ALUMINUM has a habit of turning up almost everywhere. But "farthest north" was reached recently, when a U.S. Air Force pilot set down his aircraft at the geographic North Pole—on a pair of aluminum skis.

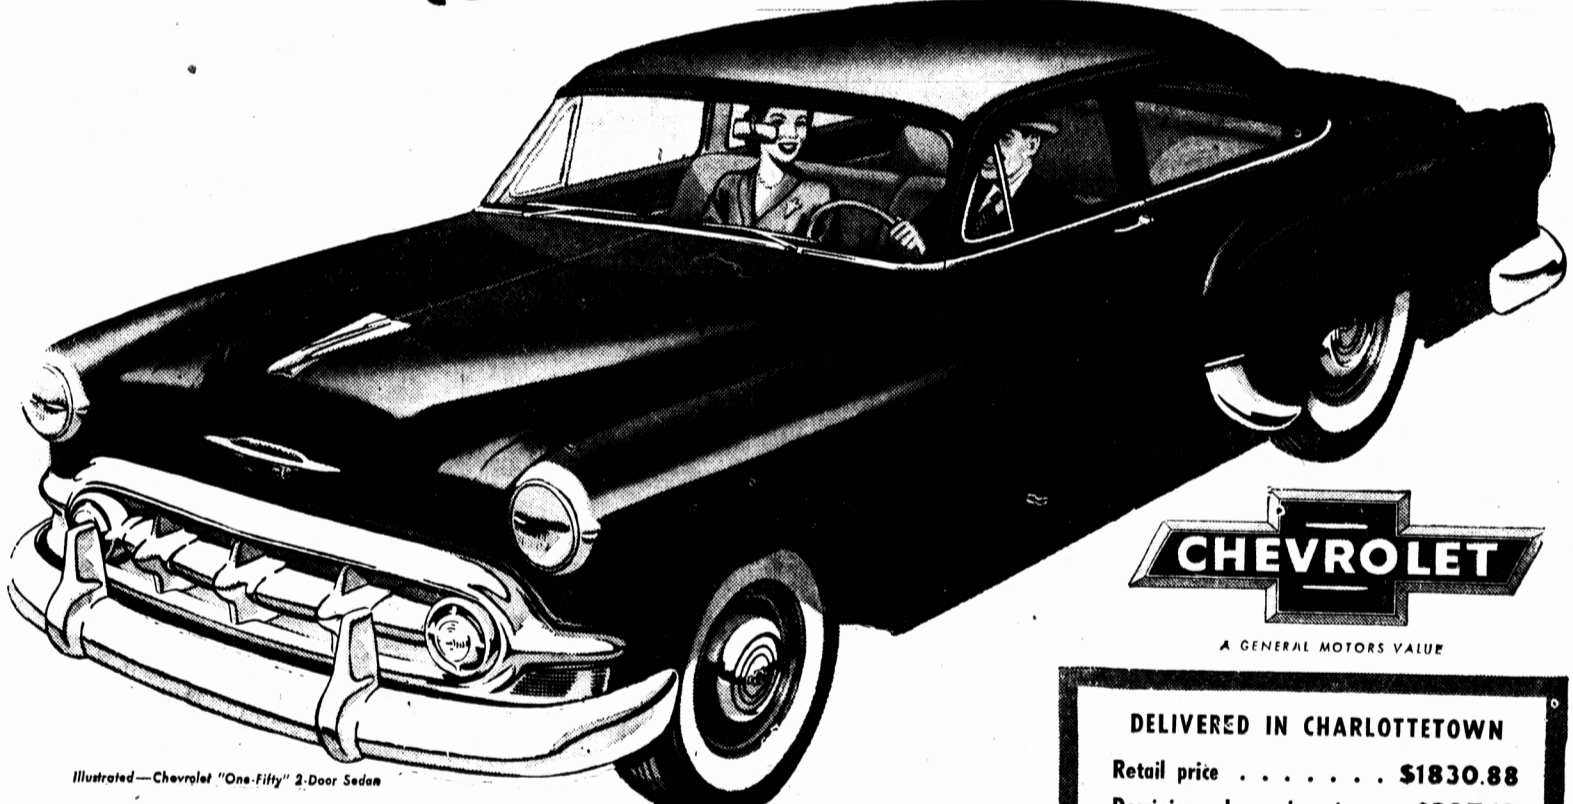

Aluminum's lightness - with strength has made it the basic material of the aircraft industry. And because aluminum is only 1/3 as heavy as other base metals, a pound of it goes a lot further. Which is one more reason why so many manufacturers of so many products have turned to aluminum to help keep their prices down. Aluminum Company of Canada, Ltd. (Alcan).

DAILY CRYPTOQUOTE—Here's how to work it! AXYDLBAAXR is LONGFELLOW. One letter simply stands for another. In this example A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

Don't Panic, it's PANELYTE! A quick swish with a damp cloth, and those greasy marks will be off that Panelyte wall! The same applies to cosmetics, ink, alcohol and other stain-makers. Yes, Panelyte is a cinch to install, and a cinch to keep sparklingly clean.
