THE ENGINEER'S BI-WEEKLY

The UPEI Engineering Society proudly announces the return of "View From the Top" - the class of our Student Union NEWspaper. In this, and all subsequent issues of the Engineer's Biweekly we will strive to bring you information, bulletins, and good humour. We also will be publishing bulletins on Society activities and individual accomplishments. (i.e. Angus Orford, our president, actually got a date recently.) This page

will try to incorporate Society activities as they happen, as well as humorous extracts from other publications mixed with only the most conservative Engineering type jokes.

Angus Orford, the fearless leader of our society, has chaired two society meetings already. Noted issues that were voted on and passed are 1) a committee to organize social events, 2) a committee to organize the arrangements

for pubs, 3) a committee to organize sporting events 4) a committee to recruit pale young females for social events, and 5) a committee to form all committees.

In sports, the Engineers are right in the thick of things. After giving the Soccer team a sound thrashing in softball, the team advanced to play lowly Blanchard. Over confidence befelled the guys, and despite a strong pitching performance the Engineers

bowed in defeat 13-7. The Engineers plan to bolster their lineup with a number of members from the virtually dormant first-year class, which should prove to be the big edge. Any of you little guys in first year who are interested in becoming associated with one of the powerhouses of UPEI Intramural sports, please contact Angus Orford in the third year room.

Prof: I say there, you in the auto - your tubular air container has lost its rotundity.

Artsie: What??

Prof: I said, the cylindrical apparatus which supports your vehicle is no longer symmetrical.

Artsie: Come Again??

Prof: The elastic fabric surrounding the circular frame whose successive revolutions bear you onward in space has not retained its pristine roundness.

Artsie: Say what??

Engineer: Hey, Buddy, you got a flat tire.

"GEEK of the WEEK"
4th Year Biology Major
PAUL ROBINSON

Paul, you will be pleased to note that your name is entered in "GEEK OF WEEK SWEEPSTAKES"

Optimist: A man who marries at the age of 90 and starts looking for a house near a school.

MEETING HELD

The UPEI Engineering Society Sexual Gratification Committee held its first meeting on Sept. 28. Erect member Bill Phillips chaired. Two issues were voted on. First, that the sexual gratification gratis policy be extended another year. Vote:

50 Yes

0 No

1 Abstention

(a freshman didn't know what was being discussed)

Second, that the general policy of betterment to the community be upheld by initiating a sperm bank for sterile business professors. And part two: a time between 12:00 - 3:00 a.m. that the Engineers would service the girlfriends of impotent biology students. Vote:

45 Yes

4 No (take too much time)

1 Abstention

(freshman).

Both issues were passed.

Special note to "Jim Fanning" - you reported that the "Selects", with none other than you leading the team, pounded the Engineers 18-3 in a game of 1fag football. However, the engineers should be congratulated

for scoring three points, considering not one of the Engineers even played in the game. In fact the Engineers aren't even in the league. By the way "Jim", do the letters F.O. mean anything to you?

Cranston Snord.
