

The Flip Side By Sean McQuaid

One interest that students might not know about is his love for music. "I love to sing," he said, "I am in the choir with the church." His favourite music is classical, and he likes most other types of music as well. The other hobby involves electronics. He is a short-wave radio operator. "I spend a lot of time talking to people around the world, mainly in morris code (dots and dashes)." It is through this hobby that he has made many friends which he hasn't got a chance to meet yet.

Professor Sweet is doing research in Linear Algebra, and his goal for the future is to continue doing his research as well as teaching and spending time with the family.

It was quite typical for Professor Sweet to say "Isn't this fun," or "Aren't we having a good time?"....until one of his students wrote to him and said "Don't say that because it is not fun at all!" Ever since then, he tried not to use too much of the phrases, "at least not when this student is around."

His last word of wisdom for today's struggling students are "don't get discourage easily. Find an area that you really enjoy, if you can find something that's interesting, then it is so much easier."
