CHEAPNES & QUALITY ARE OUR TWINS. Come and get yours photographed by C. LEWIS.

As a Flesh Restorer, Putna's Emulsion has no equal, giving substance and tone to the wasted muscles.

TEETH \$10 per Set. Partial Sets, \$2 and upwards. Gold and Porcelain Crowning. Best material, best workmanship, best satisfaction.

For Sale or To Rent The well-known Business Stand, the "Central Hotel," formerly the "Railway House," situated on Richmond Street.

McKinnon's English Ointment. Mr. NEIL McKinnon.—Dear Sir,—For five years I was a sufferer from eczema. Physicians could not help me. At last I bought a box of your Ointment, which helped me wonderfully, while two boxes made a complete cure of me. I can conscientiously say you are the only one who ever extracted a tooth for me without pain. Truly yours, MRS. J. DEVEREAUX, Kelly's Cross, May 31, 1895.

DR. J. P. MURRAY, 125 Queen Street, Charlottetown.

THOMAS CAMPBELL, 223-246 & wky

W. B. MALLETT HAIR DRESSER. Having lately renovated and refitted my Shop, I am now prepared to give satisfaction in all kinds of Barber work.

Shaving, Hair Cutting & Shampooing. My shop is now prepared to give satisfaction in all kinds of Barber work.

DODD & ROGERS', Charlottetown, July 8, 1895—135

Priestley's "Eudora" Cloth

"Eudora," is the name of the new black dress fabric put upon the market by the Priestley's, whose famous dress goods are a household word all over the world. It is like their much esteemed Henrietta cloth; indeed, it has all their merits, and a few things which they lack. It is made in black only, it is a perfect dust shedder, has extra weight and width, and, fitting easily and draping gracefully it gives a distinction to the wearer which all of Priestley's goods confer. This is their excellence, which sets them apart from all other goods. "Eudora" is stamped on "The Varnished Board," and Priestley's name is wrapped on every five yards so that ladies cannot be deceived.

THE SUMMER GIRL. The summer girl has a mania for the summer. It seems to enter to her radiant possibilities. She kindles at the mention of a hop in August, and if she is musical the tinkle of her piano playing reverberates through the house all day until the other bards are driven nearly crazy. And so it goes all summer. When autumn comes and the leaf is about to fall, and D. rathly returns to town, what has she to show for it? A little tan and a cautious heart, a promised winter correspondence with the hotel clerk, her singing some knock at ball playing, and considerable uncertainty in her mind as to whom she is engaged to, or whether she is engaged at all.—Scrivener.

Checks for the Tall-Order. The young men who stand at the foot of their classes in the graduating exercises now in progress in all the institutions of learning in the country need not fear the ordeal, after the experience of the tall order at West Point. We are told that a new student called to the superintendent to receive his diploma the applause was generous and hearty, but when the name of the cadet who stood at the foot of the class was called the audience got on its feet and fairly yelled, and the adjutant-general shook his hand warmly and complimented him on his getting through successfully. Oh, no, the tall order need not despair.—Boston Herald.

Soon to be Shattered. "I hear that you are engaged to a girl with an ideal." "Oh, I guess I am all right. You see, I am the ideal."—Cincinnati Tribune.

PROTECTION from the grip, pneumonia, diphtheria, fever and epidemics is given by Hood's Sarsaparilla. It makes PURE BLOOD.

Steamer Jacques Cartier. During the month of July, Tickets from Charlottetown and return will be issued for Sixty-five Cents. These Tickets good to return on the Boat the day of issue or the following day.

ELECTRIC PROGRESS.

Successful Test of a New Electric Locomotive. It Contains a Speed of 80 Miles an Hour.

One of the dynamos of 5000 horse-power Company at Niagara Falls was started on Tuesday in the presence of about 150 members of the American Institute of Electrical Engineers, which had been in annual session at the Falls.

The dynamo was started at a rate of speed of a minute all the afternoon, and 3000 horse-power was developed, but as certain parts of the machinery were not so good as they should be, it was not to go to the full extent of the horse-power.

The exhibition shows how near at hand is the commercial realization of power from the trolley plant. The engineers on the street have tested the works of the Pittsburg Reduction Company, lately described in The Express and were told that the concern would be ready in two weeks to begin operation.

Equally interesting was a test of electricity as a motive power on the Nantuxet Beach division of the New Haven railroad, where it was made with an electric locomotive and fully geared for speed, and the officials who were aboard say on a straight away track the electric train traveled at an average speed of 80 miles an hour. Greater speed could have been attained, they declare, had it not been for a hot box which retarded the train.

Christianity vs. Agnosticism. Just published in Pamphlet form, 48 pp., the course of Sermons recently preached by the Rev. James Simpson, on "Christianity vs. Agnosticism."

Price 10c. per copy; \$1.20 per dozen copies. For sale at THE EXAMINER OFFICE. ap11—dv & wv

Scott's Emulsion is Cod-liver Oil emulsified, or made easy of digestion and assimilation. To this is added the Hypophosphites of Lime and Soda, which aid in the digestion of the Oil and increase materially the potency of both. It is a remarkable flesh-producer. Emaciated, anemic and consumptive persons gain flesh upon it very rapidly. The combination is a most happy one.

Physicians recognize its superior merit in all conditions of wasting. It has had the endorsement of the medical profession for 20 years.

Don't be persuaded to take a substitute! Scott & Bown, Belleville. 50c. and \$1.

To Let on Queen Square That large Shop lately occupied by Messrs. Geo. Dixon & Co. Size 75x25 feet. Shop is finished in best style, and has in connection, a fireproof vault with combination lock.

Also, whole of third floor, 75x40 feet and a large room, 42x22, on second floor. All above are heated by hot water and lit by electric light.

Under Shop is large Cellar, floored and lit. Above will be let for a term of years. Apply to THOMAS MORRIS, June 12—pat

WHAT WOMEN ARE DOING.

The Salina (Kan.) girl who telegraphed invitations to her wedding, knows what to do with a bird in the hand when she gets him.

Emily Faithfull combined her work for the cause of women with a love for strong cigars, of which she was an inveterate smoker. She took to tobacco at first to relieve her asthma.

The fact that 62 literary women sat down to dinner together in London recently is viewed by a leader writer for an English daily as ominous and portentous to the future of man in literature.

Little Flossie Slesco, the 8-year-old daughter of the turnpike on a hotel in Yonkers, who saved the life of the infant son of Millionaire Doolittle last month, by pushing him off the railroad tracks where he had wandered while his nurse was shopping, has just received the odd reward she asked for. It consists of an English daily, a white goat, a white dog, a white rat and a white mouse.

The Princess Maud has lately appeared in Battersea Park mounted on a balloon-tired "safety." The Duchess of Connaught, being yet a learner, prefers to take her daily practice for the present in the secluded walks of Buckingham Palace gardens. Meanwhile the Marchioness of Londonderry, Lady Brassey and the Princess Alice of the United Kingdom, the most graceful and expert of riders.

Alphonse Daudet was not complimentary in his references to "Englishmen." "No one is so much of a hand-some in features," he says, "but there is nothing seductive in her physical form, and moreover, she is an utter stranger to elegance and good taste. The Englishwoman whom you encounter in Paris, with her flattened-down hair and huge feet, differs in no particular from the English lady of rank whom you meet in London."

THE BRIDAL GARTERS. Good Luck in Matrimony Follows the girl who makes them.

At all times garters have been considered very important details of woman's dress, and always associated in some manner with matrimony. Down through half a dozen centuries comes to us the custom practised to-day of having the garters as a finishing touch to a bride's toilet. The particular girl friend who is permitted to slip them into place is considered to stand the best possible chance of wedding happily before twelve months are out.

A present of near a pair of garters in matrimony is also shared by the friend who secures the privilege of making a bride's garters, the proper pattern for which is the name of the bride. These garters of white silk, with elastic covered with embroidered white satin and clasped by a small gold buckle enamelled in white bow knots. The garters of Marie Antoinette were pretty pink and blue tassels two inches long.—Philadelphia Times.

AMERICAN WOMEN are the Only Ones Who do not Wear Distinctive Hosiery. Americans are the only women in the world who do not exhibit some sign of matrimony. Of course, those who follow in the wake of European etiquette would not appear with their daughters wearing a hat without strings, but the universal American woman buys what she likes, regardless of whether it be matrimony or no matrimony. What is worse, her daughters will select articles of dress only suitable to married women.

In no other country is this the case. Among the Germans the men nearly always wear a top hat, and a married woman consists of a little cap or hood of which they are very proud, and "donning the cap" is a feature of the wedding day among the peasants of certain localities.

The married women of Little Russia are always seen, even in the hottest weather, with their thick, long, hair twisted about their heads. In New Guinea a young woman lets her hair hang about her shoulders, but when she is married she has her hair braided. Chinese matrons braid their hair like a helmet. In Wadal the wives color their lips by tattooing them with the thorns of the acacia and rubbing them with iron filings; in parts of Africa the married women perforate the outer edges of their ears and their lips and stick rods of grass stalks in them, and among a certain Mongolian tribe of people, the Manthes, the women wear suspended from their ear a little basket full of cotton, to which a spindle is attached. Thus every country, save and civilized, but our own, has a sign or symbol of some kind that distinguishes the matron from the spinster.

Sweeping. If there are any particularly dirty places on the carpet, it seems wise to take the small whisk broom, always in hand, and sweep up those places first before beginning the general sweeping. Then we shall not have to sweep this additional dirt off our carpet. After the sweeping is done and the dust allowed to settle a little, if the broom is dipped in clean cold water, all shaken out that can be, and the carpet then lightly brushed, the broom being dipped into fresh water every few moments, it will take up the surface dust that has fallen back on the carpet after being disturbed by the sweeping.

Women in Business. There are few occupations in which women outshine men. The women teachers outnumber the men nearly three to one, and the same is true of boarding house keepers. The distaff is still greater, of course, among nurses, underwriters and landladies, housekeepers and stewards, seamstresses and servants. The total number of servants in the country is 1,225,000, of whom only 2,500 are males. Women take the lead in practically every business, in dress-making, millinery, flower-making, book-binding, as cotton mill operatives, in the mills, or making corsets and tulle and hosiery.

THE MOON AND THE SUN.—During the month of July the moon will be in her last quarter on the 14th, new on the 22nd, and in her first quarter on the 28th. The average length of the day will be 14 hours 30 minutes. The sun, which since the 21st of June has been travelling southward from the summer solstice, will in the course of the month traverse 5 degrees, 55 minutes, 5 seconds in declination, while during the month of June it only passed over at arc of 1 degree, 3 minutes, 61 seconds.

White vests and summer coats and vests very cheap at Prowse Bros.

Bartholdi

the great Sculptor of the Statue of Liberty, writes of "VIN MARIANI" THE IDEAL TONIC: "Vin Mariani increases and strengthens all our faculties."
