and especially the insurrection in Crete." The writer of the article in question also makes the startling announcement that in the next session of Parliament Lord Derby will ask for a vote of 20 millions for the naval and military defences of England. The Paris correspondent of the *Morning Post* says that the report thus put in circulation is not generally believed in that city.

The *Daily Telegraph*, which was the first journal to announce the serious illness of Count Bismark, says that the complaint from which that Minister is suffering assumes the form of swelling in the blood-vessels of the head. His physicians have prescribed absolute rest as affording the only chance of recovery.

Napoleon is taking measures to enable him to muster an army of 1,100,000 men, should he require it.

WRECKS ON THE BRITISH ISLES.—The Wreck Register of the British Isles during the last year shows the number of casualties to have been 1656, of which 354 befel colliers. Of the whole number 540 resulted in total loss, and the remainder in partial damage, more or less serious. It is somewhat remarkable that while 470 total losses took place from causes other than collisions, 845 were caused by stress of weather, 99 were caused by inattention, 38 arose from the ship or her equipments being defective, and 30 vessels foundered from unseaworthiness. So, again, of the 832 partial losses caused otherwise than by collisions, 137 are reported to have been the result of carelessness, 48 were owing to defects in the ship, and the remainder from causes believed to have been preventible. During the last ten years 423 vessels have foundered on our coasts from unseaworthiness, and with these have perished property worth a million of money and hundreds of human lives.

A Dublin correspondent of a New York paper say:—The number of Irish emigrants of the agricultural and laboring classes to America who are returning to their native land is daily increasing. This is by no means attributable to Fenian influence, as no doubt some will have it. Probably the state of things at the other side of the Atlantic was not found to be such as was expected by those, the majority of whom went out with exaggerated ideas of the fortunes which are easily to be made in America. Here at home laborers' wages are looking up. During the harvest women engaged in the fields have been paid two shillings and sixpence a day, and in addition, have received their diet; and at Waterford, the quay porters, who heretofore were paid five shillings a day, are now in the receipt of seven shillings a day, which, it has been truly remarked, is more than many men of education and industry are able to secure.

GREAT FIRE IN QUEBEC.

WE learn that, by a telegram received at McNeill's Reading Room this morning, a disastrous fire has occurred at Quebec, destroying the immense number of *fifteen hundred houses*. The telegram does not state when the fire broke out, but as we have mail papers as late as Saturday from St. John and Halifax, which do not say anything respecting the matter, the presumption is that the fire occurred yesterday. We will, of course, give the details of this great disaster in our next No., if they should come to hand in time for the purpose.

TO CORRESPONDENTS.

THE communication of "Enquirer," respecting an alleged attempt to corrupt by bribery one of the Prince Edward Island Delegates, while at the Quebec Conference—has been received, and will receive careful Consideration.

The verses describing the doleful fate of Vericuse Vose, are full of humour, after the style of the Ingoldsby Legends. We trust to be able to give a place to them in an early No.

WE give the place of honour, in our editorial columns, to an interesting communication respecting the Cape Breton Mines, kindly prepared by a most intelligent correspondent, at our request. His Excellency the Lieut. Governor recently visited those Mines; and we believe he was, like all other strangers, very deeply impressed with the vast importance of the mineral wealth which they exhibit. As there is a probability of our being brought into closer political relations with Cape Breton and Nova Scotia than now exist between us, we considered the occasion of His Excellency's visit very suitable for soliciting the information touching the money value of the connection we may soon be expected to form, and to which we are indebted for the communication referred to.

WE cheerfully give a prominent place in our editorial department to an interesting communication from a gentleman—a native of this Island, we believe—who was lately an officer in the American Federal Army, who had seen many of the stormy conflicts of the late civil war, and who is now enjoying some reward for his gallant devotion to the interests of the Union by holding an office under the Washington Government. Our gallant friend is no less able to wield a pen than a sword, as our readers will perceive; and they will rejoice with us that he promises to communicate with us, occasionally, on American public affairs, from the stand point which he occupies at Washington.

LATE AND DISTRESSING NEWS FROM NEWFOUNDLAND.

The Halifax *British Colonist*, of the 9th inst., noticing the arrival of the Mail Steamer *Delta* from St. John's, N. F., gives the following gloomy picture of the state of affairs in the sister Island Colony:—

Distressing intelligence comes from Newfoundland. The failure of the potatoe crop and the disastrous fishery of the past season foreshadows a very unpleasant state of things during the ensuing winter. Utter misery stares the fishing population in the face, and the only quarter to which they can look for assistance is the Government, with such aid as the charitable societies in existence may have at their disposal. Contemplating this state of affairs, the editor of one of the local papers remarks:—

"Men may resist change if they will; but some radical change must take place before the circumstances of the country can be improved. The credit and pauper systems have done their work so effectually, that it is hopeless to expect that they will ever be voluntarily abandoned, the present system of things continuing. Union with the other Provinces offers a reasonable hope of effecting this change; and it lies with those, who are so violently opposed to Confederation, to show what other means can be devised to improve the condition of the country."

The question of Confederation continues to be discussed. The people are beginning to realize the fact that Union with the other Provinces offers the only reasonable hopes for bettering their condition. The St. John's *Chronicle* tells us:—

"The time will soon come when this colony will have to declare itself, and we are glad to see evidences that assure us of the triumph of Union. It will be remembered that a petition was got up here some time since by the anti-Confederates, and while, no doubt, a goodly array of signatures was obtained, as a certain kind can be obtained to do anything, no attempt was made outside of St. John's, Trinity, Ferryland and Harbor Grace, and in the latter place the defeat of the experiment was signally exhibited. Though backed by powerful influence, not a dozen signatures could be procured in that town, while in most other parts of the island the failure would have been equally marked had the trial been made. We note the fact of what took place at Harbor Grace as deserving attention, because in that place there is a large amount of intelligence which does not act without knowledge, as was shown in the instance referred to.

"We have also satisfactory accounts from other districts which will doubtless receive practical confirmation when the question comes before the Legislature.

"No one can feel surprised at this change. We knew that the question at its inception had taken root, and though subjected to a storm of faction and prejudice and ignorance, it lives to see these influences weakened and diminished, as was certain to be the case when reason and reflection were allowed to operate. It was evident from the experience of the last ten years at least that the present available resources of the colony could not support its people, and that a change must come. There has been a gradual decline in the condition of our people for many years, which it is beyond the power of any local Government to arrest. Our fisheries are dying out, while those of the French seem to expand and thrive in a corresponding degree. No one in this colony can fail to see in this contrast the conditions of cause and effect, and that over the ruinous causes we are at present powerless."

A very severe hurricane visited the Island on the 22nd and 23rd ult. In St. John's, "chimney "tops and roof tiles were scattered about in "great profusion, back and front doors knocked "into smithereens, and fences and farm stock "stirred up in rather a lively style." The storm was very severe throughout the Island. At Harbor Grace the shipping in port suffered severely. At the wharf of Messrs. Ridley & Sons three vessels were damaged to the extent of some thousands pounds. The steamer *Ellen Gisbourne* had her sides beaten in. The shed at the Patent Slip was completely blown down. At Carbonear there was great destruction of property. The force of the wind may be realized by the fact that on one farm at this place some fifty-two trees were blown down, some of which were three feet in circumference. At Bishop's Cove two men and a boy, named Smith, were hurried into eternity by the upsetting of their boat. It appears that the men went on board of a large boat for the purpose of mooring her safely, and when returning to the shore the punt was swamped by the sea, and the poor fellows drowned. From Torbay, Oderin, and other places there are melancholy tidings of loss of life. The loss of Capt. Cook, of the Revenue cruiser, which, through collision, became a total wreck at St. Peter's, is recorded among the lamentable disasters caused by the gale. During the storm the French man-of-war *Aboundance*, and fifteen merchant vessels, were also wrecked at that place, involving a loss of seventy-four lives.

A correspondent of the *Times*, writing from Fortune Bay on the 27th ult., thus sums up the effects of the sad visitation:—

"Settling time is past, and a sad one it has been, long to be remembered. On Saturday, Sept. 22d, a fearful gale devastated this coast, —every place has suffered more or less. Almost all the men and craft were at Harbor Briton settling. At that place the confusion was great indeed;—some driven from their moorings ran 8 or 9 miles, and then were beached. Others were driven ashore in the harbour. Some lost anchors, some stove in. There was no loss of life. At St. Peter's many lives were lost and vessels destroyed. At almost every harbour great injury was done. Some people lost their whole catch of fish by the last trip, from flakes and stages being blown down. It is said that several houses at Fortune are destroyed. As yet the actual damage has not been ascertained."

The dogs are again at their depredations of sheep killing. The *News* says an observatory is to be erected at Heart's Content. On the 26th August a bottle, containing the following memorandum, was picked up at sea near Placentia:—

"Ship *Finella*, from Montreal to Derry, Sunday, 16th July, 1866; Bank of St. Peter's, off Newfoundland; Capt. Murray, of Dundee. All well. Whoever picks this bottle, please report to J. CHALMERS, Gowan."

Accounts from Labrador speak of some successes in the codfishery on that coast recently. The herring catch will be the largest for many years.

THE LIEUT. GOVERNOR IN CAPE BRETON.—The Cape Breton *News* says that "Governor Dundas of Prince Edward Island arrived here on Tuesday last. During his brief stay His Excellency made a hurried visit to several of the Coal Mines, and would have completed his intended visit to others, had not pressing public duties connected with his government, made it necessary for him to return to the Island on Thursday. Governor Dundas is possessed of winning and agreeable manners, and unquestionaly is a gentleman who will fill with dignity and grace the elevated position he has the privilege to enjoy as Representative of Majesty in the prosperous and lovely Island of Prince Edward. We have good grounds for the statement that His Excellency was much pleased with this part of Cape Breton and of the encouraging developement which he witnessed in its Mineral resources. As an evidence of his intrepidity, and determination to be fully informed of the workings of the collieries visited, Governor Dundas descended the several "shafts" and thoroughly examined the underground operations, both at Sydney Mines and Little Glace Bay; whilst at Bridgeport and Lingan he gained access to the works through the slopes."

Referring to Mrs. Stevenson's Concerts in New Brunswick, the St. John *Morning News*, of a late date, says:—

"The Charlottetown people owe a debt of gratitude to Mrs. W. Stevenson for her exertions in behalf of the poorer sufferers by the destructive fire in that city. She has labored hard in their aid, receiving here assistance from the *Cordelia's* Glee Club, and other amateurs. The attendance at the concerts given was quite respectable. We could have wished, however, that it was much more numerous than it was."

We are informed that the Hon. Alex. Keith, who has lately returned from a visit to Canada, purchased while there 10,000 bushels of barley, and a large quantity of hops, and that the articles are now on board the steamer *Merritt*, on her passage from Toronto to this place. We believe that a large quantity of the grain formerly used in the establishment of Mr. Keith was obtained from P. E. Island.—*Halifax Evening Express*.

CROPS IN CANADA.—The Ottawa *Citizen* says:—"But for the very unfavourable weather which has visted the Province for the past few weeks, the harvest would have been one of the most bountiful ever known in the country. Previous to the advent of the long continued rains, smiles gladdened the features of the farming community at the prospect before them. Hay, oats, wheat, corn, and tuber crops, held out promise of abundant yield. The constant pouring down of the watery element week after week, with only occasional glimpses of the sun, had gradually changed the prospect, and when fine weather did come, it was known that a great part of the crops had been so damaged as to be almost entirely worthless. Hay, it is certain, has been very much damaged; oats have, in some cases, sprouted; corn has been frosted and arrested in its growth; while the old enemy of the potatoe, the rot, has been making sad ravages. Oats will be scarce when compared with last year's supply."

THE EQUINOX.—MARINE DISASTERS.—There was a heavy gale on Saturday, the 23rd ult., on the Banks of Newfoundland and the eastern coast of Nova Scotia, causing serious disasters. The following are already reported.

Barque *Eudora*, Hilton, master, from Ardrossan for Quebec, ran ashore at St. Paul's Island, and became a total wreck. Crew saved. Part of material saved, and carried to Sydney. The *Eudora* was a barque of 708 tons, and was owned by Messrs. A. & G. Durkee and B. Hilton, and was insured in the Commercial and Acadian offices of Yarmouth, $8600 each.

From the shipping fleet on the Banks we have intelligence to the following effect:—

Schr. *Heber*, of Pubnico, Morris Goodwin, master; schr. *Gen. Williams*, of Wood's Harbor, James McCormisky, master; and schr. *Elvira*, of Carrington, were dismasted and abandoned, their crews being rescued by schr. *Start*, Capt. Crowell, of Barrington.

Schr. *J. P. Nickerson*, Josiah Sears, master, of Wood's Harbor, was seen botton up—crew supposed lost.

Schr. *Wide Awake*, Stephen Connell, master, was lost, and two of the crew picked up in a boat.

Schr. *Ospray*, Joseph Devine, master, of Wood's Harbor, is missing, and fears are entertained respecting her safety.—*Yarmouth Herald*.

Whilst Mr. Benjamin Killam, senr., was seated in his son's carriage on Clements wharf, on Saturday last, the horse took fright and backed off the wharf. Mr. Killam was thrown beyond the vehicle, and his life saved after he had sunk twice, and been 15 minutes in the water. The horse became entangled in the harness, and perished before he could be got ashore. Mr. K., we are happy to state, was not seriously injured, and has entirely recovered.—*Yarmouth Herald*.

THE DELEGATES FROM CANADA TO ENGLAND.—The Halifax *British Colonist* of Thursday last, says that "just before the mail left London on the 29th ult. Lord CARNARVON received a telegram from His Excellency the GOVERNOR GENERAL OF CANADA, saying that all the Canadian Delegates would leave Canada for England on 7th of November next. This will of course afford ample time for the full discussion of the question of Confederation between the Delegates from Canada and those from the Maritime Provinces, and between them all and Her Majesty's Ministers, and for the due preparation of the bill required to consummate the Union, prior to the meeting of Parliament."

GOOD FISHING.—Schr. *Flying Arrow*, Capt. Andrew Coggins, of Westport, in two trips from that port to the "Lurcher" week before last, caught 172 quintals Pollock—taking 100 quintals in one day, and the balance in another. Both trips occupied less than four days.—*Yarmouth Herald*.

LATEST NEWS BY TELEGRAPH.

Our Colonial papers of Saturday's date furnish the following late telegraphic communications from the United States:—

NEW YORK, Oct. 12—P. M.

A letter from the city of Mexico says that Maximilian's new Ministry, though industrious, has done nothing to restore public confidence.

The compact between the Emperor and the Church party, required the latter to pay over to the former twenty-five million dollars for the restoration of their power.

The hisses with which President Johnson was greeted on his tour had been a source of gratification to Maximilian.

At a banquet given to an American Consul, the exile Confederates made speeches, in which they extolled their native country highly.

Maximilian expects another civil war in the United States. Gold 151.

NEW YORK, Oct. 12.—A rain storm of unusual violence has been experienced in the vicinity of Washington and Baltimore, causing much damage to property, and interrupting railway travelling and for some time, telegraphic communication with the former city. Several houses on the banks of the Potomac have been swept away, and two families are said to have been drowned. The bodies of several members of one family have been recovered.

THE correspondent of the *Montreal Gazette*, Sept. 24., giving an account of a tour in the Maritime Provinces, thus concludes his notice of Prince Edward Island:—

"Gladly, bad time permitted, would we have seen more of the delightful Island of Prince Edward. Those who in summer require a change of air, sea bathing, and a pure ocean atmosphere, with beautiful land scapes to gaze upon, will hardly find them equalled elsewhere."

MOTHERS TAKE HEED.

Thousands of children perish annually from one cause, and that is from worms. Why will you neglect the first symptoms of these pests of humanity, and wait until it is too late before you administer the remedy? JUDSON'S WORM CANDY is the only *PURELY VEGETABLE* Remedy in existence. If there are no worms, it only acts as a gentle purgative, and cannot harm an infant. IF WORMS EXIST it kills them. Every family should have a package of JUDSON'S DEAD SHOT WORM CANDY in the house. Sold by all Dealers. *Get our Almanac.*

On Saturday, 6th inst., the Hon the Chief Justice, in the absence of His Excellency the Lieutenant Governor, presented the various prizes to the successful competitors, in the Legislative Library, and in doing so addressed a few words of counsel and encouragement to each. Our worthy Chief Justice evidently takes a lively interest in these friendly competitions.—*Bul.*

THE PRUSSIAN NEEDLE GUN AND THE SNIDER ENFIELD COMPARED.—The London *Times* thus compares the two guns, the Prussian needle gun and the English Snider Enfield:—"As compared with the Prussian needle-gun the efficiency of the English breech-loader is nearly four times greater in all that relates to accuracy of aim or rapidity of fire, while as regards the safety and ease with which the breech mechanism is worked it is beyond any degree of comparison. There are eight distinct movements of the breech required to load and fire the needle-gun—there are only four necessary in Mr. Snider's. Seven rounds per minute have been fired from the Prussian gun, and the average is four, while twenty one rounds per minute have been fired from the English breech-loaders, and the average, it is believed, will be ten." The troops under orders for Canada are armed with this rifle, and 40,000 of the same kind are being prepared for our Volunteers."

A ship of about 500 tons, built at Rothsay, New Brunswick, was accidentally burned on Monday evening last. She was nearly ready for launching F. Tufts was the owner, and Messrs Maynes the builders. Was insured to the extent of $5,800.

ROYAL SMOKING ROOM.—The Prince of Wales' smoking room, at his estate, Frogmore, writes a Home journal correspondent, is fitted up in splendid style, and is one of the most luxuriant apartments in the whole palace. He has the choicest brands of cigars that can be obtained, and tobaccos of every kind that grow. His visitors, if they affect the pipe, are each supplied with new and costly meerschaums, as soon as they enter the estate, which pipes are never used again at Frogmore after the guests depart. The Prince is fond of the weed, and has taught the Princess to smoke cigarettes. The "ash boxes" that stand on the rare marble tables are artistically designed, in solid gold, and embellished with precious stones.

THE ROMAN BEDTIME.—An immense majority of men in Rome never lighted a candle, unless sometimes at early dawn. And the custom of Rome was the custom of all the nations that lived around the great pond of the Mediterranean. In Athens, Egypt, Palestine, Asia Minor, everywhere, the Ancients went to bed, like good boys, from 7 to 9 o'clock. The Turks, and other people who succeeded in the stations and the habits of the ancients, do so at this day.

A Sarnia (Canada) paper, says that five men were drowned at the mouth of the Sauble river a few nights ago, by the upsetting of a boat. It appears two small boats, containing seven men in all, had been across to Forestville, Mich., leaving that place for the Sauble, on the day mentioned. The weather getting stormy as they approached the Canada shore, one of the boats struck on the bar near the mouth of the Sauble, and upset, the consequence being, that five out of the seven met with a watery grave.

A young woman in Memphis took arsenic and died. Why, is shown in this note which she left addressed to Oscar Willis, a minstrel; "O, Oscar! my darling, my darling! how can I leave you? O, Oscar! my heart is bursting, I know you do not love me any more; I think I am in your way, so I will put an end to my life by taking poison. Good by, my darling. God only knows how I love you. May we meet in heaven, never to part, is my prayer. God bless you through life, and may you be happy. Think of Jennie sometimes, will you, dear? Send my trunk home. Good by, forever.—JENNIE WILLIS."

A St. Louis miss of fourteen eloped with a young Italian the other day, and cheated a minister in marrying them by placing a slip of paper with eighteen written on it in her shoe, and when questioned as to her age, saying she was over eighteen. A wicked lawyer taught her the trick.

FOR COUGHS, COLDS, AND THROAT DISORDERS, use "*Brown's Bronchial Troches*," having *proved* their efficacy by a test of many years. The Troches are highly recommended and prescribed by Physicians and Surgeons in the Army. Those exposed to sudden changes should always be supplied with "*The Troches*," as they give prompt relief.

HOLLOWAY'S PILLS.—Diarrhœa, Dysentery.—The medicines commonly used for the subjugation of these diseases so frequently fail of effecting that object that it should be known to all sufferers from these maladies that Holloway's Ointment well rubbed upon the abdomen two or three times a day, with the application of warm bran poultices in the intervals, gives immediate relief, gradually soothes the irritable bowels, and assuages their most distressing pains. This treatment is applicable to all forms of diarrhœa, dysentery, and cholera, and, with attention, will always be successful. Farinaceous diet, milk, and barley water should give subsistence during the continuance of the disease, to the utter exclusion of all solid food, which the deranged bowels are incompetent to assimilate.

WE PLEDGE OUR REPUTATION for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion, relief will be found in fifteen or twenty minutes after MRS. WINSLOW'S SOOTHING SYRUP has been administered. Cures dysentery, and diarrhœa and wind colic. Sure to regulate the bowels. Price, Thirty-five cents a bottle.

St. Dunstan's College;

Under the patronage of His Lordship the Bishop of Charlottetown.

THIS INSTITUTION is situated on the Princetown Road, a mile and a quarter north of Charlottetown. The site is peculiarly beautiful, healthy, and far removed from the distractions and moral dangers of the city.

The halls and rooms of the building are spacious, airy and comfortable.

The College Grounds are large, affording ample room for games and athletic exercises.

The course of studies embraces all the branches necessary to prepare young men for the study of the learned professions or fit them for mercantile pursuits, such as History, Geography, the English, French, Latin and Greek Languages, Rhetoric, Mathematics, Philosophy, Chemistry, &c. Music, vocal and instrumental—is also taught.

The College possesses a large and well selected Library, as well as an extensive Philosophy Apparatus.

The Professors and Teachers reside in the Institution, forming but one family with the students, and exercising a constant supervision favorable to discipline, decorum and good morals.

Catholic students are carefully and frequently instructed in their holy religion, which they are required to practise. The most solicitous attention is paid to the morals of all; and whilst within the College enclosure they are constantly under the watchful eye of one of the Teachers or Prefects. Perfect discipline is strictly but kindly enforced.

Students when entering must produce satisfactory testimonials of good character.

The College is visited regularly once a week by a Physician.

TERMS:
Per Quarter of 11 Weeks.

Board and Tuition,	£6	0	0
Use of Library,	0	1	6
Physician's Fee,	0	1	6

Payments to be made half-yearly in advance.

The College furnishes bed-steads and mattrasses; the students must provide their own beds and bedding, brushes, basins, towels, &c.

The Scholastic year commences on the first* Wednesday in September and ends about the middle of July. Students are requested to enter the College on the first day of the opening of the classes.

For further particulars apply to A. McDONALD.
St. Dunstan's College, Aug. 6th, 1866.
