Agent for Ozonator Disinfectant Co., Montreal, and William Radam Microbe Killer Co., Montreal.
Manufacturer of the celebrated DAVIES' OINTMENT and NO 7 LINIMENT. The best Ointment and Liniment ever offered to the public. If you need either give us a call and you will use no other after once using this.
F. DeC. DAVIES,
ap7 Proprietor.

Another Testimonial.

DR. HAYNES,—Dear Sir: I am sorry you have so much to contend with. No doubt it is caused by jealousy. I shall certainly do my best to contradict any false reports I may hear, both for your own sake and my own. I would be very ungrateful should I do otherwise, after having derived so much benefit from your medicine. You promised to cure me in six months from the time I commenced taking your medicine, but I am happy to state that I had not been taking it more than three months when a cure was effected; and after having consulted all the doctors in this vicinity without effect, the only consolation I derived from any of them was that my disease (sick headache, etc.) had become chronic and was incurable. If this statement will be of any benefit to you, you are perfectly welcome to publish. Yours very truly,
MRS. C. E. POOLE.

It is certainly a Great Tribute to MELISSA that such persistent attempts are made to produce imitations.

Counterfeit money to pass current even among the most ignorant must be made to resemble genuine coin.

In like manner it is found necessary to even copy Melissa patterns and styles in the frantic effort to place imitation goods on the market.

ALL IN VAIN.

The public are not so easily humbugged, and regard with undisguised contempt such an underhand and paltry manner of doing business.

Our MELISSA CLOTHS are manufactured by the largest and best mills in the country. All our patterns are made specially for us, and the mills guarantee they will neither reproduce them in any other cloth nor sell them to any other firm.

We neither deal in Counterfeits nor play Second Fiddle.

Copies of Melissa patterns must therefore be obtained from some of the smaller inferior mills in lower grades of cloth.

NOTHING EQUAL TO MELISSA HAS EVER HERETOFORE BEEN PRODUCED either for Ladies' Cloakings or Men's Ulsterings. There is a large range of the most fashionable colorings and patterns to choose from. The Cloth being thoroughly Rainproof, you get in a Melissa Cloak or Overcoat a beautiful fine soft Woolen Garment having all the advantages of a Waterproof without any of the disagreeable or unhealthy qualities.

Melissa Goods are now being sold by all the Leading Dealers throughout the Dominion.

All genuine porous rainproof cloths are stamped in wax with the Melissa trade mark seal, and Melissa Garments have the above trade mark label attached. None other genuine.

THE MELISSA MANUFACTURING CO., MONTREAL.

Mrs. Capt. J. E. MELVIN.

Paralysis Defeated!
BLEEDING PILES,
Headache and Dyspepsia
CURED BY SKODA.

MRS. MELVIN IS A LADY OF INTELLIGENCE, HONESTY AND TRUTHFULNESS, AND HIGHLY ESTEEMED BY ALL HER NEIGHBORS AND FRIENDS. SHE WILL COROBORATE ALL THE STATEMENTS IN THE FOLLOWING LETTER.

GENTLEMEN:—For years I had a terrible trouble with my stomach—my **food souring** immediately after eating, together with a **severe headache.** I would have a **prickly, numb sensation** in my arms, and down my sides, with strong tendency towards **Paralysis.** For thirteen years I have been troubled with **extreme Constipation,** combined with that most terrible tormentor, **Bleeding Piles.** At times they would bleed profusely, and pain me severely, so that I could neither **sit, stand, sleep or eat.** I became very much reduced in flesh and strength, and felt **completely worn out.** I have tried nearly all the Physicians in this vicinity, and have taken patent medicines in large quantities, but received no permanent benefit. Through a friend, my attention was called to the merits of SKODA'S REMEDIES. I consented to try them, having but little faith in their efficacy. I at **first felt but little effect,** but persisted in their use. I have now taken four bottles of SKODA'S DISCOVERY, used two boxes of SKODA'S PILE CURE and four boxes SKODA'S LITTLE TABLETS. **My Dyspepsia is all gone, Bowels regular, Appetite good,** and have gained much in flesh. In fact, **AM PERFECTLY WELL.**

BETTER THAN COLD

All credit is due to your **Wonderful Remedies,** and I cannot say too much in their praise.
Truly yours,
MRS. CAPT. J. E. MELVIN,
No. 38 Warren St.,
ROCKLAND, ME.

We GUARANTEE 6 Bottles to BENEFIT or CURE. You get help or get your money back. **WILL YOU TRY IT?**

THE DAILY EXAMINER

MAY 4, 1892.

Essay on Mussel Mud.

The subject of the essay is defined as follows:—Describe the effect of mussel mud on soils. In what quantities and under what conditions may it be applied? And how may the fertility of soils impoverished by its excessive use be restored most profitably?

In applying any substance to the soil for the purpose of improving its fertility, the first question to be asked is: of what does the substance consist? Mussel mud, so-called, when dug from the bed of a tidal river, appears to consist of a mass of oyster and other shells imbedded in a reddish grey mud. The shells on the top of the bed near the edge of the channel are sometimes found to contain living oysters, the tops of such beds being nearly or quite dry at low water. From this circumstance the inference has been drawn that these beds have been gradually built up by succeeding generations of oysters; the primeval oysters having attached themselves to some objects on what was then the bed of the river; these dying out and becoming buried in mud, the succeeding generation formed another layer on top of them until a height was reached at which they were dry at low water when the beds ceased to grow. Certain it is that the edge of the mussel or oyster bed next to the channel is sometimes of a depth of twenty feet, gradually lessening in depth as it approaches the shore. The old bed of the river below the shell mud generally consists of a tough blue clay, though sometimes of sand or rocks. The shells themselves are generally more or less decayed and broken up. The proportion of shell mixed with mud varies in different beds and in different rivers The mud which contains the largest proportion of shells is counted best for applying to rich, good soils, and that which consists largely of mud, with a less proportion of shell, is held to be the best for thin or poor soils.

As to what quantity of mud may be applied to the land with benefit, opinions differ. The amount usually applied varies from ten to thirty sleigh loads—the box of a sleigh usually measures about eight feet by three, with a depth of one foot, thus containing twenty-four cubic feet, and would probably weigh from fifteen to twenty hundred pounds of fresh dug mud. The favorite way of applying it is as a top dressing on potatoes, and either as a top dressing or lightly ploughed in for grain. When fresh mud is ploughed in with potato seed, or previous to planting them, it is considered to be apt to cause the crop to be affected with scab or dry rot, but by top-dressing this is avoided, while the process of harrowing and cultivating the potato crop mixes the mud with the soil and thus enables the succeeding crops of grain and hay to take the full benefit of the mud. A crop of wheat usually follows the potatoes, the grass seed for the following crop of hay being sown with the grain, and then two, three and sometimes four crops of hay are taken off the land, which is then pastured for a year or two and then is broken up for a crop of oats, succeeded by one of potatoes, followed by wheat and hay again, or by two successive crops of oats, succeeded by hay.

The samples of mussel mud taken from the tidal rivers of this Island that have hitherto been analysed, have been pronounced to contain a considerable quantity of carbonate af lime, and of but very little else that could be of any use in improving the fertility of the soil, so that unless something has been overlooked in the analysis, the carbonate of lime must alone be the cause of any benefit that has been derived from the application of mussel mud.

I may here say that the writer, in common with some others, expected a different result from that analysis: Judging from the effect of the application of mussel mud to the soil, differing as it does in some degree from the effects of the application of lime in the usual form, the writer and others with whom he has conversed were led to think that mussel mud must contain a considerable quantity of decayed animal or vegetable matter; it was also thought that the mud might be impregnated with some muriates or salts derived from the salt water under which it has lain for so long a period. One thing almost all who have used it agree in, that the effect of the mud is more durable than that of lime, the immediate effect is also greater. Take the growth of clover alone and I think that no one will dispute that such heavy and luxuriant crops of that plant have been grown on the Island on land to which mud had been applied as never have or could be grown without it. Taking the wheat crop again it is certain that thousands of acres of land on this Island that would not in a natural state grow wheat at all have, by the application of mussel mud, been made to yield good crops of that grain.

Lime has always been held to be a necessary constituent of all fertile soils. The soil of a country generally partakes of the nature of the rocks which underly it. The sandstone rocks of this Island containing little or no trace of lime, the soil of the Island, as might be expected, is in general of the same sandy nature, and is equally deficient in lime. Lime in various forms is a constituent part of most plants, and is of use in other ways: it causes sandy soil to become more inclined to absorb and retain moisture, and also to absorb oxygen gas from the atmosphere. The shells of oysters pounded up were formerly and are perhaps still applied to improve the soil in some parts of Ireland, while in England the calcarious or shelly sands of the sea-shore are in several places dug up from below high water mark and carried a considerable distance to be applied to the land. Marl also, which is a mixture of carbonate of lime and sand or clay, has been used in England from the time of the occupation of that country by the Romans up to the present time. Chalk also, which is nearly pure carbonate of lime, and is in fact ground-up shells, is much used in England both on sandy and on clay soils. The salt mud of the river Mersey is extensively used in Cheshire at the rate of twenty tons to the acre, and Dr. Holland says that the land thus manured not only gives a large produce of potatoes but is in an excellent state of preparation for a succeeding crop of either wheat or barley.

As to the impoverishment of the soil by the excessive use of mussel mud, I may perhaps be considered rash if I should say that I doubt the existence of any such state of things, but I hasten to admit that land often becomes or is brought to an impoverished state after mussel mud has been applied to it, as indeed it frequently was before the use of mud or lime became general on the Island by too frequent cropping without manure.

I will even go further and will allow that it may possibly be more quickly and more entirely impoverished after it has had mud or lime applied to it than if such mud or lime had never been used Lord Bacon says that he once heard a good husbandman say that it was a mistake to say (as was commonly done) that "chalk was good for corn but not for grass," the error being due to the fact that after chalking of the land they wear it out with many crops without rest, and then indeed afterwards it will bear little grass because the ground is tired out.

Now as to the excess. It has been calculated that the soil of an acre of land of the ordinary depth to which it is ploughed weighs about seven hundred tons. We do not plough so deep here as they do elsewhere, so say five hundred tons. Now, to five hundred tons of soil containing little or no lime, apply twenty loads of mussel mud of fifteen hundred pounds weight each, say twenty tons in all, of which probably less than half is carbonate of lime, and what harm can it do? Why, the rich soil of Parret in Somersetshire is estimated to contain seventy per cent. of carbonate of lime.

Land that has been impoverished by too frequent cropping can only be restored to fertility by restoring to it that which has been taken from it. A liberal application of stable manure, if it can be obtained, will help it. Bog mud, marsh mud, seaweed, or anything that will supply the elements of which it has been deprived, rest and pasturing it will improve it. But it is all uphill work, and it may be doubted whether land that has been badly run out can ever be made permanently fertile again. R.

General Telegraphic News.

OTTAWA, May 1.—The new steel steamer Curlew, for the government service in the Bay of Fundy, will be launched at Owen Sound on the 23rd inst. From all accounts she is a beauty.

TORONTO, May 1.—On Wednesday next there will be presented to the House of Commons and Senate two rolls each bearing the names of 18,000 women in every province in the Dominion excepting Manitoba. The petitions ask that women of the Dominion be accorded the same franchise in parliamentary elections as men enjoy.

TORONTO, May 1.—For the past week Edward Farrer, of the Globe, has been prowling round between Montreal and Quebec, and people suspected that some alleged sensation was near at hand. The mine exploded yesterday when the grit organ came out with the second instalment of the so-called Caron disclosures, consisting of the following receipts:—

Received from Hon T. McGreevy one thousand dollars for legal expenses county of Quebec. Adolphe P. Caron.

Please give Mr. H. B. Smith one hundred and fifty dollars for legal expenses for the county of Quebec. Adolphe P. Caron.
To. Hon. T. McGreevy, Quebec.

Received from Hon. T. McGreevy, two hundred and fifty dollars for legal expenses for the county of Quebec alone.
Adolphe P. Caron.

Received from Hon. Mr. McGreevy two (2) thousand dollars, Quebec 19, 2, 89.
Adolphe P. Caron.

Quebec, 26th Feb., '87.—Received from Hon Thomas McGreevy six hundred dollars for election purposes in St. Columbia district. A. Sharpless.

Dear McGreevy: Please give Mr. Tarte five hundred dollars. I shall explain.
Adolphe P. Caron.

Received the amount, J. I. Tarte.

Quebec County.—Received of Hall Bros. & Co., one hundred dollars.
Xavier Giroux, Quebec, Feb. 3rd, '87.

Received $200 account legal expenses Quebec county.
P. P. Hall, Jan. 12th, '87.

Please pay four hundred dollars legal expenses. County of Quebec.
Adolphe P. Caron.

Quebec, Feb. 17, '87.—Received from Hon. McGreevy five hundred dollars legal expenses of the county of Quebec.
Adolphe P. Caron.

Received two hundred dollars.
J. Israel Tarte.

Private, February 3rd, '87, Tarte and Hunt: Dear Mr. McGreevy—will you oblige me by giving Mr. Tarte what he will explain to you is required. A. P. C., 7th Feb., $1,000, (sgd.) Joseph Hamel.

Quebec, B, 1887.—My dear McGreevy! will you send me forty dollars by the bearer for St. Gabriel, county of Quebec, for the organization of your friend.
J Israel Tarte.

Received the sum of $40, E. N. Chinic, per J. I. Tarte.

MAKES FLESH AND BLOOD.—When the system is all run down and there seems to be no hope of obtaining nourishment for the body by the ordinary process of food supply and digestion, when the body is sinking fast, then is the time to use Miller's Emulsion of pure Norwegian Cod Liver Oil. It always works wonders, because it is a flesh and blood maker and contains all the constituents for nourishment found in wheat in fact, Miller's Emulsion is a perfect "staff of life," and has saved and cured thousands. In big bottles 50c. and $1 at Charlottetown drug stores.

SKODA'S DISCOVERY, the Great German-American Remedy for Heart, Nerves, Liver, Kidneys, Blood. Guarantee contract with every bottle. Pay only for the good you receive. At all Druggists, $1.00 per bottle, six bottles $5.50. If you want to know about SKODA'S REMEDIES, send postal for **"Morning Light."**

SHILOH'S CURE will immediately relieve croup, whooping cough and Bronchitis.—Reddin Bros. novldwly

LETTERS TO THE EDITOR.

The Check Rein

SIR,—Would you kindly permit me through your excellent paper, to say a word in favor of kindness to animals, especially in regard to check-reins on horses. I don't believe these good ladies and gentlemen I see every day driving around our streets, torturing one of their best friends by compelling him to keep his head in an unnatural position, are cruel or have any bad intentions whatever. The only reason I can give is that they have not thought much about it. Now, my object in undertaking to write (knowing that I am not at all equal to the task) is to try to draw out yourself or some one else who is capable. Some very good people have told me that the check-rein is not an instrument of torture. To such I would say try it on. If anyone would just fasten his own head back for half an hour I think that would settle the question in his mind There are many other forms of cruelty, but there seems to me to be less excuse for this than any other. Hoping that this feeble effort may benefit some horse, and at the same time be an indirect benefit to the driver, I am yours for mercy,
S. CHAMPION.

SKODA'S OINTMENT, the Great German Skin Cure, and finest Cosmetic made. Removes Blackheads, Pimples, etc., as if by magic. 3 oz. tubes in elegant cartons **50 cts.**

SYRUP of FIGS

ONE ENJOYS
Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation. Syrup of Figs is the only remedy of its kind ever produced, pleasing to the taste and acceptable to the stomach, prompt in its action and truly beneficial in its effects, prepared only from the most healthy and agreeable substances, its many excellent qualities commend it to all and have made it the most popular remedy known.
Syrup of Figs is for sale in 75c bottles by all leading druggists. Any reliable druggist who may not have it on hand will procure it promptly for any one who wishes to try it. Manufactured only by the
