

THE SMALLPOX.

NEW CASES.

Since yesterday the following cases have developed and orders were issued this morning for their removal to the hospital:

- Mrs. Owen McCarey, Fitzroy Street.
George Way's family (father, daughter and son) infected, with Mrs. Way to take care of them.
A child of Mr. N. McCallum, Long Street, with mother to take care.
Mrs. O'Hare, Long Street, with two sons not yet ill to be workers in the hospital.
A young woman at William Williams', Euston Street.

REPORTED OR SUSPECTED CASES.

The following cases have been reported at the Health Office, but have not yet been reported upon by the physicians:

- Mrs. James McQuaid, corner of Great George and Fitzroy Streets.
Miss Whear, daughter of Mr. John Whear, Kent Street.
Miss Smith, Euston Street.
Another girl at Rockin House.
Another Miss Manley, Great George Street.
Mary Ann Mullins, Long Street.
A son of Mr. Fred. Ailing, Upper Great George Street.
Mr. Corney, a patient in P. E. Island Hospital, (very doubtful)

NOT CASES.

The following persons reported at the Health Office yesterday as suspected cases were found to be free from the disease:

- J. Carmody, near Gas Works.
The girls, Great George St.
The girl at Mr. Alfred P. Larga's.
Mr. Thompson, Euston St.

CONDITION OF PATIENTS TO-DAY.

- Arthur Strong is out of bed to-day.
Miss Wave, a little better.
Mrs. Redmond, a little better.
Miss Gunn, slightly better.
Mr. Pickard, more feverish, but doing very well.
All others doing well.

THE SOURIS CASE.

Miss Welsh, the smallpox patient, is doing well. No other cases are reported at that place.

A WARNING.

Cats and dogs found prowling around streets and yards, should be at once killed and buried, as contagious diseases are frequently carried by them from house to house, the fur of cats forming a particularly favorable medium for their transmission.

MANIFESTO FROM DR. JOHNSON.

HEALTH OFFICE, NOV. 14th, 1885. To the Merchants and other Citizens of Charlottetown:

I was much surprised yesterday to be informed that the impression was abroad that the regulations of the Health Office require the closing for six months of stores suspected of being contaminated by the presence therein of proprietors or employees who have been actually seized with the smallpox.

That impression was made, I suppose, by the facts that Mr. Brenton Dawson is attacked by the disease, that the store of W. E. Dawson & Co. is closed, and the clerks isolated.

Immediately upon being informed at the time of my visit to his home, that his son was attacked with the disease, Mr. Dawson, absolutely of his own accord, gave orders for the temporary closure of his business premises, and they are so closed for no other reason. His business establishment is not isolated by the authority of the Health Office.

The question of a general closing of the shops was brought before me yesterday by a most intelligent representative of the Merchants of the city, and was left by me to be decided entirely by and amongst themselves, the advice being given them to fumigate their stores with sulphurous acid gas every night, and to recommend that practice generally.

I am not of the opinion that anything would be gained, in a sanitary point of view, by a general closing of the stores, but am sure that a great deal of unnecessary inconvenience would result therefrom.

I would express my conviction that, widespread as the infection of smallpox evidently is, it is now under control, and that it has received a check which it cannot easily, if at all, pass by the force of the opposing vaccine diseases, as the result of the intelligent yielding of the citizens generally to inoculation with the vaccine virus.

I write in haste and remain, Your obedient servant, RICHARD JOHNSON, Health Officer.

REGULATIONS.

The following are the regulations made to-day for the disinfection of houses:

In the selection and use of disinfectants Health Officers will be guided by the recommendations made in the printed circular issued by the authority of the Board of Health.

The Health Officers' depot of disinfectants and apparatus will, for the present, be at the house vacated by Mr. Lemuel Music, Great George Street.

The Health Officers will constantly provide all isolated houses with disinfectants and give instructions as to their use.

Houses from which smallpox patients have been removed will be fumigated with sulphurous acid gas as soon as possible, and provision to be made for the removal of anything therefrom.

All linen clothing and bedding, and all blankets which are to be retained will be prepared for washing by being immersed for at least two hours in chlorinated water, and all woollen clothing and carpets will be sprinkled with carbolized water before being hung out in the open air.

All articles which are to be destroyed will be removed to the People's Cemetery, to be burnt or buried in the pit prepared therefor.

All papered rooms occupied by smallpox patients will be stripped, and the walls and ceilings well white-washed, and the floors and wood work well scrubbed, which will complete the process, all of which will be conducted under the supervision of a Health Officer.

RICHARD JOHNSON, M. D., Health Officer.

THE SITUATION IN SOURIS—VIGOROUS ACTION. A correspondent at Souris, writing Nov. 18, says:—

"You will please inform the public that there is as yet only the one case of smallpox in Souris or vicinity."

Two men were to-day brought before J. R. McLean and James Keefe, J. P.'s, for refusing to obey orders of Board of Health. One was Richard Melnia, who was fined \$5 and costs or one month's imprisonment; the other was John Melnia, who was fined \$5 and costs or one month's imprisonment.

On Sunday last, about one hundred and fifty persons marched from the village to the Marine Hospital and took charge of it, and turned out the keeper and put the smallpox patient in. We hope to keep it confined to one place."

PRECAUTIONS AT CRAPAUD.

The members of the Board of Health at Victoria, Crepaud, are doing everything that possibly can be done to hinder the spread of the smallpox in that vicinity and surrounding districts. The most active workers are: D. W. Palmer, S. J. B. Leard, Esq., H. W. Robertson, M. D., and Mr. Archd. Shaw. They particularly deserve the thanks of the people of this and adjoining districts for their prompt action.

In fact, they give all or nearly all their time day and night since Saturday last, in their endeavors to stop the spread of the disease. They have flagged some seven or eight houses at other Parquharos called or slept, and other places suspected. As

yet nothing serious has occurred, the doctors promptly reporting.

PRECAUTIONS AT CAFE TRAVERSE.

The members of the Board of Health at Cape Traverse, viz.: John Bell, Isaac Clark and Arthur Irving, Esqs., are acting promptly and energetically to prevent the spread of smallpox at the Capes. As yet no cases are reported.

THE BOARD OF HEALTH AT VICTORIA.

BOARD OF HEALTH OFFICE, Victoria, Nov. 18, 1885.

At a meeting of the Board, at this office, at this date, members present: Messrs. D. W. Palmer, S. J. B. Leard, Arthur Irving, Isaac Clarke, Esq., Archd. Shaw, and H. W. Robertson, M. D. The following resolution was moved by S. J. B. Leard, Esq., and seconded by Archd. Shaw, Esq., that:—

Whereas, The smallpox is now prevalent in Montreal, Pictou, Charlottetown and other parts of the Dominion of Canada.

Resolved, That it be an order of this Board that all parents and guardians of children within our precincts have their children vaccinated forthwith, and that all persons who have not been vaccinated within the past seven years, be now vaccinated or re-vaccinated as the case may be—vaccination at the discretion of the medical superintendent vaccinator.

2nd. Resolved, That in the event of any person or persons neglecting or refusing to comply with the above order, legal proceedings be taken to enforce the same.

3rd. It is Further Ordered, By the Board that anyone taking down or interfering with the yellow flag when hung out from any building by order of this Board, or either of the Health Officers, shall be immediately arrested and punished as the law directs.

4th. It is Further Ordered, By this Board that all public gatherings be discontinued for fourteen days from this date, and that the Victoria, Crepaud, Hampton, Iron, Augustine Cove and Cape Traverse Schools be closed for fourteen days from this date.

5th. Moved by S. J. B. Leard, and seconded by Isaac Clarke, Esq.:

That the Chairman of this Board be instructed to write the Ministers and Priests of the different congregations in our precincts, requesting them to hasten any services in their respective churches for the five Sabbaths next ensuing.

Carried unanimously.

6th. Moved by S. J. B. Leard, and seconded by Isaac Clarke, Esq.:

That the Chairman of this Board be instructed to write the Ministers and Priests of the different congregations in our precincts, requesting them to hasten any services in their respective churches for the five Sabbaths next ensuing.

Carried unanimously.

7th. Moved by S. J. B. Leard, and seconded by Isaac Clarke, Esq.:

That the Chairman of this Board be instructed to write the Ministers and Priests of the different congregations in our precincts, requesting them to hasten any services in their respective churches for the five Sabbaths next ensuing.

Carried unanimously.

8th. Moved by S. J. B. Leard, and seconded by Isaac Clarke, Esq.:

That the Chairman of this Board be instructed to write the Ministers and Priests of the different congregations in our precincts, requesting them to hasten any services in their respective churches for the five Sabbaths next ensuing.

Carried unanimously.

9th. Moved by S. J. B. Leard, and seconded by Isaac Clarke, Esq.:

That the Chairman of this Board be instructed to write the Ministers and Priests of the different congregations in our precincts, requesting them to hasten any services in their respective churches for the five Sabbaths next ensuing.

Carried unanimously.

10th. Moved by S. J. B. Leard, and seconded by Isaac Clarke, Esq.:

That the Chairman of this Board be instructed to write the Ministers and Priests of the different congregations in our precincts, requesting them to hasten any services in their respective churches for the five Sabbaths next ensuing.

Carried unanimously.

11th. Moved by S. J. B. Leard, and seconded by Isaac Clarke, Esq.:

That the Chairman of this Board be instructed to write the Ministers and Priests of the different congregations in our precincts, requesting them to hasten any services in their respective churches for the five Sabbaths next ensuing.

Carried unanimously.

12th. Moved by S. J. B. Leard, and seconded by Isaac Clarke, Esq.:

That the Chairman of this Board be instructed to write the Ministers and Priests of the different congregations in our precincts, requesting them to hasten any services in their respective churches for the five Sabbaths next ensuing.

Carried unanimously.

13th. Moved by S. J. B. Leard, and seconded by Isaac Clarke, Esq.:

That the Chairman of this Board be instructed to write the Ministers and Priests of the different congregations in our precincts, requesting them to hasten any services in their respective churches for the five Sabbaths next ensuing.

Carried unanimously.

The temperature above mentioned is effective for the destruction of all disease germs which do not form spores; and there is good reason to believe that this list includes smallpox. Moist heat is far more effective, and it is demonstrated that ten minutes exposure to steam, at a temperature of 230 degrees Fahrenheit, will destroy all known disease germs, including the most refractory spores.

DISINFECTING OF THE SICK-ROOM.—In the sick-room no disinfectant can take the place of free ventilation and cleanliness. It is an axiom in sanitary science that it is impracticable to disinfect an occupied apartment, for the reason that disease germs are not destroyed by the presence in the atmosphere of any known disinfectant in respirable quantity. Bad odors may be neutralized, but this does not constitute disinfection in the sense in which the term is here used.

When an apartment which has been occupied by a person sick with an infectious disease is vacated, it should be disinfected. But it is hard to secure a perfect vacuum in a room, and it is better to turn contaminated air out of the window, or up the chimney, than to attempt to purify it by the use of volatile chemical agents, such as carbolic acid, chlorine, etc., which are all more or less offensive to the sick, and are useless so far as disinfection—properly so-called—is concerned.
