"Every true Minister bears a resemblance to the pattern given to us by the great apostle St. Paul," said Rev. Donald Nicholson, Moderator of the Presbytery of P. E. Island, at a largely attended memorial service for the late Rev. G. Carlyle Webster in Zion Presbyterian Church last evening. "No one is better qualified than the congregation of this church, to recall with gratitude the qualities which marked the late Mr. Webster and identified him as one who had a real love for Christ in his heart," Mr. Nicholson continued, "his labours, the watching for souls, the discouragements and finally the longing for labours' end and his eternal home, followed the pattern with which we are all familiar."

At Least 1,000 Blood Donors Needed This Week

With the arrival of the Mobile Red Cross blood donor team from Halifax last evening, the third and final series of clinics for 1935 will get underway in the province today with a minimum objective of 1,000 donors for the four-day period. For several weeks now very active committees in each of the seven centres in which clinics are to be held have been making plans and putting forth great effort to recruit a sufficient number of donors to at least reach, if not exceed, the province's objective. Today's clinics are to be held at Morell this afternoon and at Souris this evening. Tomorrow the Charlottetown Armouries will be the centre of activity when residents of Charlottetown and vicinity will have the opportunity of contributing their share towards the Island's blood requirements which average in the vicinity of 200 bottles per month. On Wednesday, Mount Stewart and North Rustico will have clinics and on Thursday, Long Creek and Summerside.

The fact that this province has, in the past, produced barely enough blood donations to meet the requirements of patients in our own hospitals points up the necessity for increased attendances to meet not only the ordinary needs but to help with the latest demand to provide the blood with which to fight polio. It should be understood in connection with this demand that the Canadian Red Cross Society is acting as the collecting agency only for the blood with which to manufacture gamma globulin, the distributing of this gamma globulin will be the function of Provincial Government authorities appointed by the Dept. of National Health and Welfare.

The Great Morton Opens Engagement Here This Evening

Commencing at the Prince of Wales College Hall tonight is the Great Morton, an amazing entertainer from the land "Down Under". Recognized throughout the English-speaking world as one of the greatest living Hypnotists, he also specializes in demonstrations of Mesmerism—a sister science to Hypnotism—and fantastic feats of Psychometry and Memory. The appearance here of the renowned Hypnotist is sponsored by the Centennial Y's Men's Club. The Great Morton is claimed by the press as one of the world's most versatile and entertaining showmen and has, on his recent world tour, had astoundingly successful record-breaking seasons everywhere. In Western Canada he broke all-time records everywhere, including Vancouver, with his really unusual and intriguing presentations. In his shows, the Great Morton, billed as the best in his line in the world, calls for volunteers, uses no gestures but induces them to go to sleep after explaining he will do nothing to embarrass them.

Hilariously Funny

The things they do, however—clean and aboveboard—are hilariously funny and enjoyed by the audience. He also features super shooting—such as splitting a playing card endwise and picking cigarette ends out of the mouths of assistants—gives demonstrations of amazing mental and memory powers and psychometry—deduction, perception and observation.

In Halifax the press the day after his first show reported: "The Great Morton took Halifax by storm last night—and he was every bit as good as his advance notices billed him."

As a unique demonstration of hypnosis prior to his appearance at Prince of Wales College, a local person (a volunteer) will be hypnotized by the Great Morton in Holman's window, Charlottetown, and will sleep on for many hours, like the "Sleeping Beauty" of old, until awakened, on stage, at the College, by a kiss from "Prince Charming"—a prominent public official. The "Sleeping Beauty" will be a beautiful Charlottetown girl and will be, incidentally, hypnotized by the Great Morton by radio.

Prior to coming to Canada, Dr. Morton spent a year in Hollywood appearing with great success on television, radio and stage, and also as a technical advisor on several films dealing with Hypnotism. Whilst there, he was a lecturing Professor at the Los Angeles Institute of Hypnototherapy, instructing members of the medical and dental professions in the science of Hypnosis, as applied therapeutically.
