illness, four fire engines raced to the fire and extinguished it before it spread. (AP Wirephoto via cable from London)

resign in 1916 after faulty Ross rifles caused a scandal.

In December, 1961, then Prime Minister Diefenbaker announced he had asked Senator Henri Courtemanche to resign from the Upper House.

Previously state secretary in the Diefenbaker cabinet, Senator Courtemanche was accused of having accepted more than \$60,000 in return for obtaining provincial grants for Jean Talon Hospital in Montreal.

WAS ORGANIZER
Mr. Dupuis, son of a former member of the Quebec legislature, has been an active election organizer and campaigner since his student days.

He entered the legislature himself as member for Montreal St. Marie in 1952 at 26 and soon became one of Premier Maurice Duplessis' most outspoken critics. He was defeated handsily in the 1962 and 1963 elections. Reportedly as a reward for stumping Quebec in a one-man crusade against Mr. Caouette's group in the 1963 campaign, he was elevated to the cabinet by Mr. Pearson on Feb. 3 of last year.

The Toronto Star reported Friday the RCMP is investigating a secret report on an application for a racetrack that would be located in Mr. Dupuis' riding. Rumors about this report have been circulating in Ottawa for several weeks.

Mr. Dupuis complained in an interview a month ago English- and French-language newspapers were making a "concerted effort to smear French-Canadian members of Parliament and ministers."

INSINUATIONS CHARGED
He said "malicious insinuations" in certain press reports were part of a "plot" to discredit political leaders from Quebec.

Mr. Dupuis, married and the father of four children, took a salary cut to \$18,000 from \$26,000 annually with his dismissal from the cabinet.

Since November, three other cabinet ministers from Quebec and Mr. Rouleau have become involved in allegations of poor judgment or incompetence.

Nov. 23, Conservative MP Erik Nielsen accused Justice Minister Favreau and Immigration Minister Tremblay "of covering up" for three months allegations of attempted bribery and political coercion against ministerial assistants.

The next day Mr. Rouleau, MP for Montreal Dollard and chairman of the Commons Liberal caucus, complied with Mr. Pearson's request he resign as parliamentary secretary to the prime minister. Mr. Rouleau told the House he had made normal representations to obtain the release on bail of narcotics suspect Lucien Rivard.

JUSTICE NAMED
A few days later, the government named Chief Justice Frederic Dorian of Quebec as a one-man commission of inquiry to probe the allegations. Hearings are continuing in Montreal.

Dec. 8, State Secretary Lamontagne and Mr. Tremblay told reporters they purchased thousands of dollars worth of furniture without down payments from a now-bankrupt Montreal furniture store. They described the transactions as normal but were criticized in the Commons for placing themselves in possibly compromising positions.

Dec. 18, Mr. Tremblay informed the Commons External Affairs Minister Martin, while in the opposition, made representations with the immigration department in 1960 and 1961 on behalf of Maria figure Onofrio (Nona) Minado, then facing deportation to his native Italy.

He said Mr. Martin informed the department he wished to disassociate himself from the Minado case in September, 1963, because of certain information received about Minado.

Mr. Martin said in a Christmas Eve statement he made routine dealings in 1960-61 for Minado, before learning about his background and received a normal legal fee.

Red Cross Annual Scheduled Feb. 16

This year's P.E.I. Red Cross annual meeting will be held at Confederation Centre Tuesday, Feb. 16, in accordance with the decision reached at the January meeting of the Red Cross executive held this week.

Arrangements for the annual meeting sessions which are to take place in the afternoon and evening are being made by a committee composed of Mrs. F.W. Hyndman, Mrs. L.E. Prowse and Iphigene Arsenault. Guests of honor at the dinner meeting which will commence at 6.30 will be Red Cross volunteers who have completed and recorded 100 or more hours of service during 1964, and who will officially become members of the Red Cross "Centenary Volunteers Club" at this function.

The day's proceedings will get underway at noon with a "disaster institute" which will be attended by the chairmen and other members of the 13 Red Cross disaster committees located at Tignish, Alberton, O'Leary, Ellerslie, Wellington, Summerside, Borden, Kensington, Charlottetown, Eglon, Montague, Morel and Souris.

The finance committee, headed by W. Jenkins, acknowledged receipt of a list received from the P.E.I. United Fund giving the names of contributors who had designated portions of their United Appeal donations specifically to Red Cross. Also reported was the receipt of a bequest of \$2,772 representing the residue of the estate of the late Mrs. Penelope Colgan which she bequeathed to the P.E.I. Red Cross. The finance committee was urged to make every effort to obtain further bequest funds.

BLOOD CLINICS
In reporting on the result of the 1964 blood donor clinics which achieved 90.5 per cent of their objective, as against 97.5 per cent, in 1963, the provincial chairman, F.A.S. Jones, announced that the 1965 blood donor clinics in Charlottetown will be held at the Confederation Centre. The first series is tentatively scheduled for March 30 and 31 and April 1.

Other chairmen who reported at the meeting included, Mrs. F.W. Hyndman for women's work; Mrs. L.E. Prowse for voluntary services and Cyril Finn for public relations.

Reefer Shortage Prompts Wire

SOURIS — John Mullally, Kings MP, said yesterday he has wired J.W. Pickersgill, federal minister of transport, alerting him to the shortage of refrigerated railway cars for Island produce shippers.

He said he talked with transportation officials in the province on the reefer situation, and sent the telegram yesterday morning.

Urging the minister to give the matter his "full and immediate attention," the telegram says the shortage of reefers "threatens to do damage to a valuable potato industry."

It also states that potato shippers say a certain 1,000 cars are needed in the next 10 days, and that the Canadian National Railway office in Charlottetown had orders Thursday for 240 cars, which could not be supplied.

First Baptists Plan Feature Film

On Sunday, Jan. 24 at 8.30 p.m. the first "God's Country" starring Tony and Kerry Fontane will be shown at First Baptist Church. This is the first of the monthly Fireside Hour.

"God's Country" is a feature-length motion picture epic filmed in Eastman color. In a message of faith and freedom, it presents the living reality that the answer to life and the hereafter is found only in the person of Jesus Christ.

"God's Country" allows the viewer to enjoy the American Day Parade, the county fair and the interesting, yet humorous, home life of immigrants Grandpa Fontane and Uncle Louis as they become American citizens. Yet it portrays Washington, D.C., Niagara Falls, the Grand Canyon, the Liberty Bell and the other, historic areas of America.

"God's Country" follows the tradition of the Tony Fontane Story, Gospel Films' first full-length, dramatic musical. Like the first this film combines the voice of Tony Fontane with a combination of drama, humor and pathos. Tony Fontane sings "Battle Hymn of the Republic," "America the Beautiful," "The Old Rugged Cross" and a

duet with Grandpa Fontane in "My Country 'Tis of Thee" exemplifies music, the language of the soul.

The public is invited to attend this great Christian Film.

Lr. Montague United Church Holds Annual

MONTAGUE — The annual meeting of Lower Montague United Church congregation opened with scripture reading by the minister, Rev. Russel Burns, who presided.

The minutes of the last annual meeting were read by the secretary, Mrs. Chessel Annear, and approved.

A favorable financial report was given by the treasurer and other committees presented their reports.

New officers were elected and committees appointed to replace those retiring.

Mr. Burns, speaking briefly, thanked everyone for their continued support and co-operation. Lloyd Collins moved a vote of thanks to Mr. Burns for his spiritual guidance during the year.

This Year's DDF Adjudicator Is Canadian For First Time

For the first time in the history of the Dominion Drama Festival, a Canadian, Guy Beaulieu of Quebec City, will adjudicate the DDF final competition to be held in Brockville, Ont., May 24 to 29. The announcement was made by the national president, John F. Brook of Simcoe, Ont., following a meeting of the DDF executive held in Montreal.

Guy Beaulieu is director of theatre for the ministry of cultural affairs of the Province of Quebec. Active in the theatre for approximately 30 years, he is a graduate of Ottawa University, Le Conservatoire National de Paris and l'Institut de Phonétique de la Sorbonne, Paris.

Following two years in England and France where he did research in theatre, radio and television, he returned to Canada to work as drama critic, actor, stage director and CBC radio and television drama producer. He is founder and honorary director of l'Association Canadienne du Theatre d'Amateur and was for two years president of the Canadian Theatre Centre.

In making the announcement, Mr. Brook added, "Mr. Beaulieu's many achievements in every area of Canadian theatre and his understanding of the problems facing young groups make him an ideal choice. The general expression of pleasure at his appointment confirms that we are coming of age in yet another way. Until last year, final festival adjudicators were invited from abroad."

Financial Increases Noted By Zion Church

Substantial increases over previous years were indicated by financial statements of the board of trustees, given at the annual congregational meeting of Zion Presbyterian Church Thursday night by William Campbell.

Ernest MacMillan, Eric MacRae, Arthur MacRae and J. H. Hill were elected to replace those whose term of office had expired.

Ralph Balderston, session clerk, read the session address and the session financial report was given by the treasurer, E. A. Cudmore.

The Conservative and New Democratic parties called for a judicial inquiry into the immigration department and the Minado case in particular. Minado (first entered Canada in 1956 and was deported last March.

Prov. Unit Urged For Fishermen

MONTAGUE BUREAU OF THE GUARDIAN

Marven Johnston, Montague, was elected president of the Southern Kings and Queens Fishermen's Association at the annual meeting held in Montague last night.

The first vice-president elected was Weir MacLure, Murray Harbor North. Second vice, John MacNeil, Murray Harbor. Three new directors appointed were William Christian, Launching, Harold Publicover (re-elected) and John Boudeault, Lower Montague.

The guest speaker Urban LeBlanc, of the extension department of SDU, congratulated the fishermen of the area for taking the lead along with the Eastern Kings association in organizing local associations.

He reported briefly on meetings held in other areas and said plans were being formulated to have the Island divided into five areas of local associations. This would make it suitable for a province-wide association. "However, it is up to the fishermen in these areas to take the lead," he said.

TWO METHODS
He outlined briefly two methods for a fishermen's association in the province, one of which would be made up of the five associations on one hand and the packers, processors, distributors on the other hand, both of which would have equal voting power.

These two organizations would come together as a P.E.I. Fishermen's Association with affiliation with the Canada Fisheries Council. However, he warned the fishermen to consider it well and make the right decision. This would, he said,

give the fishermen of the province much more control over their own affairs. At present the P.E.I. Fisheries Federation is the only organization that speaks for the Island fishermen.

The lobster trap limit, licensing, and illegal fishing were discussed and left over for a further meeting before making any motion on them.

Mr. LeBlanc, on being questioned on the trap limit question, said he felt the department of fisheries has seriously considered the trap limit but that a decision of 75 per cent of the fishermen would have to be the result before any such action would be taken.

DRAGGER DAMAGE
A long discussion took place on damage being done by Otter draggers. Some fishermen stated they were destroying the breeding grounds while others stated they were interfering with their traps during the open season. A motion which followed the discussion asking that Otter draggers be kept out of the strait from East Point to Cape George and that scallop draggers be kept out of the lobster areas during the lobster season was moved and carried unanimously.

The meeting also agreed on the opening dates of May 5 and closing date of July 5 for the next lobster season for the district of 7-B.

The association now has over 150 members and a drive is to be put on to get the remainder of the fishermen to join the group.

The meeting was chaired by the retiring president John MacNeil and Syl Yoston recorded the minutes.

MP Reports On Post Office Construction

SOURIS — John Mullally, Kings MP, has termed the new post office building under construction at St. Peter's "well advanced."

The building is being constructed by Town and Country contractors of Charlottetown.

Construction on Morel Post Office is expected to begin in the near future. It will also be built by Town and Country, who submitted a tender of \$26,127, the lower of two received.

Contract for construction of Murray Harbor Post Office has been awarded to MacLeod Brothers of Charlottetown, whose tender of \$14,950 was the lowest of five submitted. Excavation on the site has been started, and work is expected to continue without delay, Mr. Mullally said.

He stated all buildings were

being built as part of the federal government's accelerated public works building program.

Prov. Gov't Is Waiting For Causeway Details

Premier W. R. Shaw said yesterday the provincial government is waiting for a statement from the federal government on its plans in detail for the proposed N.B.-P.E.I. causeway.

The provincial Liberal party yesterday went on record as opposing a causeway without rails and construction of a causeway by a private firm, and called on the government to give details of its transportation policy.

Premier Shaw said the government has asked federal authorities for financial assistance for construction of all-weather roads where these roads are needed for industrial development.

He said areas in which development is taking place and in which there is inferior rail

service will be the first to get improved roads.

He said the government was not sure the proposed causeway would not have rails, and was waiting for a statement on that from the federal government.

"If, as Mr. Matheson suggests, rail service will be gradually phased out in the province why does his party call for rails on the causeway — they would be useless if there were no rail ways on the island."

In conclusion, the premier said, "I think the Liberals here should get in touch with Solicitor General Watson MacNaught. He apparently knows the starting date of the causeway. And if he knows that, he should know whether or not there will be railways on the crossing."</
