

THE LEADING DAILY NEWSPAPER OF P. E. ISLAND. Is issued every afternoon, from the office of THE EXAMINER PUBLISHING COMPANY, in the London House Building, Queen Street.

NEW SERIES. CHARLOTTETOWN, P. E. ISLAND. THURSDAY, DECEMBER 14, 1893. VOL 33.—NO. 140

Palpitation of the Heart, Nervous Exhaustion and Stomach Trouble. My daughter, Mrs. Mars, has been suffering from the above diseases for years, and employed all the leading Physicians...

The Yost Typewriter.

THE NEW YOST the only Perfect Writing Machine. The Ribbon, the Shift Key and other antiquated devices discarded. NEW MACHINE, NEW MANAGEMENT, NEW PATENTS, NEW MEN, NEW LIFE, NEW BRAINS, NEW METHODS, NEW CAPITAL.

WHAT MUST GO?—Bad alignment, illegible work, foul ink ribbons, bothersome shift keys, double scales, etc., are no longer to be tolerated or pardoned. THE NEW YOST has abolished them, and no other can retain them and live. THE NEW YOST combines the life-long experience of the inventor, G. W. N. Yost, who invented the "Remington" in 1873, the "Citigroup" in 1880, and the "Yost" in 1889...

Send for Illustrated Catalogue to IRA CORNWALL, General Agent for the Maritime Provinces, 134 Prince William St., St. John. or to D. B. STEWART, Charlottetown.

"Shorter" Pastry and "Shorter" Bills.

We are talking about a "shortening" which will not cause indigestion. Those who "know a thing or two" about Cooking (Marion Harland among a host of others) are using COTTOLENE instead of lard. Not the least pure, healthful and cleanest ingredients go to make up Cottolene. Lard is healthy, and is not always clean. Those who use Cottolene will be healthier and wealthier than those who use lard—Healthier because they will get "shorter" bread; wealthier because they will get "shorter" grocery bills—for Cottolene costs no more than lard and goes twice as far—so it is half as expensive.

Dyspeptics delight in it! Physicians endorse it! Chefs praise it! Cooks extol it! Housewives welcome it! All live Crookers sell it!

MADE BY N. K. FAIRBANK & CO., Wellington and Ann Streets, MONTREAL.

GIRLS WHO ARE IN LOVE AND ESPECIALLY THE GIRL WHO IS DISPOSED TO BE JEALOUS.

Such a One is Very Wretched—The Problem and in Her Case as Discussed by a Social Philosopher and a Sympathetic Person. "I think that if some one were to offer a prize to the silliest girl it would be conferred on the young woman who is always afraid that some one else is going to capture the affections of her best young man."

"If there is one thing that a man can't endure it is a jealous woman. Her questions bother him, and when he tells her the honest truth she doesn't believe it, so he sneaks out of answering queries and goes to his room to brood in the best way he can. Sensible women take the girl who is jealous, because they say all women don't see through her eyes. They also say that there is a position, not an excuse for her, and that a jealous man is an angel compared with her."

"That all sounds very well," came from a genuinely kind of femininity who sat down on a little footstool, and who looked for all the world as if she didn't care whether school kept or not, as she said. "That sounds pretty very pretty. It's just the way a philosopher ought to talk. Just give it to the girl right and left, but at least let her have an opportunity to defend herself. You folks who aren't naturally jealous don't know anything about it at all, and the girl who is jealous does. Do you suppose she'd be jealous because she enjoys being jealous? Do you ever think how miserable and wretched and unhappy she is? You might just as well tell her: 'Now stop breathing, because you would be quite as easy for her to do to as to keep from entertaining jealous thoughts. And the worst part of it is she knows that she's a goose and she makes the biggest and stoutest resolutions that she simply won't be so silly, but you see it's no use. She hasn't anything to say about it.'"

"Both of you have been talking nonsense," declared the third person who is always supposed to be sensible and level-headed. "In the first place, one has to be in love to be jealous, and what is stupider than being in love I'd like to know? You can't tell me anything about it, because I had a little experience. And I've come to the conclusion—after considerable thought and mental arguments with myself—but if you want to be in love, you must be contented with the world in general you don't want to be in love. It's a bother. You can't eat, and when you do eat you don't get any pleasure out of it. You are a shelled crab or a tongue snail. You do all sorts of foolish things, like walking along the street with an idiotic grin on your face or raising three blocks past your getting-off place. If the man forgets to say just so many sweet things to you you get filled with fear and you wonder if he's found a handsomer girl. There is always something to worry you—something to explain or some silly quarrel to untangle. "It's all right, I suppose, for girls who have nothing to think about besides gowns and society's doings, but I haven't time to fool away in that kind of way. And the sensible third person gave a jerky nod and followed it up with an emphatic "That's so!"

Mr. Gladstone's Wonderful Energy. Among the old hands on the Treasury Bench, Mr. Gladstone has, of course, more than maintained his acknowledged supremacy—a supremacy by head and shoulders. It has, indeed, been a "Gladstone Session." In conducting the Home Rule Bill through committee he displayed almost a spirit of monopoly in regard to the speed-making. There was scarcely a clause, a line, or a word whose entire defence he would intrust to his lieutenants. Night after night he sat through long hours, answering every amendment in strings of little, dazzling, speechlets, soon breaking through the doctor's rule of retiring from the debate at nine o'clock, and at the end of the session more persistent in attendance than any of his colleagues. Never—never can say without fear of contradiction—has he reached to a higher level of sustained eloquence than during the session. When he takes his great speech on the first, second, and third readings of the Home Rule Bill, his hundred and one little constitutional discourses in committee, his innumerable displays of wit and argument in the personal combats with Mr. Chamberlain, and last, but not least, his many important speeches on open questions like the optium traffic and the eight hours day, he has shown the same unrivalled and unchallenged pre-eminence. This, indeed, is the great historical center of the session—the performance of Mr. Gladstone on the great stage at Westminster. — Westminster Gazette.

According to latest advices from Africa Major Forbes is in hot pursuit of Lobengula, and expects to capture him at once. King Lobengula is said to have fled to the interior. The cable has distinguished Forbes as the Matabele chief several times.

HUNDREDS of ladies in ill health have been or are being restored to health and strength by the use of Hawker's Tonic. It has become the great and popular family remedy.

THE SPICE OF SCIENCE.

NEWSY BUDGET FOR PRACTICAL MINDED PEOPLE. Montana's "Electric City"—How the Subtle Fluid has Supplanted Steam at Great Falls—Big Guns Now Made of Rawhide. Great Falls, Montana, appears fairly entitled to the distinction of being called the Electric City. At Black Eagle Falls, this county, about the town, an immense dam has been thrown across the Missouri, and hydraulic works and power houses erected. Not only are the streets lighted by electricity, but they are heated as well by electric radiators placed in each car. Elevators, printing presses, cranes and all kinds of machinery are operated by the ubiquitous force. There are automatic excavators, electric pumps and electric rock crushers. A most curious sight on the streets is a mortar mortar attached to an electric line, down from a pole. The mortar can be operated by electricity, the bit of wire to chop the substances and mortar, and the mortar to grind it up. And so likewise does the bit of wire to chop the substances and mortar, and the mortar to grind it up. And so likewise does the bit of wire to chop the substances and mortar, and the mortar to grind it up.

Its Chief Advantage is That it is Light and Easily Handled. A gun of rawhide is the invention of Frederick La Tulip, Sr., of Syracuse, N. Y. In general appearance it resembles an ordinary cannon and measures five feet six inches in length, six inches in diameter at the mouth and nine inches at the base. It consists of a central tube or bore of forged steel two and one-half inches in diameter. Around this tube are wound cemented coils of rawhide prepared by a process original with the inventor, and which is found by actual test to possess the strength of steel with a degree of resistance not inherent in this metal. An outer layer of steel wire completes the gun. The advantages of this gun are its light weight makes it readily handled, and it does not become heated by rapid or continuous firing.

BREAD DOUGH CHARGED WITH GAS. It is Said to Be Superior to Yeast, and Gets a Good Kicker. A number of inventors have been proposed to the Paris edition of The New York Herald, for the purpose of reproducing by chemicals the same action that yeast performs on bread dough. All of these propositions are based on the fact that an unstable chemical substance containing carbonic acid gas can be decomposed by being mixed with the dough, setting free carbonic acid gas and often another volatile substance. The same action as yeast, as in the case with the sesquicarbonate of ammonia. Another method is to add to the dough a salt from which the carbonic acid gas is evolved as itself, as in the case of, for instance, bicarbonate of soda and muriatic acid, or bicarbonate of soda, chloride of potassium and acetic acid, or, for instance, the bicarbonate of soda and tartaric acid. These, however, come under the head of adulterations, on account of the chemical substances that remain in the bread after the above-named reactions have taken place.

M. Villon has recently proposed that the mixture of flower, water and salt should be made in a closed apparatus, and that carbonic acid gas be obtained from the decomposition of a substance, a pressure of six kilograms per square centimetre should be maintained for an hour, and the dough stirred continuously, at the end of which time it can be made into loaves and put in the oven at once. It is claimed that bread made in this way is excellent, especially if to it are added the aromatic principles of ordinary bread, which can, it seems, be readily done. In any case, it is a very rapid process, and one that will probably furnish bread almost free from microbes, as the carbonic acid gas destroys the growth of them in the water and flour, which, on the other hand, are not contaminated by any yeast. This is an important matter, from a hygienic point of view.

Prevention of Diphtheria. A physician in a paper on diphtheria urges upon parents the importance of teaching children to gargle at an early age, and mentions the fact that during an epidemic of the disease in his city he taught his baby girl, only a little more than two years old, to gargle as well as her nine-year-old brother, and kept up the practice regularly three times a day throughout the prevalence of the disease. This is one of the small points in keeping with the tendency of the age, which is toward preparation and prevention rather than relief. None, perhaps, except physicians and nurses realize the obstacles which obstinate and spoiled children make of themselves in cases of illness. The helpless mother who stands by with her despairing "he won't take it and I can't make him," adds to the hopelessness of the situation. The child is not old enough to understand what is said to him is not too young to learn that he must do his share in the fight for recovery when sickness assails him. The same paper states that it is a noticeable fact that a much larger number of girls have diphtheria than boys, ascribing as a probable cause that girls, as a rule, spend more time indoors than boys, which should be another note of warning to mothers and cause them often to turn the girls out of doors after school hours than is done.

The Benefit of Good Stock. One of the principal advantages in having good stock is that with a little extra feed and care a much better gain can be secured and they can readily be made ready for market in a less time than scrubbed; and at this season this will be found quite an advantage. Whenever the hog or cattle are fully ready, sell. There is no possible advantage in feeding a day after they are ready for market.

How to Get a Sunlight Picture. Send 25 "Sunlight" Soap wrappers (wrappers bearing the words "Why Does a Woman Look Older Than a Man?") to Lever Bros., Ltd., 43 Scott St., Toronto, and you will receive by post a pretty picture, free from advertising, and well worth framing. This is an easy way to decorate your home. The soap is the best in the market and it will only cost 1c. postage to send in the wrappers, if you leave the ends open. Write your address carefully.

The Elections Are Approaching!

The subscriber does not offer as a candidate for political honors, but he does offer the best FURNITURE at the Lowest Prices. NEW FURNITURE arriving daily in all the latest styles, in addition to what we manufacture. Lot of Specialties offering low. We are in consequence having large sales.

JOHN NEWSON. NEW BRICK BUILDING ACROSS THE STREET. Please to look at our Stock in the New Store—the LARGEST and CHEAPEST in the City.

Raisins, Raisins, Raisins. Valencia, Layer Valencia, Bunch Dehesa, Black Basket, Imp. Cabinet, Sultanas, etc., by the Box, Half, Box, Layer or Pound.

Currants, Candied Peels, Essences, Spices, etc. EVERYTHING FOR THE XMAS TRADE. J. D. MACLEOD & CO., One Door North of the Old Stand, ROGERS' BUILDING, QUEEN STREET. Charlottetown, Dec. 9, 1893.—in this ad.

Platform Scales. Counter Scales. Disston's Crescent, Circular and Hand Saws. Barb and Combination Fence Wire. Iron, Sleigh Shoe and Caulk Steel. Horse Shoes, Horse Nails. English Coal Vases. Galvanized and Japanned Coal Hods.

FENNEL & CHANDLER. Branch Confectionery. I have opened a BRANCH CONFECTIONERY in the Store in the Stamper Block recently occupied by Mr. Theo. L. Chappelle of the Diamond Bookstore, where I will keep everything usually found in a first-class Confectionery. I am fitting up a new and improved Soda Fountain, which I will have in operation in a few days. I will keep only the best Fruits and the purest Confectionery.

W. A. HUTCHESON, Confectioner, STAMPER BLOCK, VICTORIA ROW. june 27—eod.

"You'll Feel Better" Everybody does, after taking a few bottles of MALTO PEPTONIZED PORTER. It builds up the run-down system, is strengthening and appetizing. It is readily borne by weak stomachs, regulates the bowels, and is invaluable to those afflicted with Indigestion and Flatulency. THE MALTO PEPTONIZED PORTER CO. LTD. TRURO, NOVA SCOTIA, CANADA. Highly Recommended by Physicians.

PERFECT MANHOOD!

How attained—how restored—how preserved. Ordinary works on Physiology will tell you the doctors can't, or won't; but all the same you wish to know. Your SEXUAL POWERS are the key to Life and its reproduction. Our book lays bare the truth. Every man who would regain strength, get lost through folly, or develop members weak by nature or wasted by disease, should write for our sealed book, "Perfect Manhood." No charge. Address (in confidence), ERIE MEDICAL CO., Buffalo, N.Y.

Unlike the Dutch Process No Alkalies. Other Chemicals are used in the preparation of W. BAKER & CO.'S Breakfast Cocoa which is absolutely pure and soluble. It has more than three times the strength of Cocoa made with Starch, Arrowroot, Sugar, and is far more economical, costing less than one cent a cup. It is delicious, nourishing, and easily digested. Sold by Grocers everywhere. W. BAKER & CO., Dorchester, Mass.

THE SOCIETY OF ARTS of Canada (Limited), MONTREAL. CAPITAL STOCK, - - \$100,000. A Society established with a view to disseminate the taste for arts, to encourage and help artists. Incorporated by Letters Patent of the Government of Canada, the 7th February, 1893.
