

Plan Provincial Conference To Assess P.E.I. Education

"Representatives from various organizations throughout the Island have been meeting for the past two months to explore the possibility of holding a Provincial Conference on Education," states C. F. Bentley, Boards of trade representative on the pilot committee.

"It is the opening of these interested groups that such a conference has unique possibilities as a means to assess our educational strengths and weaknesses with a view toward future development of our education system.

"This proposed provincial conference is a direct out-growth of the Canadian Conference which was held in Ottawa last February.

"The representatives, who attended the conference in Ottawa, at a subsequent meeting, felt that a provincial Conference should be organized along similar lines to discuss local problems and an organizational committee was formed under the chairmanship of Miss Mabel Matheson.

C. F. BENTLEY

"The conference is being sponsored by Boards of trade, Council of Labour, Provincial Home and School Assoc. Federation of

Agriculture, Women's Institute Assoc. I.O.D.E., P.E.I. Teachers Federation, School Trustees and Canadian Legion.

Says Sulphur Production Tied Up With Natural Gas Export

CALGARY (CP)—W. J. Mickie of Calgary, managing director of the International Sulphur Company, says Western Canada has vast reserves of sulphur that can be profitably produced.

But, he told the Calgary branch of the Chemical Institute of Canada, sulphur production will not hit its peak until the export of natural gas is approved. He said he hopes the Alberta government will not settle for a "weak compromise" on the gas export issue.

Mr. Mickie said an important new study is being undertaken by one Western Canadian company into the feasibility of piping hydrogen sulphide gas to Vancouver. If this should prove possible, he said, there would be advantages to both producer and consumer.

LAKEHEAD PIPELINE? Mr. Mickie said also the possibility of a sulphur gas pipeline to the Lakehead to make use of the new St. Lawrence Seaway is being studied.

Sulphur, a by-product of natural gas, is a pale yellow non-metallic element used chiefly in making gunpowder, matches, vulcanite, sulphuric acid and in medical treatment of skin disease.

Mr. Mickie said Alberta alone can produce 1,600,000 tons of sulphur annually on the basis of a 330-day year.

Discussing potential markets for Alberta sulphur, he said an annual market for 500,000 tons of sulphur could be found in the northwest United States and in Western Canada.

An additional 225,000 tons could be used in India, 200,000 tons in Australia, 100,000 tons in New Zealand, 50,000 tons in South Korea and 50,000 tons in the Philippines, Burma and Indonesia, China, because of the political climate, is a question mark.

Mr. Mickie urged sulphur producers to seek customers now, before the potential purchasers make commitments to obtain sulphur elsewhere.

U.S. Congress Has 'Final' Say On Weapons For Here

WASHINGTON (CP)—U.S. officials said Monday night the Congress has the final say on whether the United States can release atomic weapons for use by Canada's armed forces.

Under U.S. atomic law as it now stands, the Eisenhower administration could not release such weapons to Canada even if it wanted to. It would have to seek congressional approval before any such step could be taken.

Amendments written into the U.S. Atomic Energy Act by the last session of Congress provides that the U.S. government can supply atomic information, weapons and their components only to allies which already have made substantial development in the production of atomic arms. As of now, Britain is the only Western nation eligible under the terms of the legislation.

The official, commenting on an announcement that the Canadian army had asked the Ottawa government to obtain U.S. atomic weapons for its forces, said any Canadian request, if it comes, will have to be referred to the session of Congress opening early in January, for approval.

Seek To Beat Bomb Hoaxers

LONDON (Reuters)—All British Overseas Airways Corporation airlines at London Airport are being treated as top security flights in a battle to beat bomb-hoaxers, the airline said Monday.

A new order that every airliner must be fully guarded night and day is paying dividends in cutting down time wasted on searches to passenger baggage only. But other airlines, including Trans Canada, still are being troubled by anonymous phone calls, the airport said.

Officials now know that the only way a bomb can get past the guard is in the baggage.

OPEN TELEX SERVICE VANCOUVER (CP)—International Telex service between Japan and Canada was inaugurated Wednesday in ceremonies here. The new overseas teleprinter service will operate between the Vancouver office of the Canadian Overseas Telecommunications Corporation and the Tokyo office of Japan's overseas telecommunications system.

PROPERLY PRESENT HENDON, England (CP)—Police who drove to a bank in this Middlesex town when the burglar alarm rang were admitted by the intruders-workmen.

Bad Weather Cut World Food Output

ROME, — (Reuters) — Bad weather was the main cause of a slight decline in world agricultural output in 1957-58, the United Nations Food and Agriculture Organization said in its annual report Tuesday.

But national agricultural policies and growing surpluses in the more developed countries were longer-term influences that led to the decline in production at a time when food shortages persisted in many parts of the world, it added.

The most dramatic changes in agricultural policy took place in Russia.

An appeal from the government to state farm workers in March, 1957, resulted in a 65-per-cent increase in the cultivable area of these farms, a 73-per-cent increase of between 68 and 100 per cent in the number of pigs, cattle and sheep.

An FAO index showed that world per capita agricultural production fell to 107 in 1957-58 from 109 in 1956-57, taking 1953 production as 100.

He observed that William McNamara, head of the Canadian wheat board, also believes that a 300,000-bushel target can be reached.

Mr. Churchill and Mr. McNamara will visit a number of West European points, discussing sales with wheat and flour buyers.

Mr. Churchill also said he is not sure if he will be able to attend the Geneva meeting of the General Agreement on Tariffs and Trade Oct. 16. Some other officials may have to represent him.

At the meeting proposals may come up to provide greater protection for food-exporting countries, hard hit by import restrictions and "dumping" of surpluses, upsetting their traditional markets.

ANGRY WAITER TYNE MOUTH, England (CP)—Chinese waiter Tin Fong was fined £2 in this Northumberland community for hitting a dissatisfied customer over the head with a rolling pin.

Canada Expects Heavy Wheat Export Business

OTTAWA (CP)—Trade Minister Churchill Tuesday forecast that Canada will export at least 300,000 bushels of wheat in the current crop year.

Preparing for a three-week wheat selling mission in Europe, Mr. Churchill recalled in an inter-

Red Trawler To Call At Halifax

HALIFAX (CP)—The Russian fishing trawler Gtulevsk was bound for Halifax Tuesday to pick up a woman crew member brought to the port for hospital treatment two weeks ago.

The patient—Mrs. Gelina Travoronkova was reported fully recovered after her illness, the nature of which was not disclosed. The trawler is due today and will return to the fishing banks.

ANGRY WAITER TYNE MOUTH, England (CP)—Chinese waiter Tin Fong was fined £2 in this Northumberland community for hitting a dissatisfied customer over the head with a rolling pin.

"Hey... what smells so good?"

It's early. He's drowsy. Then—ahh!—a coaxing aroma reaches him! The first sip...and life is good! Chase & Sanborn, with the most inviting aroma of all the coffees, is naturally the most delicious. Please him every breakfast-time with your wonderful Chase & Sanborn!

IN MEMORIAM

THOMAS B. HAMMILL

There passed away suddenly near his home in North Carleton on July 22, 1958, Thomas Bartholomew Hammill. His death came as a shock not only to his family, but the community as well.

Tommy as he was better known was born on August 29, 1940 the son of Mr. and Mrs. John Hammill.

On the evening of his death he was playing softball when he suddenly collapsed. Every possible aid was given him but to no avail. God who knows best chose to take his young soul peacefully to his eternal reward.

Tommy lived with his parents where for the past two years he worked with his father on the farm.

Although always of a quiet nature, Tommy was liked by those who were acquainted with him. He was of good character, honest and dependable. In the home he was a kind, loving son and brother. Among his young friends he was a Christian gentleman.

He was a lover of sports and played both Hockey and Softball with the team in the community. Tommy was a devoted member of the Roman Catholic Church and served as altar boy for four years. He received the last rites of his holy mother the church by Rev. Austin Bradley.

He leaves to mourn besides his sorrowing parents three sisters; Pearl, Patsy, Frances and an only brother Jimmie.

The largely attended funeral was held from his home to St. Peter's Church, Seven Mile Bay, where Requiem High Mass was sung by Rev. R. F. MacDonald, P.P. Present in the sanctuary were: Rev. Austin Bradley, curate, Seven Mile Bay, Rev. Preston Hammill, St. Dunstan's Basilica, and Rev. Thomas McKenna S.S.J., New Orleans.

The pallbearers were Harold MacQuarrie, Garnet Lowther, Harold Murphy, Freddie Cormier, Fulton Hammill and Reggie Hammill.
