Monday next, 19th inst., in the building  
lately occupied by the Bank of Prince Edward  
Island, under the management of the under-  
signed.  
Deposits will be received on interest, and  
on current account.  
Drafts granted on the various Agencies and  
correspondents of the Bank.  
Sterling and other Exchange bought and  
sold, and general banking business transacted.  
D. C. CHALMERS,  
Ch'town, June 17, 1882—tf Agent.

## MORTGAGE SALE.

TO BE Sold by PUBLIC AUCTION, on  
SATURDAY, the Twenty-fifth day of  
NOVEMBER next, A. D., 1882, at the  
hour of Twelve o'clock, noon, at the New  
Law Court's Building, in Charlottetown,  
under and by virtue of a power of Sale,  
contained in an Indenture of Mortgage,  
dated the First day of March, in the year  
of our Lord, one thousand eight hundred  
and fifty-six, and made between Watson  
Duchemin, of the City of Charlottetown,  
in Prince Edward Island, and Sarah  
Duchemin, his wife, of the one part, and  
James Peake, of the City of Charlottetown  
aforesaid, Esquire, merchant, of the  
other part.

ALL that tract, piece or parcel of Land,  
situate, lying or being in the City of  
Charlottetown, and fronting on Sidney Street,  
that is to say, the northern moiety or equal  
half parts of Lots number twenty-six and  
twenty-seven, in the second hundred of  
Town Lots, in Charlottetown aforesaid, the  
said lots being divided by a line running at  
right angles with Prince Street, equidistant  
from Sydney Street and Dorchester Street,  
through the centre of the said lots until it  
strikes the western part of lot number twenty-  
eight in the same hundred as the said lots are  
laid down and delineated in a certain plan or  
map of Charlottetown, made, and now kept in  
the office of the Registrar of Deeds of the said  
Island; together with the dwelling house,  
and all other houses and buildings thereon  
erected, and the rights, members, and appur-  
tenances thereto belonging, or in anywise  
appertaining.

For further particulars apply at the office of  
E. H. Haviland, Solicitor, Charlottetown.  
Dated this sixteenth day of May A. D.,  
1882.  
DANIEL HODGSON,  
JAMES PEAKE,  
Surviving trustees and executors of the last  
will and testament of James Peake, deceased.

## A CURE GUARANTEED. Magnetic Medicine!

For Old and Young, Male and Female.  
Positively cures Nervousness in ALL its stages,  
Weak Memory, Loss of Brain Power, Sexual Pro-  
stration, Night Sweats, Sympthomatics, Leucorrhoea,  
Barrenness, Seminal Weakness, and General Loss  
of Power. It repairs Nervous Waste, Rejuvenates  
the Aged, Invigorates the Infirmed, Strengthens the  
Brain and Restores Surprising Tone and Vigor to the  
Exhausted Generative Organs in either sex. **ES!** With  
each order for TWENTY packages, accompanied with five  
dollars, we will send our Written Guarantee to refund  
the money if the treatment does not effect a cure. It is  
the Cheapest and Best Medicine in the Market.  
**ES!** Full particulars in our pamphlet, which we  
desire to mail free to any address.  
Mack's Magnetic Medicine is sold by Drug-  
gists at 50 cts. per box, or 6 boxes for \$2.50, or will  
be mailed free of postage, on receipt of the money, by  
addressing  
**MACK'S MAGNETIC MEDICINE CO.,**  
Windsor, Ont., Canada  
Sold in Charlottetown by Apothecaries' Hall Co.,  
Agents for Prince Edward Island and by all Druggists  
everywhere.

## Milk as Food.

Milk is one of the most important, per-  
haps the most indispensable article of food  
in families which consist of children not in  
their teens. It must not be understood  
that milk is merely child's food; it is the  
most easily digested of any form of food  
and the most nourishing. The chemical  
composition of milk varies somewhat ac-  
cording to the breed of the animal yielding  
it, and the food and general treatment  
which the animal receives. Cow's milk  
stands about as follows, according to vary-  
ing circumstances:

	Fair Sample.	Average.	Poor.
Water	87	88.30	88.50
Curd chiefly casein	4	3.75	3.60
Butter or milk fat	3.50	3	2.95
Sugar of milk	4.75	4.25	3.95
Ash	75	70	70

Now, it is taken for granted by the health  
officers of most cities that when a milk falls  
below 12.50 per cent. of solids, something  
has been removed in the form of cream or  
worse still, that cream has been taken away  
and water added. From the three speci-  
mens given above it will be seen that only  
one is up to the sanitary standard of twelve  
and a half per cent. of solids, while the  
second is 11.70 and the last only 11.20.  
Whenever milk reaches 11.50 or falls be-  
low that figure there is good ground for  
suspicion that some tampering has been  
going on in the dairy. Milk fat  
varies, in street milk, from 2.50  
to 4 per cent.; it should never be  
less than 3.25 in fairly fed milk from aver-  
age cows. The solids of milk occasionally  
range from 11 to 14.85, so that low samples  
of milk may be dear in summer at 4 cents  
per quart, while good samples may be very  
cheap at 5 cents, or in winter 5 cents may  
be dear while 7 cents per quart would be  
cheap as the cows yielding the milk were ill  
or well fed. The establishment of cream-  
eries will do much to promote improvement  
in breeding milk cows and their proper  
feeding. Butter factories are a necessity if  
we are to improve the dairy interest, so as  
to increase the quantity and quality of our  
milk. Evaporated to dryness, milk has the  
following composition:—

	Natural	Evaporated
Water	87.00	60
Curd	4.00	31
Milk fat	3.50	27
Sugar of milk	4.75	36
Ash	75	6

Thus it is seen that milk has the charac-  
ter of both meat and vegetable food. Its  
curd or casein and butter resemble beef,  
and its large proportion of sugar represents  
the starch of wheat. The ash of milk,  
which is in pure samples always under 1  
per cent, furnishes us with the salts of  
phosphates, potash, soda and magnesia;  
and hence it is that doctors make so great  
a use of milk in sickness and for weakly  
persons generally. We come now to the  
constitution of condensed or preserved  
milk in the semi-solid or fluid form. The  
usual kinds met with in commerce are  
boiled down after the addition of sugar,  
producing a stiff opaque syrup of a cream  
color. Its composition stands thus:—

Water	26
Casein	15
Milk fat	12
Milk sugar	15
Cane Sugar	27
Mineral matter	2

Before passing on to the varied uses of  
milk in daily diet, it is right to observe the  
condition and varied character of human  
milk and its fitness for infant's food.  
Neither goats' nor cows' milk is so well  
suited to infants as human milk, and intel-  
ligent and experienced mothers know it.  
They dilute and sweeten the milk of  
domestic animals when forced to use it in  
preference to the human. The milk of the  
ass and the mare approach more nearly in  
character to the human milk, than that of  
sheep or pigs; and goats is about the same as  
the cow's. For infants, asses' milk is the  
best substitute for the human, while for  
young children who have completed their  
first year goat's milk is the richest. Human  
milk has the following composition:

Water	89.50
Curd	1.65
Butter or milk fat	2.25
Sugar of milk	6.35
Salts or Ash	25

Thus we see that mother's milk has only  
10.50 per cent. of solids and that about two-  
thirds of this is sugar. Human milk varies  
at different ages and constitutions, and es-  
pecially in different stages of health. The  
milk of women from 15 to 20 years of age  
contains more solids than that of women  
beyond thirty or forty. Differences  
also occur in different temperaments,  
and great ones arise from disease.  
It therefore follows that weak and  
delicate women should not nurse their  
children, and that the oft repeated taunt of  
unnaturalness in giving an infant milk from  
domestic animals, is the highest evidence of  
pure affection and wisdom on the part of  
parents. There are many uses of milk  
which although known, are not often prac-  
tised from the fact of their not being un-  
derstood. Cream is a very delicious and nour-  
ishing form of ready made fat for persons of  
delicate lungs, who make heat and flesh  
with difficulty, and yet who would turn  
from cod liver oil with disgust.

With the many forms of milk puddings  
and beverages we are all less or more fami-  
liar. The Canadian practice of using eggs  
with rice or tapioca pudding is a piece of  
extravagance unless the pudding is intend-  
ed to form the chief part of a meal. If two  
eggs and water be used when eggs are 13 to  
16 cents a dozen as we have known them,  
to economise milk at 6 cents per quart there  
may be reason on its side, but so small a  
consideration is petty when flavor is so very  
important to enjoyment. Milk should al-  
ways be used rather than eggs. If eggs  
must be used in the pudding they should  
be mixed with milk as a custard to form a

cover for the pudding or a thin pouring cus-  
tard for sauce. Custards made with milk  
are nourishing, especially for delicate  
people. For young children, however,  
milk with porridges made from the cereals  
is best and should be so used. In England  
children eat bread and milk for breakfast,  
and are rosy-cheeked and heal by juveniles.  
The bread, of course is better than that we  
are accustomed to in cities, but it is met  
with in as good quality in our farm houses.  
Oatmeal or granulated wheat and milk as  
porridge or pudding, is the most complete  
and perfect for every purpose of human nu-  
trition that can be found in commerce. In  
all English speaking countries the con-  
sumption of milk increases prorate, per  
capita every year.

## Cherry Valley Notes.

The Post Office is now at McDonald's  
store. The late Postmaster, being too old  
to attend to his duties, resigned. Mr.  
Angus McLellan was an old and trusted  
public servant, who gave entire satisfaction  
in his official capacity. We think the  
Government should allow the small pitance  
he received as postmaster to continue, in  
compensation for the length of years he so  
faithfully served the public.

Messrs. John A. Dodds and Jeremiah  
Crane left a few days ago to spend the win-  
ter in Miramichi.

James Huggan, Esq., of this place, lost a  
valuable cow some time ago. She broke  
into an inclosure in which there were a  
heap of turnips, and having satisfied her  
appetite, collapsed.

Miss Jane J. Irving teaches the Upper  
Cherry Valley School. She is an excellent  
teacher, and does good work.

Why do not the people of Portland and  
Lower Cherry Valley unite and have a graded  
school. It only needs a little energy.  
The lower school, where Miss Cavanaugh  
teaches, will soon have to be closed for want  
of scholars; and then there will be only one  
school in the two districts. It is a pity  
that people should stand in their own light.

Mr. Stephen Carrier is repairing his  
house and already the front is resuming a  
very nice appearance.

We are sorry for the electors who lost  
their votes last Wednesday in voting for the  
wrong man. Mr. Nicholson is our choice.

Cherry Valley, P. E. I., Nov. 21, 1882.

## Mill View Convictions.

On the 17th November, inst., at Mill  
View before James H. Bourke, J. P.,  
Alexander McMillan was convicted and  
fined in the sum of \$1.50 and costs for an  
assault upon the person of Wallace Stewart  
and beating his horses.

On the same day, before the same, Mary  
McMillan was convicted and fined in the  
sum of \$1.00 and costs for an assault on  
the person of Wallace Stewart, by pelting  
stones at him and his horses.

## Current Notes.

Three million dollars have already been  
spent on the Panama canal scheme, yet  
absolutely nothing has been done in the  
way of cutting the canal.

Despite the refusal of England to assent to  
the despatch of a Turkish commissioner to  
Egypt during the continuance of Earl Duf-  
ferin's mission, the Porte still adheres to  
its original intention to send a commis-  
sioner.

Mr. Gladstone lately intimated in the  
House of Commons that before long the  
positions of Prime Minister and Chancellor  
of the Exchequer would be severed.

The Grand Trunk authorities offer to  
build a new depot that will cost \$300,000,  
if the city will cancel the debt of six hun-  
dred thousand dollars due by the company.

Much has been said about using Blood-  
hounds as detectives, few people at all  
conversant with the principle of hunting by  
scent will support the idea that in such  
thickly-populated places as the large towns  
of England or the United States, where the  
most crime is committed, dogs can be of  
any use except as guards; but in the more  
thinly inhabited districts of the world,  
hounds are still used to trace runaway  
criminals. An instance appears in a Chi-  
cago journal, which says that at Texas five  
persons attempted to escape from a peni-  
tentiary by crawling through a sewer; two  
of whom were killed, one captured, one  
mortally wounded, and the other traced by  
Bloodhounds.

The New York Sun is hard on the United  
States Supreme Court. It says one Judge  
was appointed to the bench as a reward for  
services to Hayes in the Louisiana frauds  
that helped to make him President, and  
that another was given his seat by Garfield  
in accordance with a written agreement  
with Jay Gould, by which Gould contrib-  
uted a large sum of money towards the  
election of Garfield. The Judges are charged  
with using free railway, telegraph and ex-  
press passes, although these corporations  
are often in litigation. The practice of  
allowing each Judge to have a messenger  
during term has been corrupted into the  
keeping of a body servant at \$1000 a  
year, and the right to a plain equipment  
for work, such as a desk and table, has  
been stretched until some of the Judges  
have splendid private libraries in their own  
houses, the furniture, books and all having  
been paid for by the public without  
authority of law.

## Horsford's Acid Phosphate

AS A BRAIN TONIC.  
DR. E. W. ROBERTSON, Cleveland, O., says:  
"From my experience can cordially recom-  
mend it as a brain and nerve tonic, especially  
in nervous debility, nervous dyspepsia, etc."
