Fresh Confidence Shown In U.S. Economic Future

NEW YORK, Nov. 23 (AP) - Fresh confidence in the United States economic future formed the Wall Street background last week for a series of records rung up by the market.

Never before this year has the stock market seen greater buying vigor than displayed last week.

Never before this year has the pace of business been so swift.

And never before in the last 22 years has the stock market pushed its way to such a high price peak as measured by the Associated Press average of 60 stocks.

Nobody could point a finger and say: "This was the cause for the rise in the stock market."

The cause was spread over a considerable area. Indicators pointed to better times ahead.

Price ceilings were suspended several products and several economic restrictions were eased.

The Associated Press average of 60 stocks gained \$2.60 on the week and at the close stood at \$110.10, highest since early June, 1930.

Volume knocked with the 2,000,000-share mark passed for the second and third times this year. The first time was the day after Eisenhower was elected.

Canadian issues were mixed at the week's close. Dome Mines and Distillers Seagram both dropped 1/4, and Canadian Pacific slipped 1/2. McIntyre was up 1/2 and Hiram Walker gained 1/4. International Nickel was not quoted.

On the curb, Giant Yellowknife advanced 1/4, Royaltite Oil fell off 3/4 and Lake Shore was not quoted.

Census Figures

OTTAWA, Nov. 23 (CP) - There are about 6,500,000 people under 25 in Canada and more than 5,500,000 or 87 per cent of them aren't married yet—at least they weren't in the summer of 1951.

The biggest percentage of the under-25 group are made up of those not ready for marriage yet, the children up to six and the school kids in the six-to-13 age group.

The Bureau of Statistics gave the figures Wednesday. They came from the final census figures on family composition taken in June last year.

The bureau said there were 5,441,779 unmarried sons and daughters under 25 living at home in Canada at June 2, 1951, out of a total of 6,397,330 persons in that age group in Canada at the time.

Then the bureau explained that children under six totaled 2,009,730 or 36.2 per cent of the total; children six to 13 numbered 1,981,360 or 35.7 per cent. The 14 to 17 year age group totalled 778,238 and the 18 to 24 age group 744,851.

Regionally British Columbia and Alberta showed the highest percentage of children in this age group at school with 50.9 and 50.8 respectively. Quebec and Ontario showed the highest percentage in the labor force — 53.3 per cent and 49 per cent respectively.

U. S. Steel

CLEVELAND, Nov. 23 (AP) - A slackening of steel demand which industry leaders looked for next quarter now appears unlikely until later in 1953, Steel magazine says today.

Defence production, good general business conditions and election of a Republican administration all are listed by the weekly Metalworking Magazine as factors contributing to a sustained demand for steel.

Not until inventories are restored will a substantial amount of pressure be listed, Steel says. That inventories are not filled, the magazine adds, is indicated by big consumers' heavy orders for warehouse steel. Big consumers usually buy all their steel supplies from mills and "if you are a mill buyer, you don't buy the higher-price warehouse steel to put in inventory — you buy it to sustain your production."

Last week was the seventh straight in which the national output of steel for ingots and castings topped 2,200,000 net tons, or 106 per cent of current capacity, Steel reports. That was up 1/2 per cent from the previous week.

Quality bars and forging billets of one-inch or more diameter are the tightest item of steel supply, and heavy plates are another much sought item, Steel says. Lack of business among jobbing foundries had eased demand for pig iron, and "wire mills too could use more business."

Bank of Montreal Annual Report

MONTREAL, Nov. 23 (CP) - The Bank of Montreal, in its 135th annual statement issued today, reports for the year ended Oct. 31 net profit of \$5,668,778, an increase of more than \$300,000 over 1951.

After depreciation, profits for the year stood at \$11,586,000, compared with \$10,356,000 in 1951. Shareholders received \$4,500,000 in dividends.

In addition to cash assets of \$395,000,000, liquid assets include government and other public securities at \$897,000,000, an increase of \$10,000,000 over the previous year.

Other bonds, debentures and stocks were \$10,000,000 less, at \$121,000,000, but call loans jumped \$20,000,000 to \$48,000,000.

Deposits also set a record at \$2,147,900,000, an increase of more than \$62,000,000 over the corresponding period of 1951.

Other bonds, debentures and stocks were \$10,000,000 less, at \$121,000,000, but call loans jumped \$20,000,000 to \$48,000,000.
