Alberta oil has changed his future

The boy doesn't know it yet. Many a grown-up doesn't realize it—but the new oil fields of Alberta brighten Canada's future.

Western oil is saving 100 million scarce U.S. dollars this year, dollars we don't have to pay out for oil imports. This means money to buy other imports we need—things that cannot be grown or made in Canada. Next year Alberta oil should save 145 million U.S. dollars!

Then, too, the search for oil is making a big new market in Alberta for things the rest of Canada has to sell. The oil industry is spending \$3 millions a week in the west. Across the nation this money is fostering new industries, expanding plants, creating jobs, paying wages, building homes.

And in the prairies petroleum product prices are lower than they would have been if oil had not been found. Prairie consumers saved more than \$30 millions last year. Anything that helps prairie prosperity helps all Canada.

Oil is important to us all. More oil means a higher standard of living.

The search for oil is unending, a costly business, often disappointing. But the job is pressing forward. And new-found oil is changing our future... promising a better, brighter future for Canadians—man and boy alike!

Bringing you oil is a big job... and a costly one

About Canada's Oil—At the end of 1949 potential oil production in Alberta was more than one-third of Canada's requirements. Three years earlier, Canada produced less than one-tenth of the oil she used.

More than 240 companies and syndicates are searching for or producing oil in western Canada.

It is estimated that the oil industry will account for almost 10 per cent. of all new business capital invested in Canada this year.

In 1949 Imperial Oil bought a total of nearly \$40 millions of equipment and supplies from more than 3,000 Canadian firms.

IMPERIAL OIL LIMITED
