

THE DAILY EXAMINER

AUGUST 8, 1893.

USE OF SEWAGE.

A MOVEMENT is taking place in England which is worthy the attention of citizens of Charlottetown and their representatives in the City Council. The committee of the British House of Commons has just sanctioned a bill empowering the local board of a considerable English town to acquire fifty-one acres of land for the purpose of a sewage farm.

NEWS NOTES.

The army worm has been ravaging the grain in Minnesota. The depression of the silver market has given a decided impetus to gold mining in Utah and Nevada. The Russian Government is closing all schools in the south of Russia on account of the prevalence of cholera.

EATEN BY A SHARK.

Father Laplante Meets a Horrible Death While Bathing. News has been received at Quebec of the horrible death of a French-Canadian priest in the West Indies. The unfortunate clergyman was the Rev. Mr. Laplante, formerly professor of music and drawing at the Lewis College, Quebec.

PERSONAL.

Rev. Hedley Balderston, son of Hon. John Balderston, three years a missionary at Singapore, returned last evening. He is recovering from the effects of malarial fever. A number of guests were entertained at dinner at Government House on Monday evening.

SEASONABLE

Preserve Kettles, Refrigerators, Ice Freezers, Screen Wire, Nash's Scythes, American Rakes, Machine Oils, Binder Twine, Paints and Oils, Fence Wire, AT LOWEST PRICES. Fennell & Chandler, VICTORIA ROW.

TELEGRAPHIC.

Excitement Among the Conservative Members. LONDON, Aug. 8. There was considerable excitement among the Conservative members at the opening, yesterday, of the session of the House of Commons. The report stage of the Home Rule Bill was reached at an earlier hour than was expected.

As Usual, previous to close of Summer Season, JAMES PATON & CO. have made considerable Reductions on Millinery, Mantles, Dress Materials, Carpets, Curtains and Readymade Clothing.

NOTES AND COMMENTS.

The Empire expresses the hope that when Mr. Laurier visits Toronto "he will be accompanied by J. Israel Tarte." No doubt the people of Toronto would like to hear the Liberal Leader's lieutenant expand his views upon the Manitoba School question.

The Toronto Globe's financial columns recently contained the following: "The movement in staples for the fall trade is increasing, and from present prospects there is every reason to anticipate a prosperous business during the next few months."

The Ottawa Citizen contains an appreciative notice of the late Senator Montgomery. It says: "When Parliament next assembles at the National Capital, there will be a genuine feeling of regret within the precincts of the Chamber over the absence from his accustomed seat of one who, by his pleasant manner and true and kindly nature, had won the good opinion of all classes."

AMMONIA.

In the mechanical world AMMONIA is of great use. Its alkaline effects make it very valuable for the coarser sort of scouring and cleansing. Some manufacturers of Baking Powder resort to it the most frequently and recklessly.

A Miraculous Case.

MONTREAL, Aug. 8. It is claimed that George Daigle, of St. Street, who had been unable to walk for some months, has been entirely cured through the intercession of St. Anne de Beaupre. The story is that Daigle had to be carried to the communion rail, after which he rose to his feet and walked out of church.

SCOTTISH GATHERING, 1893.

The Annual Scottish Gathering of the Clans of P. E. Island, under the auspices of the Caledonian Club, will be held on the SOURIS EAST DRIVING PARK, ON Wednesday, 16th of August Next.

Meeting of Congress.

WASHINGTON, Aug. 8. Congress assembled at noon. In the House of Representatives, Crisp, of Georgia (Democrat) was elected Speaker, receiving 224 votes. Mr. Reed, of Maine, (Republican) got 122 votes, and Mr. Simpson, of Kansas, 9.

THE NEW BATTLESHIPS.

The latest of the new British line of battleships, the Resolution and her sister ship, Revenge, is also practically complete for service. The Resolution is forty feet longer, five feet broader, and has 3600 tons more displacement than the ill-fated Victoria. She is built entirely of steel, and her hull is divided into 220 watertight compartments. There is a double bottom extending throughout the engine room, boiler and main magazine space. The engine and boilers are separated by longitudinal bulkheads, extending the whole length of the magazine space. The boats of which there are twenty-one, including two fifty-six foot torpedo boats, are stowed amidships. The barbettes project through the upper deck a few feet, and the four six inch guns on the main deck are placed in casemates, protected by armor-plates six inches thick. Four 67-ton breech-loading guns constitute the main armament, and there are also ten six-inch 180-pounder quick-firing guns, 9 3-pounder quick-firing guns, two 24-inch 120-ton field guns, eight forty-five inch five-barrelled guns, and seven torpedo-tubes, four on the outside, one at the stern and two submerged. The total weight of the main armament is 1,410 tons, and the weight of the auxiliary armament is 500 tons. When used as a flag-ship, the Resolution will have a complement of over 700 officers and men.

The boats of which there are twenty-one, including two fifty-six foot torpedo boats, are stowed amidships. The barbettes project through the upper deck a few feet, and the four six inch guns on the main deck are placed in casemates, protected by armor-plates six inches thick. Four 67-ton breech-loading guns constitute the main armament, and there are also ten six-inch 180-pounder quick-firing guns, 9 3-pounder quick-firing guns, two 24-inch 120-ton field guns, eight forty-five inch five-barrelled guns, and seven torpedo-tubes, four on the outside, one at the stern and two submerged. The total weight of the main armament is 1,410 tons, and the weight of the auxiliary armament is 500 tons. When used as a flag-ship, the Resolution will have a complement of over 700 officers and men.

THE NEW BATTLESHIPS.

The latest of the new British line of battleships, the Resolution and her sister ship, Revenge, is also practically complete for service. The Resolution is forty feet longer, five feet broader, and has 3600 tons more displacement than the ill-fated Victoria. She is built entirely of steel, and her hull is divided into 220 watertight compartments. There is a double bottom extending throughout the engine room, boiler and main magazine space. The engine and boilers are separated by longitudinal bulkheads, extending the whole length of the magazine space.
