Ment's Introduces The Bar-B-Q

Ment's Restaurant is today introducing to the public the first and only commercial BAR-B-Q east of Montreal. In procuring this equipment Ment's has added to his lists of "firsts" in this Province. He has been:

- First with Quick Lunch
- First with Horseshoe Bar
- First with Open Kitchen
- First with all cooking with Propane Gas
- First with Electric Sterilizing Dish Washing.

The Bar-B-Q is made of stainless steel and is three feet wide and seven feet high. It stands in full view of the public and can be seen in operation at almost any time. It is a chain operated machine with electric motor and there are four birds to a stick. Twelve birds, beef or pork can be cooked at once. The stick rotates and the natural juices of meats, hams or chickens are re-

tained in the cooking.

Founded some 11 years ago Ment's Restaurant has earned a reputation down through years as a place of "good food", excellent accommodation for diners in its Turf Room and for luncheon has the ever popular Horseshoe Bar. The Bar-B-Q should be especially popular with patrons at this season for vacationists or cottagers can obtain a chicken, ready-to-serve for \$1.50. One may have no worries re unexpected guests nor hastily arranged picnic outings. Just contact Ment's and they will take care of the more arduous tasks of cooking.

All vegetables at Ment's are now cooked in pressure cookers thus retaining all the natural juices which provide the highest nutritional value.

The public is cordially invited to visit Ment's and inspect the Bar-B-Q.

MENT'S due for Double Congratulations. The installation of a BAR-B-Q and the continued serving for many years of top quality—
