

IN MEMORIAM

GARNHUM — Mr. James Garnhum who passed away June 27, 1951. He bade no one his last farewell. He said good-bye to none. The heavenly gates were opened. A loving voice said, Come. We often sit and think of you. The things you used to say: We wonder why you had to die. With no chance to say good-bye. Sadly missed by his daughter Dorothy.

GARNHUM — In loving memory of my dear husband, James H. Garnhum who passed away June 27, 1951. This month recalls sad memories. Of a loved one gone to rest. And those who think of him today. Are the ones that loved him best. Ever remembered by his wife, May.

PAYNTER — In loving memory of my husband and father John B. Paynter, who passed away June 27, 1957. Treasured memories are all we have left. Of a dear father we shall never forget. His chair is vacant in the home. No one will ever fill. Ever remembered by wife, sons, daughters - in-law, and grandchildren.

ADAMS — In loving memory of our dear son and brother Wendell Garth Adams drowned June 27, 1955. Dearest son and brother how we miss you. As these dawn another year. In the lonely hours of thinking. Thoughts of you are ever dear. Lovingly remembered by parents, brothers and sister.

I wish to express my sincere thanks to Dr. Theriault, Fr. Phalen, to the Sisters and Nurses, of the Charlottetown Hospital. To all who sent cards, letters, treats, and who visited me while a patient there. Also to the C.N.R. employees for their kind remembrance. To one and all my sincere thanks. Charles C. McCarville.

I wish to thank Dr. S. Murchison, Laidlaw, Putman and Prowse, Miss Tweedy, special nurses and staff for their kindness to me while a patient in the P. E. Island Hospital, also the clergy who visited me and to all who sent treats, cards, letters and flowers.

Mrs. Brenton Dollar, New Wiltshire. The family of the late Eugene J. Dunn, Montague, wish to express their thanks to the doctors, nurses and clergy of the Charlottetown Hospital and the Montague Memorial Hospital, to all kind friends, neighbors, and relatives during our recent sad bereavement and also to all who sent mass cards and messages of sympathy.

AMONG THE FARMERS

Federation of Agriculture Newsletter

FAMILY FARM Traditionally farming has been a family business and in many countries a great deal of effort has gone into preserving it as the basic unit in agriculture. Until the greater development of commercial farming as opposed to the subsistence type there were very few farms other than the family kind. In spite of the fact, and nearly everyone agrees upon it, the worth and importance of the family farm there may still not be a really clear understanding of what the definition is. Last week in Quebec City a group of economists and social scientists devoted considerable study to the problems and future of Canadian farms and among other things agreed that the 'Family Farm' has the following characteristics:

1. Management; 2. Capital risk; 3. Labour; b. Tenure is secure; c. Residence may be off or on the farm. In addition to the above there is a question of adequacy. Adequacy suggests that the net returns must be sufficient to provide the family with a standard of living accepted or recognized by the majority of people living in a surrounding rural or urban area. However, it was fully recognized that the standard of living would depend first upon sufficient productive resources and secondly upon satisfactory management.

THE SMALL FARM Rapid changes in agriculture have created very pressing problems for the small or large in terms of acres. However, there are other factors such as management, capital, labour, availability of markets and crops grown. For instance, a ten-acre truck garden farm can be a larger operation than a 500-acre grain farm. The second important item is the proposed meeting of potato growers to receive the report of the nominating committee which was appointed by the general meeting held almost two months ago. This committee has met a number of times and it is understood has a suggested slate of officers for the proposed organization and possibly some recommendations to make on other matters as well.

When this meeting is held it should be well attended. Events of the last few weeks have demonstrated the importance of having a functioning potato organization which represents the industry. In addition there appears to be quite general agreement that a potato marketing board operating under legislation and with the authority to collect funds is also a necessary piece of potato equipment in this province.

Potato growers should note that the mass potato meeting which was planned for Friday, June 27 has now been postponed to Wednesday, July 2. This change was made necessary due to other conflicting gatherings. However, the purpose of the meeting is the same and the importance of attending just as great.

NEW PROCESSING PLANT The opening of the new processed foods plant at Sherwood provides this Province with a very modern and very valuable piece of processing equipment. Corps which formerly could only be used locally in a fresh state may now be processed in a manner which will make them marketable over the entire year. The increased production of these crops will broaden the base of agriculture, increase gross farm income and provide additional employment. Those who had the opportunity of being conducted through the plant could not fail but to be impressed with the very complicated nature of the equipment

considering referred to above in definition that the most satisfactory definition for the small farm would be one where the resource in agricultural activity are in adequate to permit a scale of operation which will normally provide a standard of living satisfactory to the operator and his family. Small farms may be divided into a number of classifications for instance they may be residential-the family lives there but there is very little commercial farming activity. 'Part Time' farms are ones in where less than 2-3 of the operator's labor is spent on the farm and more than 50 per cent of the total income is derived from sources outside the farm. 'Full Time' farm has been one which supplies 50 per cent of the total income and utilizes 2-3 or more of the operator's labour.

Two matters of vital interest to potato growers are now in the news, first is the offer by the Dominion Government of assistance on surplus potatoes. Reaction to this offer on the part of producers is difficult to assess. Certainly it is an improvement on the original 30 cent. Associated with accepting the proposal is the problem of administration which involves visiting farms, establishing the quantity of potatoes, their condition and grade and carrying out the accounting relating to settlement.

and with the impressive structure in which it is housed. All sections of our economy will look forward with very keen interest to the successful and expanding operation of this plant.

FIFTY YEARS AGO Fifty years is only a wink in the long glance of time but even this province which traditionally, as do most islands, resist changes has some remarkable contrasts. In 1908 Alexander Graham Bell had come as a visitor to the province after being advised that he should leave his automobile at home. The famous inventor was not greatly concerned and expressed the opinion that the automobile was merely a passing phase and that the airplane was the vehicle of the future.

The enterprising merchants of Charlottetown were offering enamelled beds with brass trim \$2.50 and up, overalls at 69 cent, corsets at the same price, and ladies undersuits at 12 cent made it possible for both father and mother to be modestly and in expensively attired. Herring by the barrel at 5 cent per pound, butter at 25 cent a pound insured that the cost-of-living index was not out of line. Rural schools were advertising a generous supplement at \$30.00.

The end of the world was predicted for October. However on the 26th of that month Laurier annihilated the Tory party which was reported to have been buried much as Pharaoh in the waters of the Red Sea. A provincial election campaign was in the offering and the government was being charged with increasing the public debt at the unheard rate of \$3,100 a year. Perry had started for the North Pole and harvest excursions had strated from the Maritimes enlivening the long journey by the destruction of villages, taverns and hotels along the way.

People were being drowned and the postmistress in Montague burned to death, 62 persons had been killed in the United States by the automobile and an aroused public was demanding protective action. True, the changes have been great and in the events of 1908 can be seen some of the developing problems which are of serious concern at the present time.

When this meeting is held it should be well attended. Events of the last few weeks have demonstrated the importance of having a functioning potato organization which represents the industry. In addition there appears to be quite general agreement that a potato marketing board operating under legislation and with the authority to collect funds is also a necessary piece of potato equipment in this province.
