

A Feature For Every Friday

# Among The Farmers

## Federation of Agriculture News

### Crop Conditions

Still some harvest out. The splendid weather at present should see this phase of farm operations over by the end of this week.

In both ends of the province potato yields are general with reports of very good. However, prospect in general are for a good crop with damage from blight not so bad as expected.

In parts of the province, corn is still green. Most small pieces have the appearance of being planted too thick to produce a satisfactory growth of ears. Ten pounds of seed per acre is sufficient for silo purposes, and from fifteen to eighteen should be ample where the crop is to be fed directly.

### Federation Activities

The County Boards of Directors have been meeting to arrange for the annual meetings to be held at O'Leary, Charlottetown, and Morell in November.

The success of the County meetings will depend on the attendance and interest of the members in the school district meetings to be held on November 10th.

Plans are being made to promote Farm Forums as an educational medium in conjunction with Federation activities for the coming winter.

### Bill 82

A recent news release in reference to a decision of the Supreme Court of Nova Scotia gave the impression that marketing legislation might be involved. This, however, does not appear to be so. Each province has the right to legislate in regard to internal trade and the Dominion in respect to interprovincial and export trade.

No transfer of power is involved in Bill 82. For those who may be interested we quote the relevant section of Bill 82.

"The Governor in Council may by order grant authority to any Board or agency authorized under the law of any province to exercise powers of regulation in relation to the marketing of any agricultural product locally within the province; to regulate the marketing of such agricultural product outside the province in interprovincial and export trade and for such purposes to exercise all or any powers like the powers exercisable by such board or agency in relation to the marketing of such agricultural product locally within the province."

### Farmer Exchange Plan

The Canadian National Railway and the Canadian Federation of Agriculture are working at present on a joint plan to have a number of young Danish farmers spend a year of work and study on Canadian farms. The C.N.R. would arrange the selection and transportation of these young men and the C.F.A. would arrange to have them placed on suitable farms and see that conditions were satisfactory.

### Bacon and Beef

Two recent decisions of the Dominion Government are of importance to hog and beef raisers. But, the effects are likely to be very much different.

The decision to increase the subsidy on export bacon 1 1/2 cent per pound is an attempt to get more bacon for the British contract of

which only seventeen million pounds has been filled to date coupled with the holding up of a proposed increase in freight rates on livestock will all tend to make hog raising more profitable.

The freeing of the Canadian dollar will likely have the opposite effect on beef prices. Indeed, declines in beef prices have already taken place.

There has recently been in this province a decided switch from the breeding of dairy type cattle to beef. It would appear to be wisdom on the part of our farmers to consider carefully where this trend may lead, should beef prices become depressed.

When it comes to producing low price beef the west could give us a bad trimming. The breeding of dairy cows and heifers should be equally as profitably as the raising of steers.

In August Prince Edward Island marketed 4,535 hogs of which 2,462 graded A. Only three provinces sold more A hogs—Alberta, Ontario, and Quebec.

### Dairy Booth

The dairy booth at the Provincial Exhibition attracted much attention and apparently produced some results as indicated by a letter of inquiry from the Board of Trade in Haiti, W.I. They would apparently like to have some Island butter and cheese down there.

### Potato Prospects

Right now it is difficult to be optimistic about either the prospect for markets for potatoes or the prices either.

This year the United States has produced a surplus of at least one hundred million bushels. The result has been that American potatoes are selling in New York and Boston at prices that make it practically impossible to hurdle the tariffs and freight barriers and leave anything worthwhile for our potatoes.

There will probably be a demand for some seed but, not at high prices as the American grower, with his low returns, will endeavour to get his requirements as cheaply as possible.

We understand that the Potato Marketing Board plans on reviewing the situation with the proper officials at Ottawa in an attempt to improve the present difficult situation.

### Plowing Match

The success of the Plowing Match at Pownal yesterday indicates the possibility of developing public interest in the plowman's skill.

The management of the matches at both Dundas and Pownal deserve every encouragement in their endeavour to promote interest in the basic operation.

### Eggs and Poultry

At the present time egg prices are slightly lower than a year ago but the demand is good and for the next year prices should remain firm. Of the 388,000 cases put into storage the past season 200,000 have already been taken out and it does not appear that the balance would have any noticeable effect on the market.

Production was down in Canada, one million dozen in August and the domestic market appears capable of absorbing the supply for some time to come. Prices of dressed poultry are up eight cents a pound on chicken and five cents on fowl.

program. The Rally Day service in the morning was splendidly carried out by the scholars of the Sunday School, and the teachers and officers and all responsible for the success of the Rally and evening service are to be congratulated on the results of their work. After the evening service the visiting artists were pleasantly entertained at the home of Mrs. George MacBachern and Mr. and Mrs. Robertson.

POST NUPITAL RECEPTION.—A community reception was accorded on Friday evening, Sept. 29th, in the Pownal Hall, to Mr. and Mrs. Athol Buell on their return from their wedding trip to points on the mainland. The young couple, accompanied by the bridesmaid, Miss Joyce Jenkins and the groomsmen, Mr. Richard Brehaut, were ushered to the decorated platform as the wedding march was played by Mrs. Weir, Darrel Jenkins, Betty Grant as a juvenile bride and groom, and Judy Acorn as junior matron of honor, were special attendants conveying the pretty gift wagon, and this jaunty lad and his little companion provided a splendid introduction to the program. Mrs. George Lawton and Mrs. Walter Grant presided over the unwrapping of the shower of attractive and useful gifts and reading of the verses and good wishes. A number of other ladies assisted in this ceremony. Then followed the reading of an address to the young couple, by Miss Dorothy Innes, president of the Fownal Young People's Union, of which "Athol and Marion" are President and Secretary respectively. Miss Edna Robertson, on behalf of the society made the presentation of a very lovely blanket. A pleasant social time came next at which delicious refreshments were served. The newly married couple enjoy the warm friendship of the entire community which joins in extending to them sincere good wishes for happiness and prosperity.

# STRANGE BUT TRUE

Continued from page 3

The light caused by fireflies comes from within the body of the insect. It is a cold light and therefore could not set fire to anything.

Strange as it may seem, the crafty ants keep flocks of ophids from which they draw a sweet substance called honeydew. All an ant has to do to get this milk is to shake an ophid with its antennae. An Eskimo's sledge, his dogs, his canoe and his hunting knife are all the capital he requires to make him independent and free from all the restraints imposed upon most civilized races.

In Great Britain, wigs are still worn by Judges and barristers, a custom several hundred years old. All measurements are based on length, weight and time and a foot is a foot whether it is measured in Canada, or China, or Mexico, or Russia. The same is true regarding units of area and volume and time and some few other measurements. Sir Malcolm Campbell, British sportsman, attained the remarkable speed of 300 miles per hour in an automobile. Why is it always cold near the poles? Because they never receive direct rays from the sun, and have periods when no sunshine reaches their regions. Why is it that all plants turn their leaves to the sun. They do this in order to store up as much sunlight as possible, and the sunlight, together with the carbon dioxide taken from the air enables plants to manufacture food, etc.

Should Old Sol fail to make his appearance for a single year the result would spell "finis" to plant life, and several sunless years would bring about the complete extinction of most animal life. Mulberry trees are planted by man. Silk worms eat the leaves of these trees and spin threads of silk. "Old Bones", competed in 100 races and won fifty of them. This famous race-horse died Sept. 26, 1949, at the age of thirty years. Incidentally, he was the greatest race-horse in history.

## Prize-Winning Home Baker at Digby County Fair

"Mummy gets prizes at the fair!" What little girl wouldn't be proud of her mother's baking! And Mrs. Ralph Trimper, of Clementsvalle, N.S., knows what it takes to keep your name popping up among the winners each year. "Sure it takes a lot of practice to make the finest home baking," says Mrs. Trimper. "But more than that, it takes the finest ingredients, too. For buns and rolls

and bread you need a good lively yeast or your results won't be up to snuff. I myself use Fleischmann's Yeast because I know I can depend on it for finest results." No getting away from it! When it comes to yeast baking, the majority of prize-winning cooks choose Fleischmann's Yeast—proved dependable for 83 years!
