Private Plan Pensions Explained By Minister

OTTAWA (CP)—It's strictly up to employers and employees to decide how to integrate existing private plans with the now-proclaimed Canada Pension Plan, Health Minister LaMarsh said here.

"The government is not going to tell you what to do about your own situation," she said. "That is up to you."

She added the government's hope, however, that any employer-employee negotiations on the subject will embrace two basic principles—first, that no one will lose any pension rights acquired prior to the plan and, secondly, that no employee will be worse off under any new arrangement.

Miss LaMarsh, just back from a European tour to collect background on medical care plans, was speaking to a district conference of the International Chemical Workers Union (CLC).

It was her first major public statement on the government's attitude toward integration of the CPP with existing pension programs.

She stressed several times that there is nothing in the government plan, which will cover some 6,400,000 workers, requiring changes in private programs.

"This is the choice of those employers and employees who have company pension plans or up to the self-employed in the case of a private plan."

Within those bounds, three choices are open:

—If the existing private plan is a generous one, the Canada Pension Plan can be fully integrated into it with contributions and benefits reduced accordingly to leave overall levels relatively unchanged. This is the course being followed in regard to federal civil servants.

—The CPP can be "stacked" on top of the existing plan with the contributions—1.8 per cent of salary up to $5,000 by both employer and employee—added to existing payments to produce a commensurate rise in benefits.

—Present arrangements could be abandoned entirely in favor of the CPP alone. This will be a "pretty rare" case, but may be done with 30 or 40-year-old plans which now appear inadequate.

Miss LaMarsh said the question of integrating the CPP with existing plans is not entirely new, nor is it as difficult as has been pictured.

"It certainly requires a little work, but it can readily be accomplished."

The health minister said that, as an aid to solving this and other questions, her department shortly will launch a detailed and wide-spread information program on the CPP.

Federal Dept. Considers $1 Minimum Wage Under 17

By BEN WARD

OTTAWA (CP)—A minimum wage of $1 an hour for workers under the age of 17 is beeing proposed in labor department regulations under the new federal Labor Code.

The Labor Code was approved by Parliament in February and comes into effect July 1, applying to the handful of industries which come under federal jurisdiction.

It provides a $1.25 hourly minimum wage for workers 17 and over but leaves the wage of younger workers to department regulations.

The first bath of regulations has been drawn up by the department and has been sent to unions and employers for comment by a May 19 deadline. They still are in draft form and likely will be polished up to some extent before being enacted.

A section dealing with the younger workers sets out a $1 hourly minimum with a provision that the rate may be lower in cases where special training is provided to increase skills. Pay in these cases would be at rates established by the labor department for each individual case.

It also specifies that employees under 17 must not work between 11 p.m. and 6 a.m. and makes no provision for exemptions in special cases.

No youngster may be employed unless he has reached the minimum school-leaving age set by his province. This age varies between provinces.

SETS OVERTIME

The Labor Code itself sets out an eight-hour day and 40-hour week with a maximum eight hours overtime in a week. Extra overtime may be worked only under special permit from the labor department to cover a limited period. Overtime pay is time and one-half.

The regulations expand on the code's section that allows for averaging working hours over two or more weeks. They would permit any employer, on notifying the department, to average hours over a period not exceeding 13 weeks. However, overtime would be paid after 10 hours on any one day during the averaging period.

Firms that wish to average hours over a period beyond 13 weeks would have to make a special application, satisfying the department that the longer period is necessary.

The regulations also set a limit on the amount an employer may deduct from the minimum hourly wage for meals or lodging. It proposes 50 cents a meal and 60 cents a day for lodging.

Other sections allow for exemptions from the annual vacation section of the act that calls for two weeks with pay after one year or more of employment. If both the employer and employee request it, the vacation may be waived or postponed until a later year.

Also, a worker whose vacation period is set by the employer must be given at least two weeks' notice before the start of the vacation period.

Work Planned On Nuclear Power Station

CHALK RIVER, Ont. (CP)—Work is to begin early in July by a group of nuclear energy engineers and draftsmen on design of a new and more economical plant to generate electrical power from uranium.

Officials of Atomic Energy of Canada Ltd. said the design and development work may take several years to complete, but the new type of power plant promises to be much cheaper to build and to operate than plants now being built.

The new plant will use ordinary tap water in place of expensive heavy water in some of the process, eliminating the need for heat-exchange machinery and lowering the cost of plant construction.

Nuclear power stations now under construction at Kincardine and Pickering, Ont., use heavy water both as a moderating medium to control the fission of uranium, and as a coolant to take heat from the uranium reaction and transfer it to steam generators.

In the new plant, heavy water will continue to be used as the moderating medium, but ordinary water will be used as the coolant. Steam will be produced inside the nuclear reactor and run off directly to the power generators.

Officials said this will mean a considerable saving both in the volume of heavy water needed for power generating stations and the equipment installed. Heavy water to be produced at plants being constructed in Nova Scotia and Saskatchewan will cost $15 to $20 a pound.

Quebec To Cut Voting Age In Municipalities

QUEBEC (CP) — The Quebec government plans to extend the vote in municipal elections to all persons 18 years of age and over.

Pierre Laporte, the minister of municipal affairs, made the statement at a meeting of the legislature's private bills committee.

He said a general bill amending the law on cities and towns and the municipal code will be submitted to the legislature during the current session.

He said it would provide for application of universal suffrage for persons 18 and over in municipal elections throughout the province.

The committee was considering a bill that would amend the charter of Quebec City.

5-12

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X E
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

Opening lead—queen of clubs.

There is more to play of most hands than meets the eye. For example, take this hand where West led the queen of clubs, which held, continued with the jack, which also held. (East having played the 7-5), and then led a third club, which South ruffed.

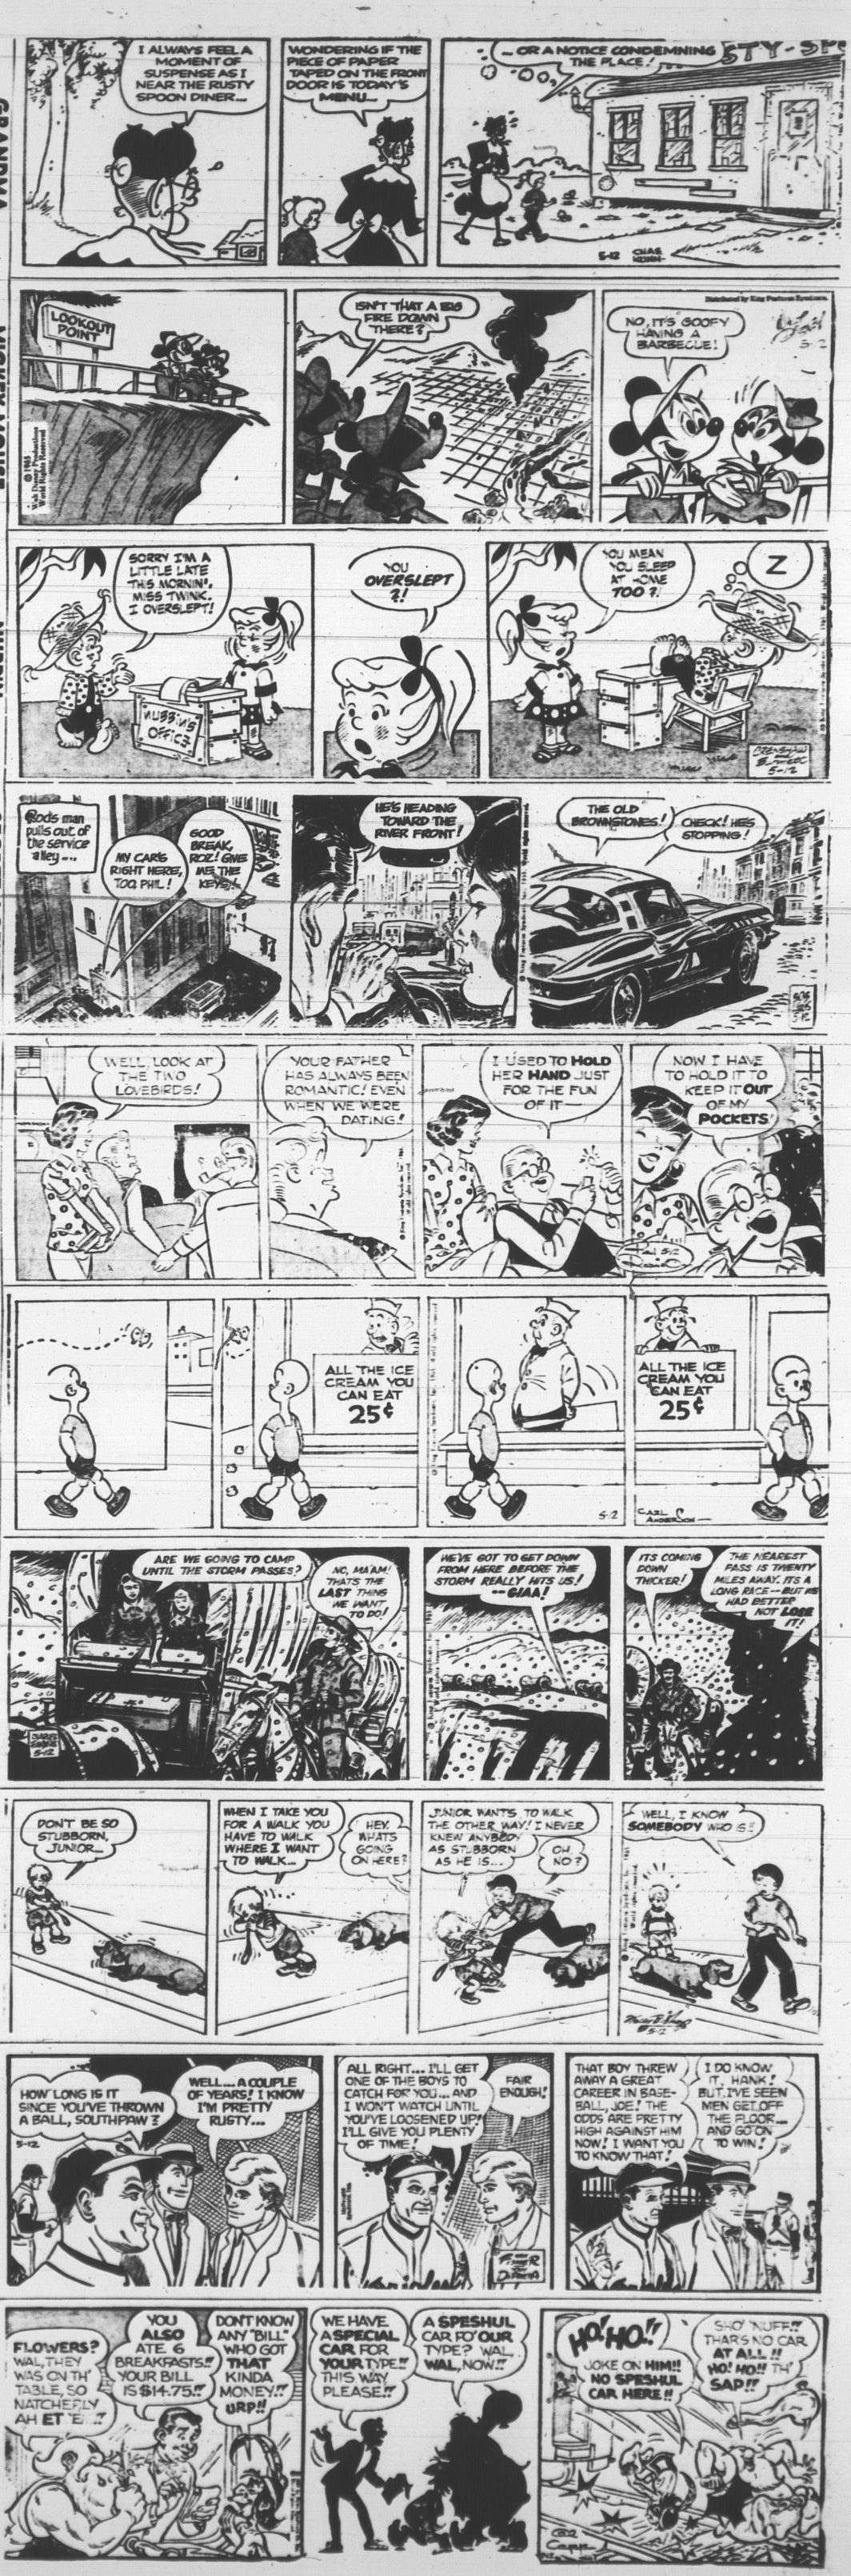
West's last play was wrong because he should have known that East had precisely the A-10 left and that declarer would ruff the third round of clubs. South could not have the 10-x-x of clubs or he would have covered the jack with the king. West should therefore have shifted to a spade at trick three.

After ruffing the club, declarer cashed the ace of hearts but then realized that it might be fatal to continue with the king if the hearts were not divided 2-2.

He therefore played the ten of hearts next, planning to win the expected spade return with the ace, cash the A-K of diamonds, ruff a diamond, and then cross to the jack of hearts in order to discard two spades on the Q-6 of diamonds.

This scheme would have worked all right, but, unfortunately, when East took the ten of hearts with the queen, he returned a heart to the jack. As a result of this play, South eventually had to lose a spade trick and go down one.

Of course, South could always have made the contract by taking a heart finesse, but there was no particular reason for assuming that East had three to the queen.

What declarer should have done was lead the ten of hearts at trick four instead of trick five. This play would have made with the queen but would be unwith the ueen but would be unable to make a damaging return.


Thus, if he returned a trump, South would win it in his hand, cash two diamonds and ruff a diamond, and then enter dummy with a trump to dispose of his spade loser.
