"ENGINEERS DO IT WITH PRECISION"

ENGINEERING SOCIETY NEWS

Constitution

On October 26/92 most of Canada voted "no" to the Charlottetown Accord. P.E.I., however, voted "yes". Was there something Islanders knew that the rest of Canada didn't? We spent hours trying to find the answer, and after searching through the fine print of the Accord, we found some startling Constitutional amendments that may have tilted the scales to a "yes" vote on P.E.I.

-All official government documents must have the logo of a beaver with a hockey stick on the top left hand corner to make it official.

-All senators must retire before rigor mortis sets in.

-Canadian University tuition will be based upon National rankings ... lower rankings means lower tuition.

-Foreign aid policy will be abolished. All aid going to whining foreign countries will be given to needy Canadian provinces.

-Canada will become trilingual.. All signs will be written in English, French and Newfie.

-The number of seats held in parliament per province is determined by amount of BEvERages drank per capita.

-The coach of the winning Stanley Cup team becomes the Prime Minister for a year.

TOP TEN REASONS TO DATE AN ENGINEER

10. Extremely Good Looking
9. High Starting Salary
8. Free Body Diagrams
7. Looks good on a Resume
6. Can Calculate Head Pressure
5. We do it with Precision
4. Can easily apply the Stiffness Method
3. We know how to handle stress and strain in our relationship
2. Find out what those other buttons on your calculator do
1. The world does revolve around us ... We pick the coordinating system

Engineering Quote of the Week:

He who laughs last is an arisie who didn't get the joke.

Aha! You're one of those feminist pinkos, huh? Well I'll show you who's superior... I'll break your neck like a toothpick... I'll squeeze you like a tube of toothpaste.
