MUDIE MEASURE.—The Pall Mall Gazette has evolved this new system of measurement, which it calls the Mudie measure, in honor of the great circulating library man in London of that name:
Ten lines make one point,
Two points make one chapter,
Five chapters make one episode,
Two episodes make one volume,
Three volumes make one tired.

THE PROPRIETORS.
Make a Few Pertinent Remarks to their Patrons.
TORONTO, Jan. 28.—Dr. L. A. Smith & Co. of this city, whose name has become a household word through the Dominion, and in many states of the Union, in consequence of the wonderful cures effected by Dodd's Kidney Pills, desire to thank their patrons for the good words they have spoken for this remedy. During the past few months these expressions have been written to nearly every paper in the country by grateful people whose lives have been prolonged. These expressions, when forwarded and honest, should convince any unprejudiced mind of their sincerity and truthfulness. You know now, reader, that Dodd's Kidney Pills will do all that is claimed for them. They have stood the test.

"Say," said the office boy, "I think the boss ought to gimme a bit extra this week but he won't."
"What for?" asked the book keeper.
"For overtime. I was dreamin' about me work all las' night."

HOW TO TREAT A COLD.
Don't stuff a cold, as the old usage advises, if you do you will have a fever to starve. A genuine cold is a shock received by the many million nerves which approach near the surface of the human body, and which control the nearly seven million pores of the skin. This shock closes the pores of the skin, is transmitted to the nerve centre and back to the mucous membranes, forcing a great amount of blood to these membranes, creating more or less irritation and consequent fever, inflammation, dryness, throat watering, discharge and catarrh. The shock may have its cause from a chill, from improper eating, a nervous fright, and various other causes which irritate the nerves of the skin and mucous membranes of the nose, throat and bronchial tubes. Excess of blood in the stomach still more clogs the system and pores of the skin, so that effete matter, which should be carried off by the natural courses, is retained, which is ample reason for not stuffing a cold. Experimenting with a severe cold is a dangerous custom, as most friends suggest another "sure cure." When slight hoarseness or tightness of the membranes warns one of a skin exposure or chill from whatever cause, act promptly, delays are dangerous; with children it may mean croup and strangulation; with adults, catarrh, bronchitis, perhaps pneumonia. Scores of mothers would as soon go to bed without matches in the house as without that old-fashioned remedy, Johnson's Anodyne Liniment near at hand for colds and croupy children. The proprietors, I. S. Johnson & Co., Boston, Mass., will send their new illustrated book entitled "Treatment for Diseases," free to any person for the asking.

RAID HEADS GO WITH BIG BEARDS.
"You'll have a bald head before many years," said a barber to a customer. "Why? Well, it's a very easy matter to tell. Now, while it would be to my interest to sell you tonics or hair restorers, I tell you that nothing you can use will prevent you from becoming bald. I have learned from years of wide experience and keen observation that when a man has an extremely strong beard he will invariably lose the hair on his head. It seems in these cases as if all the strength of the hair went into the beard. I don't give this as a mere theory. I have proved it by my own satisfaction that it is true. It might be put down as a rule that the stronger the beard the weaker the hair of the head."—Pittsburg Dispatch.

Convincing Mothers
That Lactated Food is the
Baby's Best Nourishment.

When mothers take the trouble to test Lactated Food, they are soon convinced that it is far ahead of all other prepared foods as a nourisher and life giver for the baby.

The manufacturers of Lactated Food are anxious that every mother in Canada should give their food a trial; and, in order to have this done, they offer to send free of charge, by mail, a full-sized tin. It is earnestly hoped that all mothers who have babies and who have not yet given Lactated Food a test, will send in their names and addresses to the Wells & Richardson Co., Mountain St., Montreal.

The Lactated Food is a source of life, health and strength for weak and sickly babies, and the free trial tin offered to mothers may be the means of saving some little life.
