Present with them Tuesday was their son Alva. Messages were received from their other sons, Merrill in Charlottetown and Randolph in New York.

Household Hints

If linen scorches during ironing, cut an onion in half and rub the flat side over the mark. Then soak the linen in cold water for several hours.

All this saves storage space and a utility of quads as well as time.

Some carpet colors show soiling less readily than others. Blues show soiling the least. Other colors that "conceal" dirt are the medium or darker shades of green, greenish blue, brown or beige.

ELLEN'S DIARY

Lamps Are Brought Out When Power Failure Looms

A wind, born of southern westerly winds, blew with about tonight's eaves. Gusting, and at times damp, it swept down, over the rim of hills, upon us here, bending the tops of the lawn-trees rudely, and pinning the overgrown willows in prairie-like attitudes.

Our lights flickered uncomfortably odd times. And in an interesting procedure for the younger children, come by wind-blown from the house

the lane, we took down, in the event of an interruption in the power, a kerosene lamp from his shelf — Time was remembered, when a rural housewife's stewardship could be adjudged by the glow of lamps on her kitchen shelf! If the chimneys shone like finest crystal, and the bowls had been replenished, say by mid-morning, she was indeed one who looked well to the ways of her household. Besides this, each was protected from any chance straying dust-motes, by inverted paper-bags, she was the perfect one for cleanliness! But if, on the other hand, her lamps were left in a neglected condition throughout the day, with no preparation made against dusk's shadows ahead, it was certainly no recommendation for her ability in the role that was hers. And alas and alack for the woman whose husband picked up his lantern in haste when the twilight called him to pieces of choring. If he found the glass smoky, and the container below, empty of oil!

"I trimmed the wick with an unforgetten touch this evening, before our little audience. And then when a match had been brought from an ancient tin box on a cupboard in the pantry, allowed one to strike it and touch the wick to flame. And saw the glow reflected in wondering young eyes."

"It doesn't give much light!" one commented.

"How could folks work by it —

er why?" another questioned.

And we told of a miss of the land's pioneer days, one of kin, who had pointed out to her several nieces, how extremely fortunate they were in their turn, to have adequate light from lamps, to light their schoolbooks.

It studied often by the glow of the hearthfire, and by that of the tall dip (candle!), the that had gone on to teach in Island schools, related. "And I recall more than once completing some assignment of homework by the light of a bonfire, feeling it with chips, to keep a light on my part."

Happily our lights kept to-night throughout the gale which by this has moderated. The Lady Moon sails now her glory on the highseas, through pretty ribbons of white cloud. Last thoughts before our pillow calls us to sleep will be to be grateful for the comparative calm now obtaining.

How lovely the sun kissed last week's fields and set diamond-glints in the wind — crested wavelets of the millstream! How charming those days!

"We just can't trust the weather now, Ellen!" James remarks, hanging up cap and jacket — come in now from a late tour of stables and piggeries, so to lend a better rest to his night!" But!" he smiles at the memory, "we've had some nice days."

Until tomorrow — — Diary-Good-night....
