### Queen's County Jail.

To the Editor of the Examiner,—

DEAR SIR,—Having no statistics at hand, I can't date the laying of the foundation stone of this edifice. However, I'll venture to assert that it was erected in the reign of William the Fourth. The building is about 80 feet long by 40 feet broad, and 34 stories high above ground. The northern end is occupied by criminals, the southern end by Mr. Harvie, the keeper, a gentleman well endowed by nature to perform, to a hair's breadth, the duties by Law required of him; yet friendly and affable to all, his spontaneous philanthropy occasionally bursting out in sundry acts of kindness to indigent debtors. His sub. (I have no doubt, would commend himself to Emperor Alexander, were he in Siberia. Four rooms in the centre are for the reception of debtors. Rooms number 1 and 2 on the upper story, each 16 feet square, height of ceiling 8 feet, a 12 light window (10x12), furnished by 1 stove, 3 iron bedsteads, straw mattress and blankets; blankets did I say? Yes; and walking blankets at that, and an innumerable number of rats, mice, etc., etc., if one could answer for the whole as to their number, it would undoubtedly say "legion." Numbers 3 and 4 are on the second flat, number 3 having a stove and 1 iron bedstead, etc., etc. But as to room number 4, I can tell nothing about, as it is kept exclusively for the use of the aristocrats. All the rooms are lighted with gas. Such is the place of reception of unfortunate debtors in the metropolis of the Province for Her Majesty's loyal subjects. A friend's advice just in the ear of the Sullivan Government, to put this House in order; if not, the day is fast approaching that will put you below par with the late Davies one.  
Your humble servant,  
PAT SCOTT.

April 21, 1879.

### Reforms Wanted.

SUGGESTIONS TO THE NEW GOVERNMENT.

To the Editor of the Examiner.

SIR,—Being a resident and independent voter of Queen's County, I consider it my duty to send you a few lines, hoping that you will find room for them in your valuable paper. I heard the two able speakers from Ontario last summer, and I have thought many times since if they had used their great talents and knowledge of political affairs instead of finding fault with each other in things that are past and gone, that they could have saved the Dominion millions of dollars.  
Now, Mr. Editor, we want this Local Government (1) to abolish about one-half of the offices which are now in operation. (2) To abolish the Legislative Council; and the members of the House of Assembly should be put in by qualified voters. (3) Do away with these Assessors who come about a man's farm and tax his fine house which is built with borrowed money. We cannot afford to stay home to meet the tax collector with the money in our hand; neither can we afford to lose a day's ploughing in carrying the tax to him, and when our present Government, which I have confidence in, has made these charges in political affairs, then if there is not enough money on hand to carry on the public business, we think it would be well to add a little to the original land tax, and have it paid at the Land Tax office, as formerly; and I also want as many of the remaining offices to be let by tender as possible, for no tender should be accepted who wants more than \$1000 for any office, and all other offices should be tendered for under that according to their work. Our tax is now about as heavy as our rent and taxes were formerly; and now I would say that no Government has any right to tax the country and not the town. As regards the roads, I consider they were better before the Government took charge of them, for even now we are doing the greater part of them ourselves; and I believe the country can keep the roads in as good repair as they are now, and not miss the time as much as they do the money.  
Now is the time to make arrangements with the members about the time to meet in future. I think they should not meet later than February, in order to give country members a chance to put in their crops; and I believe that one half of the members could do all the business that is required for this Island; and that each should not require more than \$100 per session; and that the House should meet early in the morning instead of late at night, and in all cases we should choose country members in preference to citizens, because it is more reasonable that they should understand the wants of the country better than citizens.  
Now, the Act in reference to Domestic Animals should by all means be repealed; for I knew a man who had a number of cattle grazing in his pasture at a short distance from his residence, and they by accident got out of the pasture, and on their way home to get milked were seized by an unprincipled Reeve, and the owner had to pay for them; and in these hard times, I do not think it prudent for any Government to place such temptations in the poor peoples' way. At the same time there should be some provision made, and that is: each man having land fronting on the highway should have a lawful fence and keep his gate shut. Then if any animals should break over that fence, the owner should pay the damages done by such animals.  
As regards the School Act there has been a great deal of dissatisfaction. (1) by assessing householders who have no interest in the school, for running expenses; (2) for paying Trustees per centage for taking the people's money; (3) having a public meeting on a market day, as is now appointed; (4) by paying a supplement to teachers instead of the teachers receiving his salary from the Government; (5) by the changing of the books of a school too often, and thus taking money from the country, and giving it to the book-stores; (6) having the school to go in at 10 o'clock till after vacation, instead of having it

to go in at 9 o'clock from the 1st of March, and dismiss at 4 o'clock.

Since the huge building, called the Lunatic Asylum, has been erected, I hope that the Government will make as good a use of it as possible, by placing the poor house in connection with it, in order that the poor may have some work to do in the Asylum, and the rest of them should be put to work on the Model Farm.

Since the Jail birds are increasing so fast, we will have to be at the expense of a larger building, unless some measure is taken; and we would say that part of them should be sent to the Penitentiary, another part put out on the streets to work, and the remainder should work in the jail. I hope this Government will use political economy, and if they do not, every one will find it hard times to live in this country.  
Yours, etc.,  
MARTIN WEST.

April 19, 1879.

### OTTAWA NOTES.

(From the St. John Sun.)  
P. E. I. GOVERNORSHIP.  
It is stated on good authority that Senator Haviland will be appointed next Lieutenant Governor of P. E. Island. There is no doubt the appointment would be a most popular one.

### THE FISHERY AWARD.

Dr. Fortin, M. P., has a motion on the notice paper in reference to the Fishery Award. It is to the effect that the amount of the award accruing to Canada, after paying expenses, should be made a special fund, and that the interest thereof should be employed in restoring exhausted fishing grounds, and developing in every way the sea fisheries of the Dominion.

### THE INSOLVENT BILL.

The Insolvency Committee met recently and discussed the new Bill and some slight amendments were made, after which it was agreed to report the Bill to the House. As an evidence of the length of the Bill, it is stated that it contains 32,660 words.

### "Holy" Russia.

An ukase is published, ordering the appointment of Governors-General for six of the most populous districts in Russia, with perfectly despotic powers, even more despotic than that wielded by generals in time of war. An official despatch is published, appointing provisionally General Gourko, Governor-General of St. Petersburg, General Todleben, Governor-General of Odessa, and General Louis Melikoff, Governor-General of Charkoff. Generals Todleben and Melikoff will command the troops in their respective governorships.  
The Russian Government only condemn their own sweeping by oppressive measures by putting forward such a pretence. The evil is far deeper and more widespread than the account admits; and because the police themselves form one of the classes among which the revolutionary propaganda has been at work, that the Czar's advisers have felt the need of seeking new, more swift, and more deadly instruments for the work of repression. Russia is virtually placed under martial law, and that law is to be administered in the most thorough and merciless fashion.  
The "Daily News" (pro-Russian) says: "We cannot attempt to forecast the result of the duel between Nihilism and Millarism to which this proclamation seems to be a challenge. It attempts to meet the disturbers with something like their own weapons, and to put down lawlessness by the suspension of law. The mere confession that such an attempt is necessary must seem a very serious step for the Government which, for some years, aimed at being considered a civilized Government. For the time during which the Ukase lasts, and in the wide and important districts to which it applies, Russia ceases to be what she has recently been, and relapses into a condition of practical barbarism.  
Disturbances occurred at Rostov, on the River Don, in the government of Ekaterino Slav, on the 14th. The police being unable to settle it, the military were called out and restored order. The riot lasted from the evening of the 14th to the morning of the 15th. The residences of the Chief of Police and the Overseer of the town, district police station and the police records were destroyed, and two policemen killed.  
The Emperor and Empress go to Livadia. The Pall Mall Gazette (Anti-Russian), commenting upon the ukase of the Czar, says that the foes of authority are a small but determined band of evil-doers, as described in the ukase, is incredible.

### Why Will You

Allow a cold to advance in your system and thus encourage more serious maladies such as Pneumonia, Hemorrhages and Lung troubles, when an immediate relief can be so readily attained. Boschee's German Syrup has gained the largest sale in the world for the cure of Coughs, Colds and the severest Lung Diseases. It is Dr. Boschee's famous German prescription, and is prepared with the greatest care, and no fear need be entertained in administering it to the youngest child, as per directions. The sale of this medicine is unprecedented. Since first introduced there has been a constant increasing demand and without a single report of a failure to do its work in any case. Ask your druggist as to the truth of these remarks. Large size 75 cents. Try it and be convinced.
