"THE tariff bears hardly upon the poor man," pretentiously, pityingly, declare the Opposition. Yet, as Sir Leonard Tilley pointed out, a million of dollars of the surplus had been obtained from the duties on articles not consumed by the poor man, such as wines, silks and broadcloths.—*Mail.*

THE Chinese Minister at Washington is watching the debate on the Anti-Immigration Bill very closely, and informs his Government daily of the progress made. THE Methodists of Lot 48, and representatives of other Churches, met at the residence of Mr. David Mutch, Mount Herbert, in goodly numbers, on the 2nd day of March, and after spending a pleasant evening presented the Rev. Mr. Campbell with a donation of $40. Such acts place the Minister's family on the "sunny side."

AT the meeting of the Benevolent Irish Society this morning, a resolution was passed condemning in strong terms the action of the Railway Department in refusing the Society Excursion Rates at a single fare for St Patrick's Day, a concession which they assert has constantly been granted to other Societies, and for some unaccountable reason denied to them.

PREVIOUS to his departure a few days ago, for Dakota, Mr. J. Edward Lawrence was waited on by the members of his Sunday School Class No. 8, Methodist Brick Church and presented with a beautiful "Illustrated Bible Biography," accompanied with an appropriate address. Mr. Lawrence carries to his new home in the West the esteem and respect of many friends. We wish him success.

THE Entertainment given by the members of the Educational Institute last evening was quite successful. Rev. K. Maclennan, President of the Institute, delivered an interesting address on genial topics; the musical part of the programme was well conducted, and Miss Maria Lawson read a clever original essay, which is very highly spoken of. The audience, which was a large one, dispersed, well pleased with the entertainment.

A MEETING to discuss "Winter Communication" was held at Freetown, on Tuesday, the 7th instant. It was addressed by Hon. Stewart Burns, A. E. C. Holland, Esq., M. P. P., Dugald Wright, Hiram Trueman, Malcolm McFarlane, Esqs. A resolution was passed instructing our representatives to urge upon the Dominion Government the necessity of immediately building the branch railways to the Capes, and to make improvement in carrying the mails across the Straits. A resolution expressing the opinion that Freetown was the best junction for the branch railway was also passed.

BRIDGE ON FULLERTON'S CREEK.—On Wednesday evening last, a large and influential meeting of Electors of Lots 48, 35 and 36 was held in the Fullerton's Marsh School House, at which a resolution was unanimously passed, asking for a bridge over Fullerton's Marsh. The importance of this work must be apparent to every person at all acquainted with that part of the country. This bridge would shorten the route to Charlottetown by an average distance of four miles, for, perhaps, nearly a thousand people. While we would strongly oppose the construction of wharves and bridges of doubtful utility, a work such as this should be undertaken without delay. After the bridge matter was disposed of, the meeting was addressed on the political situation by the Provincial Secretary, Messrs Munn, McMillan, D. A. McDonald and Farquharson. We are pleased to learn that the feeling of the meeting was decidedly favorable to the Government, the *Patriot's* statement to the contrary notwithstanding. There was not one expression of hostility to the Government from any elector, but there were, on the other hand, expressions of approval from former opponents. Our informant says that a resolution of confidence in the Government would, if offered, have been carried unanimously. The Opposition candidate was strongly supported in this place at the last election.

THE public are most cordially invited to attend the Young Men's meeting to-night, in the parlors of the Young Men's Christian Association, at eight o'clock. Strangers always welcome.

"The Hon. Mr. Ross has found it necessary to resign his seat in the Cabinet of Quebec. It is said that he was squeezed out. This is the second English speaking member that has been "scrooged" out of the Government of Quebec in a few weeks. This gives coloring to the report that there is a kind of know nothing movement in Quebec, the object of which is to keep Quebec for the French."

THE above paragraph is from the *Patriot* of the 6th inst. We are informed by a correspondent that the Mr. Ross referred to above is "a *pure* Frenchman with an English name." This "gives coloring" to the fact that the *Patriot* "knows nothing" about many things of which it hesitates not to speak as one having authority.

ST. PATRICK'S DAY.—This being the anniversary of Ireland's Patron Saint St. Patrick—it was, as usual, celebrated by the Irishmen of this city. The members of the Benevolent Irish Society—the oldest Society in the Province—met at St. Patrick's Hall. In regalia, carrying banners and headed by the Band of the 82nd Battalion, they marched from the place of starting to St. Dunstan's Cathedral, where Pontifical High Mass was celebrated by Father Grant, Father Boudreault being Deacon, and Father Corbett Sub-Deacon. The Cathedral was thronged during the service. Father McGillivray, P. P., preached an eloquent sermon suitable to the occasion, and a collection in aid of St. Vincent de Paul Society, amounting to $75, was taken. After service the procession reformed, and paraded the different streets to the Hall. In the evening at 4 o'clock a meeting of the B. I. Society, St. Patrick's T. A. Society, and the Charlottetown Branch of the Irish National Land League, was held in St. Patrick's Hall, and resolutions, asking the Dominion Government to petition Her Majesty the Queen to grant self-government to Ireland, and to release the suspects now in British prisons, were adopted. To-night a grand literary and musical entertainment, in aid of the poor, will be given in Market Hall, under the auspices of the Benevolent Irish Society. The following is the programme:—

PART I.

Irish Jig,	Joseph P. Moan.
National Anthem,	Band of 82nd Batt.

The Future of Islam.

I conceive that the fall of the Ottoman Empire and the annexation of its Turkish provinces would be a mere political loss of so much territory to Islam. It would involve moral consequences far greater than this for the whole Mussulman world of North-western Asia. I have the authority of the most enlightened of modern Asiatic statesmen in support of my opinion that it would be the certain death-blow to Mohammedanism as a permanent religious faith in all the lands west of the Caspian, and that even among the Tartar races of the far East, the Sanito Mussulmans of Siberia and the Khanates, and as far as the Great Wall of China, it would be a shock from which Sunism in its present shape would with difficulty recover. What has hitherto supported the religious constancy of orthodox believers in those lands formerly Ottoman which have become subject to Russia has been throughout the consciousness that there was still upon the Russian border a great militant body of men of their own faith ruled by its acknowledged spiritual head. The centre of their religious pride has been Constantinople, where the Sultan and Caliph has sat enthroned upon the Bosphorus, commanding the two worlds of Europe and Asia, and securing to them communication with the holy places of their devotion and the living body of true believers. Their self-respect has been maintained by this feeling, and with its fidelity to their traditions. Moreover, the school of St. Sophia has been a fountain head of religious knowledge, the university at which the Ulema of Kasan and Tiflis and Astrachan have received their spiritual education, while, at all times, religious personages from Constantinople have travelled among them, keeping alive the recollection of their lost allegiance. On this basis their faith has retained what it has of loyalty in spite of the political Russianizing they have undergone; but with their political centre destroyed, they would be as sheep without a shepherd, scattered in little groups here and there among a growing Christian population, and shut out from the fold of their belief. Constantinople is the assembling place of pilgrimage for all Mohammedans west of the Ural Mountains, who reach it by the Black Sea, and could never be replaced to them by any new centre further south among the Arab races, with whom they have little sympathy or direct religious connection. A Caliph at Mecca or Egypt could do nothing for them, and the Turkish-speaking Sunites would have no university open to them nearer than Bokhara. In this respect they would find themselves in a far worse position than the Moors, however universally these may become subject to Europe, and their religious disintegration would be a mere question of time. I believe, therefore, that Islam must be prepared for a loss, not only of political power in Europe and in Western Asia, but also of the Mohammedan population in the Ottoman lands absorbed by Russia. It will be a strange revenge of history if the Ottoman Turks, whom Europe has for so many centuries held to be the symbolic figure of Mohammedanism, shall one day cease to be Mohammedan. Yet it is a revenge our children or our grandchildren may well live to see.—*The Fortnightly Review.*

REPORT on the LORNE HIGHLAND WHISKEY:

"We have visited the bottling stores of Greenlees Brothers, and have selected from the vats, samples of their Lorne Highland Whisky, and have subjected them to careful examination and analysis. The samples were very fragrant, mellow, and of pleasant flavor, and possessed all the characteristics of pure and well-matured Scotch Whisky of the first quality."

MORE LIGHT!

THE Charlottetown Gas Light Company have imported some of "BRAY'S BURNERS," which they will supply and fit on Gas Brackets, etc., at a moderate cost to consumers.

These Burners are reported to be the best Flat Flame Burner yet produced, and will give a far greater amount of light than any other Burner with the same consumption of Gas.

Dr. Wallace, F. R. S. E., F. C. S., Gas Examiner to the City of Glasgow, in a lecture delivered by him, calculated that £130,000 ($650,000) a year are thrown away in Gas, grow by the use of imperfect fittings. On the subject of Gas Burners he says: "Another and as I think a better Burner is that called Bray's regulator, and as I consider these the best union Burners attainable at moderate cost, I have selected them for a series of experiments.

The Report of the Committee of the British Association of Science to enquire as to the best means for the development of light from Coal Gas of different qualities—comprising Dr. William Wallace, Professor Dittmar, and Mr. Thomas Wills, F. C. S., F. I. C. E., showed that Bray's Burner's yielded the greatest amount of light of all the two or three score of Burners reported upon which included all the Burners of repute in the market.

In a pamphlet upon Light and Heat, published by R. B. Tater, A. M., he says: "The cost of Gas as compared with other illuminants is much more economical when rightly used, than many suppose. From experiments made for this purpose, the following results have been obtained. They were made by burning samples of Devoe's Brilliant Oil and ordinary Oils, and testing their illuminating power. It was found that Coal Gas costing one cent at $3 per thousand feet, gave a light equal to 18 candles, while Devoe's Brilliant Oil consuming 27.4 grammes costing half a cent, gave a light equal to 9 candles.

"A good Argand or Johnson's Burner, the Burner's used in the last experiment, will therefore give the light of 2 ordinary Oil Burners in direct comparison, at no greater expense in the case of the finer and safer grades of Oil. Lights, however, on the authority of scientists, are not to be compared in direct proportion, but in proportion to the squares of their powers, and such a comparison with the case of the use of Gas, its cleanliness, freedom from odor and dangers, renders its use desirable wherever it can be introduced."

As the above experiments were made with Gas at $3 per 1000 feet, and not consumed through Bray's Burners, it will readily be seen how much more economical it is to consume Gas instead of Oil, when its price is only $2 63 per 1000 feet as now charged here when consumed, more especially through Bray's Burners.

Messrs. Goodwin & Co., of Philadelphia, the well-known manufacturers of Scientific instruments for testing the illuminating power of Coal Gas, etc., say in their Circular to Gas Companies: "In presenting the Bray's Standard Patent Slit Union Burners and Lanterns, for which we are the sole Agents in the United States, to the attention of the public, we are convinced that we are filling a want long felt." They further add: "The yield of light from these Burners is 12 to 20 per cent. greater per cubic foot of Gas consumed than that from any flat flame Burner hitherto introduced.
