 3rd) the moon was in conjunction with the planet Jupiter...

W. W. Lamplugh & Co.

History of the Apple Is Still In The Making

(Experimental Farm News) The apple is an ancient and honored fruit. According to historians...

This has not been reported as growing in the island but it occurs on the mainland whence a friend brought me a root three or four years ago...

Oats Not Filling

Looking over the growing oats in the fields, they "stink" in the heads. The farmer has perhaps had some reason (drought?)...

Why we don't get better.

We have discussions of all kinds in the columns of our newspapers, and if there is wisdom in the multitude of counsellors we should be very wise...

The Riverside Grape

Last fall I went over my wild grape vine, carefully with the pruning shears, and now it is responding with such a crop as I've never had before...

Old Harvest Custom

Of old, Harvest Time was truly "the crown of the year." The people of the Northern parts had a multitude of grain to worry about...

This bringing in of the last sheaf was the occasion for the most characteristic custom...

On Boiling Potatoes

I am told that the water in which potatoes are boiled, is not good for anything...

Jupiter Pluvius

On Thursday last (Aug. 3rd) the moon was in conjunction with the planet Jupiter...

SCANDIA

Fox Farm Choppers

On Thursday last (Aug. 3rd) the moon was in conjunction with the planet Jupiter...

CONSERVATION

A WEEKLY COLUMN OF PRACTICAL OPINIONS OF THE VITAL ISSUES AFFECTING THE USES AND ABUSES OF NATURAL RESOURCES BY MR. LUDLOW JENKINS, MARSHFIELD.

THE STEEL TRAP

Modern Instrument of Torture

(By Mrs. Edward Brock)

The Anti-Steel-Trap League was formed by Edward Brock in 1925. His activities during a romantic, venturesome and distinguished career...

Phy, Phy

The American naturalist, Elliott Coues, describes a trapped fur-bearing animal as "the violence and persistence of the poor, tortured animal..."

Your Business - and Mine

The average animal in a trap suffers this way for days - for many days, sometimes, before it dies...

History's Foulest Horror

Why did the founder of the Legion of the Damned (the Delinquent League) sometimes found in hayfields, having been introduced in the grass or cover seed...

Law and the Trapper

There is a trapping regulation in some of the more enlightened states requiring trappers to file their traps every twenty-four hours to release their catch...

THE PERFECT DISINFECTANT

Widely used for disinfecting fox pens, etc. Powerful, economical, non-corrosive.

Preparations And Preservation Of Fruit Juices

(Experimental Farm News) The preparation and preservation of fruit juices is quite a simple matter and is an ideal way to make use of surplus or surplus fruit...

For home use the preparation of soft drinks is a very simple matter. The fruit, following sorting and cleaning, is heated to about 170-180 degrees F. (if no thermometer is available the fruit will begin to boil when the edge of the pan is visible with a little water...

Special instructions are available for those wishing to bottle and can fruit juices for sale, in which case filtration is advisable and the product so made and preserved that it will stay clear for at least a year.

There are three main activities in connection with the work of Prairie Farm Rehabilitation: cultural work, land utilization and water conservation.

In 1928 an area of 4,300 acres of land at Val Marie and Eastend, Saskatchewan was set aside for the work of Prairie Farm Rehabilitation...

More than 22,000 acres of barren and weed infested land in community pastures has been established in the Province of Saskatchewan...

Those employed in the field by the Prairie Farm Rehabilitation head office in Regina are directed by qualified Civil Engineers, practical agriculturists and specialists in irrigation.

Agricultural Improvement Associations in the three prairie provinces number 100 with a total membership of about 27,000 farmers who are actively supporting the program of activities arranged under the Prairie Farm Rehabilitation Act...

The cultural work in connection with Prairie Farm Rehabilitation is based on principles found to be sound and the result of years of research and experiments, supplemented by practical farm experience extending over nearly 50 years by the Dominion Experimental Farms.

The area coming under the provisions of the Prairie Farm Rehabilitation Act covers approximately 103 million acres of land in the Provinces of Manitoba, Saskatchewan and Alberta. Within this area there are about 47,000 acres of improved farm land, representing about 55 per cent of the total improved acreage of farm land in Canada...

To combat and if possible solve soil drifting and to bring about such improvements in farm practices and the use of land as will afford the greatest degree of security...

is the objective of the Prairie Farm Rehabilitation program in Western Canada. Cooperative community action in dealing with the program is encouraged and assisted.

TIMELY NOTES ON TOPICS CONNECTED WITH Silver Fox Farming

(Experimental Farm News) E. M. MacDougall, Bridgetown, N.S., was in Charlottetown on a short visit to friends this week. He is Secretary of the Nova Scotia Silver Fox Breeders' Association...

His organization has been very successful in that its members have every year improved the quality of their foxes. One section with some quite large ranches are growing mostly jill silvers and have studied very good averages...

Lowell Hancock, of International Fox and Animal Foods, Ltd., Fredericton, is visiting ranchers in this vicinity and is being warmly welcomed. He reports that his foxes are doing well and that a wonderful male pup so much admired at last year's Provincial Fox Show, has a large number of offspring.

A former Prince Edward Islander who returned from Seattle, Washington, this summer, addressed the Summer Side Fox Club recently and gave some interesting remarks regarding his experiences in fur farming. In 1926 he bought a pair of foxes from George McQuarrie, shortly after the mating of the pair...

Those were the glorious days - 1911-1914. You may talk about the South Sea Bubble, which if you have not heard much about you can read in Washington Irving's book, but nothing has exceeded the speculation, although on a smaller scale, that prevailed in the fur trade...

The capitalization of companies reached an unheard of total of over \$35,000,000 in 1914. Where it would have gone no one knows, but it would certainly have gone very much further, as American capital, in big chunks, also Canadian capital, was coming in. They were biting. They were getting the fever, and just as it infected us in Prince Edward Island, it would have spread all over America.

Pelt prices are parking up, so all our advice may, and the number remaining under contract has dwindled to around 20,000. During the past few weeks almost all the fur houses report more satisfactory sales by private treaty, averaging at least 7% better than May auctions, and there is a demand for good skins which is hopeful and people are willing to pay a fairly good price for them if they are in color, so while we have gone through a heck of a time, still there appears to be a brightening of the sky and happier days ahead.

Don't forget to attend the fox farmers' picnic and lectures at the Experimental Farm this morning commencing at eleven o'clock. The program, which is under the auspices of the Silver Fox Breeders' and Exhibitors' Association, is one of the best ever presented to a Maritime fox audience.

Crop Report

WINNIPEG, MAN., Aug. 11 - Further deterioration of the western crop caused by the prolonged heat spell was checked over the week-end by cooler weather accompanied by light showers and rain scattered over the three provinces. Harvesting and threshing are most advanced in Southern Manitoba and Southwestern Saskatchewan, with the majority of other sections reporting cutting either commencing or about to commence. According to the weekly crop report of the Department of Agriculture, Canadian National Railways...
