Trotting Races at Cardigan.

The residents of Cardigan and adjoining settlements enjoyed a grand day's sport at Cardigan River, on Thursday, 20th inst.

The ice was in good condition and the day was fine, and consequently a large crowd assembled to see the sport. The entries in the several races were promptly made, and the arrangements throughout were all that could be desired.

Messrs. Hugh L. McDonald, George D. Alley and Thomas Garland were appointed judges, and Mr. Patrick Cain acted as starter. Patrol judges were also appointed to see that no running took place.

The heats in the several classes were closely contested, in some instances the winning horse coming in under the wire barely a length ahead.

The first race was for horses under three years. The entries were Ewen McGregor's black colt Hughie, sired by Buchanan's Abdallah; W. W. Jenkins' bay filly Lottie C., sired by Buchanan's Abdallah; T. Donohoe's grey filly Rosa Nell, sired by Abdallah, 4869, and H. F. Bissett's bay filly _____, sired by Abdallah, 4869.

This was the most interesting race of the day, as Lottie C. had distanced her opponents at the races in Georgetown some time previously, and had shown good speed. McGregor's Hughie, however, was too fast for the filly and took the race in three straight heats, with Rosa Nell third and Bissett's filly fourth.

The next race was for three-minute horses, in which G. B. Aitken's Pilotta, sired by Black Pilot; F. McCormack's Frank, and Oswald Gordon's black colt Robba Adella, sired by Abdallah, 4869, were entered.

In this race Pilotta captured the first three heats without a break, sustaining the reputation she earned for herself at Georgetown as a game, speedy trotter. Robba Adella, who is only three years old, took second place in the first heat, but was beaten in the second and third by McCormack's Frank.

In the green race four horses started, and some excellent trotting was done. Roache's Frank took the first, third and fourth heats, and the first money. J. M. Aitken's mare took first place in the second heat, and was a good second in the others, with Dr. Gordon's Dental Queen third, and McLaren's Pansy Blossom fourth.

The best of order prevailed, and all present were highly delighted with the excellent track fair play and good trotting exhibited at the races at Cardigan. The Secretary, Mr. Alex. F. McLean, is to be congratulated on the excellence of his arrangements.

Trotting on St. Peter's Bay.

Quite a crowd of people met on St. Peter's Bay ice, on Thursday, 20th inst., to enjoy some sport in the shape of horse trotting.

The trot was to be between William McGuire's horse and John J. McAdams' "King Bird." The money was staked on the Saturday previous to the trot, but during this time McGuire found a purchaser for his horse, so McGuire's horse was not on the ice to match McAdams'. But Charles McEwen's horse, who a week previous was matched in a race at Head St. Peter's Bay with McGuire's and other horses, and who having led them all, taking the money, was present, and entered into a race with "King Bird." "King Bird" went off in a very spirited manner each time, and won the race, Chas. McEwen's "Kimble" having done very good work.

"King Bird" is rising four years old, and to all appearance will be very fast when fully developed, it being very doubtful if there is any horse of that age in King's County that is as fast at present. The day being fine and ice in good condition for trotting, all seemed well pleased with the day's sport and dispersed quietly.

News Notes.

An extraordinary amount of snow fell on the Italian and Swiss Alps during December, January and February.

The Marquis of Salisbury moved in the House of Lords on Friday that the report of the Parnell Commission be approved. The motion was adopted without division.

A resolution asking the Government to consider the advisability of supplying common school pupils with school books free was withdrawn in the Ontario Legislature Friday, on the Minister of Education stating that the Government thought the idea was too utopian for the present generation.

A correspondent, writing from Wisconsin, says that markets, formerly monopolized by Maine and Province lumber manufacturers are now open to successful competition from the Lake regions. He states that Lake Superior lumber shipments this year will be immense. The log cut will be enormously large. Lumber will be carried from Ashland, which is the port for Wisconsin lumber, to Buffalo and Tonawanda and other important lumber centres at a lower rate than for several years past. Charters have been secured at \$2.25 per thousand, and shippers say rates will yet go lower when the lake opens up. Indications point to an early spring, and with the departure of the ice hundreds of millions of feet of lumber now in sight will change hands and locations. A great quantity of Ashland lumber is finding its way into New York and Boston. A rail rate of 28 cents per thousand is considered a great inducement for dealers to ship their lumber through to the sea-board, where it is in good demand.

Wholesale people at Montreal will send a deputation to Ottawa to oppose any increase in duty on men's and women's hats.

Forged notes to the amount of 500,000 pesetas have been discovered at Madrid in a package of funds brought to the bank there from Seville.

Heavy snow has been reported to have fallen in the State of Georgia, and in the State of North Carolina, and in the State of Virginia.

Death of Mrs. William Lawson.

(Halifax Herald.)

The Herald deeply regrets to announce the death of Mrs. William Lawson. A lady of marked individuality, character, and business and literary ability, foremost in every religious, benevolent and charitable work—she was one of the few women that Halifax can ill afford to spare; and her death will be sincerely deplored by all classes of the community. The deceased had for a long time past been a victim of cancer, and had undergone one or more painful operations. But these only served to prolong existence for a short time. Some months ago it became patent that the life of this estimable lady could not be prolonged for any length of time. Since then, though suffering great bodily pain, she calmly awaited the transfer to the higher life. Mrs. Lawson was known all over the Dominion as one of Canada's foremost literary women. Her contributions over the initials M. J. K. L. were not only gladly welcomed by the local press, but frequently graced the pages of papers in various parts of the Dominion; and were always widely read and greatly appreciated. Articles or poems from her ready and soul stirring pen appeared in all, or nearly all, the special editions of the Herald or Mail during the past ten years. Mrs. Lawson was a lady of broad views and great energy, and the fact that she was actively connected with an enterprise or undertaking ensured success. No one was more successful at raising funds for institutions in want of assistance. Her latest efforts in this line were on behalf of the Church of England Institute and the Art School.

The Archbishop's Investment.

The Halifax Mail says: For some time past negotiations have been pending between Archbishop O'Brien and Dr. Butler, son of the late Hon. James Butler, for the purchase of the Butler homestead on Dresden Row. Yesterday a sale was effected to the Archbishop for a sum said to be considerably over \$10,000. It is not known yet whether it will be used for a glebe house or a private residence for the Archbishop. The stables and all surrounding land belonging to the late James Butler are included in the purchase. Possession will be taken, it is understood, at an early day. The house is one of the largest in the city. A few years ago the late Hon. Jas. Butler enlarged the premises, and made extensive alterations, fitting it with all modern improvements.

Accident to the Orient.

TORONTO, 21st May, 1888.

DEAR SIR,—
I give me great pleasure to be able to express my obligations to the representatives of the C. P. R., wherever I had to come officially in contact with them, from Shanghai to this beautiful city of Toronto, the courtesy and friendly attention of all the agents of the Company were all that could be desired. And though travellers must find some cause of grumbling, never did I hear any other than language of praise as to the conduct of officials on both land and sea. When the new steamers are on, I can conceive of no route to the Far East with more of the comforts desired, and less of the unpleasantness dreaded by travellers than this one. The cooking on the dining-cars was surprising for excellence, only in a less degree than the magnificence of the scenery west of Calgary. It is certainly a mistake to rush through that portion of the route. Guide books treat with enthusiasm of the scenery about North Bay, and especially of that on the northern shore of Lake Superior. It probably is striking to one journeying westwards, but to us coming from the west it seemed of comparatively little consequence. Most of us would have been fully satisfied had we seen only the Cascade Mountains with their innumerable streams tumbling down the almost precipitous heights, and the roaring, foaming river furiously leaping down its rocky bed at their foot. But when the grandeur of these proved to be but only introductory to the almost terrific grandeur of the Gold, and especially the Selkirk range, the brain became simply stunned, so that when the proud eminence of Mr. Stephen looked down upon us as it appeared only as a matter of course, scarcely deserving a note of admiration. The traveller should take at least four days instead of two in crossing those dread mountains. From my reading I thought it would have been proper occasionally to feel highly nervous; but this was impossible, as the road everywhere is solidly constructed and the drivers so careful.

I am, yours faithfully,
JOHN ROSS,
Minister at Shanghai.
MR. PEEL, Passenger Agent, C. P. R., Toronto.

The Head and the Brain.

Dr. Starr, of London, says that it is impossible to draw any conclusion from the size or shape of the head as to the extent or surface of the brain, and as to the mental capacity. It is absurd to judge of the brain surface by either the size of the head or the extent of the superficial irregular surface which is covered by the skull, without taking into consideration the number of folds or the depth of creases. "For a little brain with many deep folds may really, when spread out, have a larger surface than a large brain with few shallow folds." What do phrenologists say to this?

For Rickets, Marasmus, and all Wasting Disorders of Children

Scott's Emulsion of Pure Cod Liver Oil, with Hypophosphites, is unequalled. The rapidity with which children gain flesh and strength upon it is very wonderful. "I have used Scott's Emulsion in cases of Rickets and Marasmus of long standing." In every case the improvement was marked.—J. M. Main, M. D. New York. Sold by all druggists, 50c. and \$1.00.

A destructive cyclone passed over the village of Edgemore, South Carolina, last Saturday afternoon. Fourteen houses were blown down, a negro killed and several persons seriously injured. The roof of the Georgia Carolina Co. Northern depot was blown half a mile away.
