N. B. BUILDING STONE—The new parliamentary block in Ottawa is being rapidly pushed forward. About eight car loads of stone from Newcastle, N. B., are received in Ottawa every day for the building. It will require 1,000 car loads before the buildings are complete.

A BIG SUNFLOWER.—The aesthetic editor of the Pictou *Standard* has received from Mr. Alex. McIntosh's garden, in that town, a monster sunflower stalk, with blooms, which measures about 7 feet 6 inches. Mr. McIntosh has some others in his garden taller than this one—one measures about 11 feet.

FARMERS about Lyons, N. Y., are apprehensive of the loss of their potato crop by reason of a small shiny bug that has appeared there. It works its way into the hills of potatoes by going down the stalks of the plants It then eats its way into the potatoes and deposits eggs, which are hatched there.

TWO CASES of smallpox have been isolated in Ottawa. Both are French-Canadian, and both were of persons who were brought to Ottawa, after contracting the disease, to obtain proper medical treatment. There is no fear that the contagion will spread One of the parties is a woman, who it is thought will die.

Two match races were trotted at the Chatham Driving Park on Monday—Messenger Boy (formerly owned by Chief Engineer Large) against Helena, and Graybird against Mollie. Messenger Boy won the two first heats and Helena the other three and the purse of $100. The best time is said to be 2.33, but the record makes it more Mollie won one heat in her race with Graybird, and the latter the other three and the $50 purse.

THE death rate from smallpox in Montreal is on the increase and the disease has spread to a number of outlying villages. It will therefore be well for parties in Charlottetown who have not yet been vaccinated to have the operation performed immediately. Dr. Conroy, Superintendent, will attend to all who wish to be vaccinated at his office, Great George Street. To be vaccinated at present is a wise precaution against the disease.

THE GATLING GUNS.—Sir Frederick Middleton has been interviewed respecting the usefulness of Gatling guns, and questions their value in fighting civilized forces or American Indians. He says it surprised our Indians at first, but its effect was wanting. Only one man and one horse were known to be killed by the Gatling during the whole campaign. In another case Capt. Howard fired on a house three stories high, and only built of inch planks, behind which a body of rebels were lurking, with the result of one shot hitting the corner of the house, out of 18 fired. The house was afterwards found to have 50 women, children and priests in it, not one of whom was hurt.

MOST people suppose that the manufacture of tobacco consists merely of taking the leaf and pressing it into plugs. The fact is, however, that the process is a very delicate one, and the least false step will injure the flavor. The leaf must be carefully attended to for months after it leaves the planter's hands. It must neither dry too quick nor too slowly. Even after it has reached the factory the utmost delicacy of manipulation is required. The weather must be carefully studied, for if there is too much moisture in the air when it is pressed it will mould, and the same will happen if too much moisture is sprinkled upon it for the purpose of opening the leaf. Again, if it is overdried in the oven it will turn crisp, and will nip the tongue in smoking. It is by careful attention to all these points that the "Myrtle Navy" has been brought to such perfection. The firm who manufacture it have their own storehouse in Virginia, and from the time the leaf leaves the planter's hands until it is turned out of the factory, months afterwards, in plugs, it is under the care of their skilled and trusted employes.

ON ROLLERS.—The final heat in the first contest for the gold medal, was skated at the Roller Rink last evening. The audience was large and well conducted; and as the race progressed it became enthusiastic. The word "go" was given to the four contestants—Brecken, Trainor, Newsom and Taylor—at half past nine o'clock. Trainor immediately darted to the front, and took a good lead, with Brecken and Newsom fighting hard for second place, and Taylor in the rear. Shortly Brecken gave Newsom the go by, and sailed for Trainor in good style. After several hot spurts, Brecken took the lead, and increased it to half a lap on Trainor, and a whole lap on Newsom. In the meantime Taylor fell out of the heat. After a brisk contest, it was concluded in the following order:—Brecken first, Trainor second and Newsom third. Time 13½. At the conclusion of the race the victor was cheered to the echo, and the band played "God Save the Queen." The second race for the medal takes place on Tuesday next.

YESTERDAY afternoon, on the invitation of Pierce Doyle, Esq., the well-known contractor, a large number of the leading citizens of Summerside, as well as several of the fair sex, assembled at the New Dominion Building, which has just been completed and handed over to the authorities by Mr. Doyle, for the purpose of inspecting the workmanship of the structure. All without exception, and they comprised a number of good judges, expressed themselves as highly pleased with the work which, from all appearances, is substantial and well executed. The visitors having grouped themselves in front of the building a photograph was taken by Mr. Bowness which, although the weather was unfavorable, we hope it will turn out well. In the evening Mr. Doyle invited some forty of his friends to supper at the International Hotel, where an excellent spread was made by Mr. Wells, the new proprietor. John Gaffney, Esq., occupied the chair, and Finlay McNeill, R. T. Holman, and A E Clark, Esq, acted as Vice-Chairmen Among the other gentlemen we noticed Judge Kelly, Edward Hackett, Esq, M. Pentz. After thoroughly discussing the bill of fare, various toasts were proposed, and speech-making indulged in until an early hour in the morning. We hope, before long, to be able to give a more extended report of the handsome structure which Mr. Doyle has brought to so successful completion, and which, while it reflects great credit upon him, will be also an ornament and advantage to the town of Summerside.
