

These Prince Edward Island Druggists ask you to Consider--

ASK YOUR GRANDPARENTS ABOUT

**DIPHTHERIA - SMALLPOX
TYPHOID FEVER**

THEY WILL TELL YOU HOW THESE DISEASES WERE DREADED . . . HOW THEY WERE OFTEN CRIPPLING AND FATAL . . .
but that is generally not the case today

The early part of the Twentieth Century has been phenomenal in the eradication of diseases and such scourges as diphtheria, smallpox and typhoid fever have practically disappeared. Infant mortality has been reduced to a minimum and the contagious diseases have been brought under control. The terrific impact that these diseases had on the adolescent and on children has practically disappeared due to the present form of therapeutics.

Diabetes mellitus which took many a life can now be most adequately controlled by insulin and, pernicious anemia, at the present time, can be controlled by injections of liver or the intrinsic factor as represented by Vitamin B12.

Many other diseases such as syphilis came under control by the use of the arsenicals. Pneumonia and meningitis which were treated by serum therapy and which required indefinite periods of time and which had a great morbidity have responded to the sulfonamides, penicillin and the use of hormones.

In 1900 medical textbooks relied on tonics, antipyretics and a great many medicinals which were uncertain, and of questionable therapeutic value. Today, with the advent of the sulfonamides during the war period followed by penicillin the patient has been made extremely comfortable. For instance, scarlet fever, although in itself not a disease to be dreaded, had terrific complications such as mastoiditis and nephritis. Mastoiditis lasted months and invalidated the patient for long periods of time with running ears, general debility, secondary anemia, etc. Under the proper administration of the sulfonamides and the antibiotics these complications have disappeared completely, so much so that in the large teaching hospitals, where they had hundreds of mastoidectomies a year, hardly any can be seen even for teaching purposes.

TODAY YOU GET WELL QUICKLY -- AND LIVE

Modern Medicine and Modern Pharmacy have practically eliminated these diseases

When Your Health
Is In The Balance

your doctor's prescription is your most economical investment

These Prince Edward Island Drug Stores Are Highly Qualified to Fill Your Doctor's Prescription Efficiently, Economically
