

YOU CAN SLEEP TO-NIGHT
AND RELIEVE NERVOUSNESS ALL DAY TO-MORROW!
 SLEEPLESSNESS, IRRITABILITY, NERVOUS TENSION, JITTERINESS
 No waiting for results! SEDICIN acts FAST. Not a Nerve Tonic, Food or Vitamin. Over 50% of the people examined by doctors are found to have nothing organically the matter with them. This does not mean that they are not sick. It means their symptoms are caused by nervous tension, that they are in high-strung, emotional. If you suffer in this way and have difficulty in learning this way to relax, SEDICIN can help you. NO OPIATES, NO BROMIDES, NO BARBITURATES. SEDICIN is the new safe tablet you've read about. SEDICIN is sold by registered druggists only but no prescription is necessary. You must be satisfied or your money back.
SEDICIN
 Sedative for Nervousness
 Two Sizes \$1 & \$4.59

IN MEMORIAM

MRS. JAMES J. TRAINOR
The death occurred at Maplewood on Saturday, August 30th of Mrs. James J. Trainor, the former Margaret Duffy of Emerald. She was aged 83. Left to mourn her loss are her husband, two sons and two daughters as well as one brother and one sister and a number of grandchildren. Her sons are J. Leslie, Emerald, John, Maplewood; daughters, Mrs. Joseph Nantes, Maplewood, and Mrs. Edward McKenna, Iona. The funeral took place to Kelly's Cross R. C. Church on Sept. 2nd and was largely attended.

IN MEMORIAM

In loving memory of our dear daughter and sister, Mrs. Wilfred Victor who departed this life September 4th, 1950.
Not a day do we forget her,
In our hearts she is always near,
We who love her sadly miss her,
As it dawns another year.
Ever Remembered by Her Father,
Mother, Brothers and Sisters.

SOCIALIST LEADER DIES FROM ILL EFFECTS OF PRISON CAMPS

Dr. Kurt Schumacher, 56-year-old leader of West Germany's Socialist party, died recently at Bonn, a victim of an acute circulatory illness for the past several months. A crippled survivor of Nazi concentration camps, Schumacher was a fighter all his life, continually trying to stamp out communism in postwar years as he had "Nazism" in earlier life. He also fought against ill health with equal passion. He was against almost every phase of Allied policy toward the federal republic. Most of all he was against the European federalism of Chancellor Konrad Adenauer.

HAMPSHIRE W. M. S.

The August meeting of the Hampshire W. M. S. was held at the home of Mrs. Norris Kitson. The meeting opened with Hymn No. 356, and Mrs. John Easton led the worship period. The theme was Christian Stewardship. Mrs. John Edwards gave a reading and several members read the Scripture. The minutes of the last meeting were read and adopted.

Roll call was answered by 11 members and there were two visitors present. Collection amounted to \$1.60 and expense fund 53 cents. During the meeting a presentation was made to Mrs. John Easton who is leaving soon to make her home in Borden. A nicely worded address was read by Mrs. Chester Edwards and a zipper Bible presented by Mrs. George Kitson. Mrs. Hibbert Tremere gave Mrs. Easton a lovely pair of towels on behalf of the Women's Institute.

The next meeting is to be held at the home of Mrs. Hibbert Tremere, Mrs. Easter to lead the worship period.
The meeting closed with the hymn "Blest be the tie that binds" and Mizpah Benediction. Lunch was served by the hostess, and a social hour brought the evening to a close.

Strange But True

By F. E. MacArthur

Cast steel had its birth in a crude forge deep in the heart of the forest. Why? Because a clockmaker was not satisfied with the steel supplied to him for making watch springs. When people failed to find out how Ben Huntsman performed this magic they sent out a spy posed as a beggar and thus got into Huntsman's home where he learned the how of making steel.

Without steel it would be impossible to span wide rivers, to have today's luxury liners, powerful trains, or towering skyscrapers. Indeed, one might say that we are living in the steel age for today industry uses steel at every turn.

Those who cry out that man's progress is downward, have failed to consider that only a little over a century ago there was not a single railroad in the world. There were no steamships, no telephones, no electric lights, no automobiles, not even matches.

Most of the people followed agriculture growing the things they needed to eat, making the clothes they wore, and what they could not do for themselves was left undone. Travelling was slow by land and sea. The result was that most persons died in the place where they were born and knowing next to nothing of the great world that lay all about them.

Modern inventions have knitted together the far-flung portions of the globe into one mighty unit. The telegraph, the cable, and radio, has put a circle around the earth that may some day be the medium of uniting the nations of the world into the long hoped for brotherhood of man. At least it is a possibility today, for the first time in history. It is not this something to look forward to?

The first message sent by telegraph contained only these four wonderful words: "What hath God wrought?" The first message sent by cable was from the Queen of England to the President of the United States, and the second one from the directors of the company in the mother country to those in New York in these stirring words: "Europe and America are united by telegraph. Glory to God in the highest and on earth peace and good will to men."

One of the early signaling devices was a cylindrical vessel filled with water and placed on a hill. Into each cylinder a cork was fitted. To the cork was attached a stick bearing numbers each of which stood for a message. When anyone wished to send a message to another he raised a torch and both men let the water escape out of the cylinders. When the number on the stick indicated the message was reached, the first fellow lowered the torch, and the second man stopped the water in the cylinder and read the message.

A more practical method of sending messages was invented in the 18th century by a Frenchman named Claude Chappe who signalled by means of signal posts spaced 11 miles apart. On clear days messages from these signal towers could be seen and read with the aid of a telescope many miles away, and a word could be sent 115 miles in exactly 15 minutes.
Ben Franklin proved that lightning and electricity are identical by experimenting with a kite in a thunder storm.

The first ship to sail around the world was Magellan's ship, the Victory with its winged figurehead of a Greek statue of Victory.

The first primer was called a hornbook. It was a sheet of paper on which were printed the alphabet and the Lord's Prayer, placed in a frame of wood and covered with a thin sheet of horn for protection. It had a handle in which was a hole for hanging it up.

Man's eye was the original of the letter "Q" in the Phoenician alphabet. The letter retains to this day the form that it had originally, believe it or not!

Originally "I" and "J" were the same letter. Indeed it was not until the 15th century that somebody gave the "I" a tail to make the letter "J".

"W" was first introduced into the alphabet by the English. Although it more nearly resembled a double V, it is called double "U" because "U" was originally identical with "V".

The above few examples will show how the ancient pictures were gradually changed into our A. B. C's.

One of the greatest things the Romans left the world was their law. In every country they conquered Roman law was established. This code became the basis of the laws of most European countries. There is no modern country that does not rely upon the system of laws worked out by the Romans so many centuries ago.

CRUELTY TO OCTOPUS

LONDON —(CP)—An animal welfare inspector investigated complaints on behalf of an octopus in London's Battersea Park Pheasant Gardens. It was alleged the animal was unable to move because it lacked room. The inspector found the octopus was made of plastic.

York Highlights

Miss Helen Lewis is spending her holiday at her home in York.

Masters Billie Rodd and Fred Burke spent Wednesday August 20th fishing in York.

Mr. Peter Proud has accepted a position at the Air Port and his friends wish him success.
