Federal Aid Assured For Maritime Potato Growers

No Doubt That Federal Offer Applies To P.E.I.

Interviewed late last evening on Hon. A. C. Taylor's announcement at Andover, N. B., that Federal aid would be forthcoming to ensure a fair return to potato growers on sales made throughout the season, Hon. C. C. Baker, P. E. I. Minister of Agriculture, said that while this word had not reached him officially yesterday, he had no doubt that it was in the mail and that the New Brunswick Minister's statement applied to Prince Edward Island as well as New Brunswick potato growers.

"This is what we have been jointly working for, and I am very glad that Mr. Taylor has received this assurance from Ottawa," Mr. Baker said. "We were expecting it, and that is one reason why we had the Marketing Board insist on the dealers keeping a record of all their potatoes purchased, and from whom."

"This undertaking by Ottawa will bring us up to a level that is comparable with prices in Central Canada. After the computations are made it will likely result in an outright grant to the Boards, which must be paid to the producers."

Mr. Baker referred to previous efforts to obtain a large potato order from Spain, in which both Provincial Governments had co-operated. The Prices Support Board agreed to pay a subsidy of 50c per 100 lbs. if the order went through. Subsequently, both Governments have been working jointly to get assurance of Federal aid as outlined in Mr. Taylor's statement.

PARKING METERS

TORONTO, Feb. 1 (CP) — Eleven hundred parking meters will be installed on downtown Toronto streets, civic works committee decided today. City Council approved meter parking last November. Parking meter charges will be five cents a period, with the periods varying from 15 minutes to an hour depending on location.

Coming Events

- "Mail your Films to Garnum Photo Studio, Charlottetown.
- "Wheat \$3.15 per hundred. McGuigan & Boyle.
- "Crokinole party, Mt. Albion Hall tonight, February 2.
- "Buying oats and mixed grain, also feed bags daily. Highest prices Fraser and Annear Feed Service.
- "Kinkora. Friday, February 1st. Special Pre-Lenten Show. "Family Honeymoon". Dance after.
- "Hockey tonight at Wiltshire rink. Wiltshire Miracles vs. Y. M. C. A.
- "Hunter River rink tonight. League game. North Rustico vs. South Rustico. Skate after.
- "Card party and lunch, Hope River Credit Union Hall, Friday, Feb. 2.
- "Auction and Dance, Millview Hall, Friday, February 2nd and Monday, February 5th.
- "The official opening of West Royalty School will be held on Monday, February 5th, at 8 P. M.
- "Buying good feed bags daily. Highest prices. Russell Driscoll, Mt. Herbert.
- "Receiving Hogs at Crapaud for Canada Packers Limited, until 12 noon each Tuesday. Robert Dawson.
- "Notice — Social evening, Springfield Hall, Friday, February 2nd. In aid of rink. Sponsored by Farm Forum. If stormy, following night.
- "Annual Meeting of the Wiltshire Dairyming Co., will be held Monday, February 12th, 2 P. M. Full attendance is requested. Nelson Hatherley, Secretary.
- "Buying pigs and feeder cattle, all kinds and sizes, Monday, at Fredericton. Paying \$24.00 pair for good pigs over 30 lbs. each. Will also buy smaller ones. Knud Jorgensen.

ANDOVER, N. B., Feb. 1 (CP) — Hon. A. C. Taylor, Provincial Minister of Agriculture, told several hundred potato growers here today that Federal aid would be forthcoming to ensure a fair return to the growers on sales made throughout the season. The meeting was called by the growers to determine what steps are being taken to secure financial aid for the industry.

Mr. Taylor said that if the farmers could furnish proof, through the Marketing Board, of their sales from the first of the season to the close, he could promise definitely that the growers would receive any difference between the selling price and what was considered a fair return.

The Minister stated that he did not believe the farmers would be subsidized for the potatoes on hand at the close of the season. He emphasized, however, that there is a demand for all the potatoes now in the growers' hands and orderly marketing would dispose of the entire crop at a satisfactory price. He said that after allowing for shrinkage and potatoes to be used for planting, there were about 5,400 carloads on hand in New Brunswick, a drop of 2,000 from this date last year.

He emphasized, however, that there is a demand for all the potatoes now in the growers' hands and orderly marketing would dispose of the entire crop at a satisfactory price. He said that after allowing for shrinkage and potatoes to be used for planting, there were about 5,400 carloads on hand in New Brunswick, a drop of 2,000 from this date last year.

Believes No Sabotage In Bridge Collapse

THREE RIVERS, Que., Feb. 1 (CP) — Mayor J. A. Mongrain said today that "no one in Three Rivers believes sabotage was connected with collapse of the Duplessis Bridge."

The Mayor told the Canadian Press he was not making the statement in direct reply to Premier Duplessis' statement of yesterday in which the Premier, in the Legislature, said it was his opinion that sabotage was the cause of the disaster.

"There is nothing to indicate sabotage," said Mayor Mongrain. The Mayor said he was not making any further comment and that an official statement from himself, as mayor of the city, will possibly be made later.

Northeast U.S. To Test Air Defences

WASHINGTON, Feb. 1 (AP) — Air defences of the Northeastern United States will be tested in a four-day exercise beginning next Thursday, the Defence Department announced today.

The department said 100,000 civilian ground observers will participate, with regular units of the air force, army anti-aircraft artillery units and the navy.

The exercise will cover the Great Lakes area eastward to the Atlantic Coast and some distance at sea. The southern limit of the testing area will run from Southwestern Kentucky to the coast of Southern North Carolina.

Civilian observers will be called to their posts only Feb. 10-11.

A similar exercise covering the Rocky Mountain and Pacific Coast States began today under direction of the Western Air Defence Command at Hamilton Air Force Base, Calif.

Rush To Buy Oil Rights In Virden, Man. Area

VIRDEN, Man., Feb. 1 (CP) — A snowmobile cannot be hired within 100 miles of Virden. The enclosed, tracked vehicles are busy at as much as \$45 a day whisking lease-seeking oil men over ice-encrusted back roads to farmhouse doors.

It's part of a scramble to buy up mineral rights on agricultural land near the site of Manitoba's first promising oil find.

The Provincial Government announced earlier this week the tapping of oil from a test well 1-1/2 miles west of here, in the southwestern corner of Manitoba.

Provincial Geologist J. D. Allan said Wednesday the strike indicates "almost without question there is oil that can be produced commercially in Manitoba."

Oil-company representatives are paying \$3 to \$6 an acre for exploration rights. At the same time they sign over to the farmers 12 to 20 per cent of the "take" if oil is found.

One executive said his company is buying up mineral rights "as fast as snowmobiles can get our agents around the area."

The rich agricultural lands of the Province's southwestern triangle, bordering on Saskatchewan and North Dakota, were mainly settled prior to 1890, the year the Government began retaining mineral rights when it sold crown lands.

Discovery of oil in the California Standard Company's test well has set this town of 1,600 agog.

Leases are being taken as far as 40 miles from the site of the California Standard well.

The well is the first in the Province to show recoverable oil.

Allied Drive Rolled Ahead Again Today

TOKYO, Feb. 2 (Friday) (AP) — A French-American regiment, aided by low-flying planes and reinforcements, crushed an attempt by 6,000 Chinese to trap it in Central Korea, the U. S. Eighth Army reported today.

A communique said the enemy was forced to break off contact Thursday after a fight which lasted nearly 13 hours and the Red entrapment assault caused "no appreciable change in position."

AP correspondent Stan Swinton reported that the Allied offensive began nine days ago on the western front south of Seoul "rolled forward" at dawn today.

Renewal of the advance followed a night in which the Reds, believed suffering from serious manpower losses, mustered only one faint counter-attack in the west.

U. K. House Backs Attlee

LONDON, Feb. 1 (AP) — The House of Commons rejected tonight Conservative charges that Prime Minister Attlee's Labor Government has bungled Britain into a critical fuel shortage.

The vote was 300 to 269. Voting was along party lines.

A few hours earlier the Government had instituted emergency measures designed to head off a creeping coal crisis which threatens to hamper the country's rearmament program.

Report U. N. Troops To Stop At 38th Parallel

WASHINGTON, Feb. 1 (AP) — High United States officials are reported to have decided that United Nations troops should stop at the 38th parallel if they are able to drive that far in any northward advance in Korea.

While responsible American authorities were reluctant to discuss this development even privately, the intent appeared to be to create if possible a basis for new efforts at a political settlement.

The United States exercises through Gen. Douglas MacArthur the command of United Nations forces in Korea and MacArthur presumably has been or shortly will be informed of the decision.

At the moment U. N. advances to the north are described as relatively limited patrol action and apparently the present strategy is not designed to develop an all-out northward movement.

News In Brief

TORONTO, Feb. 1 (CP) — Continuation of rent controls in Ontario after Federal rent controls expire April 30 was heralded today in the Speech from the Throne read by Lieutenant-Governor Ray Lawson at the opening of this year's Legislature session.

QUEBEC, Feb. 1 (CP) — Premier Duplessis announced today that the Federal crown company, Defence Construction Limited, will make available temporary bridging to restore communications severed by collapse of the Duplessis Bridge at Three Rivers. Four temporary bridges, built for the Quebec Government free of charge.

CHICAGO, Feb. 1 (AP) — Winter renewed its attack against the United States today along the widest front of the season. Snow, cold, sleet or freezing rains struck from the Rockies to the Atlantic seaboard. Hundreds of schools were closed in the storm regions. Transportation was slowed. Communication and power lines snapped.

LAS VEGAS, Nev., Feb. 1 (AP) — The third atomic blast in less than a week went off before dawn today in the desert near here, but hardly a soul in Las Vegas turned a hair. Such things are just everyday stuff now in this city of high stakes gambling and quick divorce. The sky lit up in a blinding flash at 5:48 a. m. PBT and buildings rumbled from the concussion six minutes later.

Small Boy Spends Six Hours In Open

TORONTO, Feb. 1 (CP) — Unable to move with his snow-suit and heavy boots, a three-year-old boy spent six hours in a ravine last night before searchers found him. The youngster, Lynden Dimkiw, is reported recovering from frost-bite and exposure.

WASHINGTON, Feb. 1 (AP) — Bennett E. Meyers, former major-general in the United States Air Force was paroled from prison today. He was convicted in 1948 of inducing a civilian associate to lie about his sideline business activities during the Second World War. He was immediately picked up by U.S. marshals to answer a Federal income tax evasion indictment.

Gov't Places Canada's Armed Forces Under Single Military Head

By DOUGLAS HOW

OTTAWA, Feb. 1 (CP) — The armed forces today were placed under a single military head — Lt.-Gen. Charles Foulkes — in a move arising from their expansion and Canada's growing commitments overseas.

But the development was almost overshadowed by the resulting appointment of colorful, incisive Lt.-Gen. Guy Simonds as Gen. Foulkes' successor as chief of the army's general staff.

The moves, announced by Defence Minister Claxton after a Cabinet meeting, do these things:

1. Make Gen. Foulkes, 48, permanent chairman of the chiefs of staff committee charged with co-ordinating the operations and training of the three forces and the preparation of fully correlated defence plans. They recognize his role as Canada's chief military spokesman in Atlantic Pact developments and free him to carry on that job.
2. Place the expanding army under Gen. Simonds, 47, a man who has spent five years directing British and Canadian staff colleges after the war.
3. Send the R. C. A. F.'s brainy Air Vice Marshal F. Miller to Kingston to take Gen. Simonds' job as head of the National Defence College.

The changes make Gen. Foulkes boss of the forces. He becomes Canada's equivalent of Gen. Omar Bradley who watches over all three American forces.

Mr. Claxton said the appointment arose from "the increase in defence activities, particularly those having to do with co-operation with other countries under the North Atlantic Treaty which was requiring more and more of Gen. Foulkes' time."

In addition, he added, the work of preparing "fully correlated defence plans and ensuring the utmost co-operation and co-ordination between the services now requires the services of a chairman not an integral part of one of the forces nor particularly responsible for its administration."

Gen. Foulkes' selection came as no surprise to anyone aware of Mr. Claxton's feeling that the General has been his ablest military adviser at defence headquarters.

Gen. Simonds was in many ways Canada's Montgomery of the last war. He had some of the trenchant, stern, brilliant qualities of the British Field Marshal and some of his battlefield genius. In commanding the 1st Division in Sicily, the 2nd Corps and for a time the first Canadian Army in Northwest Europe, he built up a reputation as an able field commander.

Like Gen. Foulkes, he was born in England and came to Canada as a boy.

Eisenhower Aims At 40 Divisions For West Europe

WASHINGTON, Feb. 1 (AP) — Gen. Dwight D. Eisenhower was reported today to have told Senators that he is aiming at a goal of 40 divisions—roughly about 700,000 troops—to defend Western Europe by the end of 1952.

Testing behind closed doors, Eisenhower, also said: "I don't deny the danger of a powder keg war. But the task today is one of building for peace."

Eisenhower spoke on his 21-day tour of European capitals which ended with a stop at Ottawa.

He said that if Western Europe with its 200,000,000 people should fall to Soviet domination, the military balance of power would be so drastically shifted that "our own safety would be gravely imperilled."

Commander Of North Korean Army Killed

TOKYO, Feb. 2 (Friday) (AP) — The death in action of North Korea's Commanding General and Vice-Premier, Kim Chek, was announced today by the Pyongyang radio.

The broadcast, heard in Tokyo, said his death occurred Jan. 30 but gave no details.

It said Kim, in addition to commanding the North Korean army and serving as Vice-Premier, was North Korean Minister of Industries. He was described as a close friend and co-worker of Red Premier Kim Il Sung.

Everything in the old laboratory building was destroyed in the morning fire which caused an estimated loss of \$100,000. Original building was under construction.

Mr. Cannon stated that officials here are hoping for a building something along the lines of the new Polyclinic building on Euston St. It will probably be larger than the previous building, but nothing definite would be known until the plans were studied. The new structure will be fire proof. It is thought the new building will be fairly large in order to accommodate the expanding work of the Science Service here. It may not be as high as the Polyclinic but will probably cover more ground, it was stated.

New Drug Said To Give Relief From Peptic Ulcers

DETROIT, Feb. 1 (AP) — A new drug, named krotol, which gives "relief and ultimate freedom" from peptic ulcers was introduced today by Parke, Davis and Company.

The drug, administered by mouth, brings healing and causes disappearance of the ulcers often in a matter of weeks, the company quoted clinical investigators as saying.

The investigators, the company said, hailed the drug for its "promise of relief and healing for those ulcer patients who do not respond to conventional therapy."

"It represents," they said, "a new fundamental approach to the treatment of peptic ulcer predicated on physiologic studies carried on during the past two decades. No procedures to date are more beneficial from the long term viewpoint."

Spreading Rail Strike Causes Concern In U.S.

CHICAGO, Feb. 1 (AP) — The Government clamped a partial embargo on mail tonight because of the fast-spreading United States railroad strike. It also made two legal moves to try to halt the walk-out.

Paralysis spread along more of the country's rail arteries as more trainmen reported "sick." The rail strike also caused layoffs of more than 66,000 workers in other industries.

Hardship loomed on the fighting and home fronts. Combat rations for the forces in Korea were stalled in Chicago's freight yards. Domestic mail, freight and express piles mounted.

The tieup of fuel oil shipments brought fears that homes would grow cold during the current cold wave.

The mail embargo restricted acceptance of second, third and fourth class mail for out-of-town delivery at Chicago, St. Louis, Washington, Philadelphia, Trenton, N. J., Jacksonville, Fla., New York City, Atlanta, Ga., Cleveland, and Baltimore, Md.

Air mail service is not affected. During the last three days, the "sick" walkouts of rail workers have spread to more than 42 railroads in about 30 cities.

Senators have demanded a 40-hour week at the pay they receive for a 48-hour week. They went on strike for three days in December, but returned to work Dec. 16.

Confirms Report Re Extension Of Fishing Season

OTTAWA, Feb. 1 (Special) — J. Watson MacNaught, parliamentary assistant to Fisheries Minister Mayhew today confirmed the report that the season for fishing of smelts has been extended this year to February 28 for the Maritime Provinces and Quebec.

He made it clear that the extension applied only to the current year and was ordered on account of the hitherto unsatisfactory and general weather conditions.

The time extension, Mr. MacNaught said, would, in the opinion of the Fisheries Department, enable smelt fishermen to recoup losses due to unfavorable weather and bring their catch up to the level of normal years.

R.A.F. Tightens Great Britain's Air Defences

LONDON, Feb. 1 (Reuters) — An Air Ministry spokesman said today that if war broke out the Royal Air Force could go into full-scale action at the touch of a button. Its strength is twice that of 1939.

Battle of Britain veterans, now in command of the R. A. F., agree that in another war they could expect no breathing space like they had in 1939-40.

But mobilization machinery is such that essential reservists on civilian jobs could be at their battle stations within slightly more than 24 hours.

Co-operation with Atlantic Pact air forces is a key feature of R. A. F. organization. R. A. F. aircrews train in Canada and Southern Rhodesia while Canadian fighter pilots are flying in British alongside R. A. F. formations.

In Western Europe, English has become the official language for fighter pilots.

Extensive U. S. air forces equipped with B-29 bombers and jet fighters are in Britain. The recent visit here of the huge American B-36 bombers may indicate that such planes will be permanently based here under U. S. command.

Prime Minister Attlee announced this week that Britain's output of fighter planes would be quadrupled in the next three years.

All regular fighter squadrons already are equipped with jet aircraft, and 15 of the 20 auxiliary squadrons, manned by reservists at week-ends, have been turned over to jets.

The three principal jet fighters in mass production—the Meteor, Vampire and Venom—will in time give way to swept-back wing machines now in the prototype stage.

Lack of a modern heavy bomber is the greatest gap in the R. A. F.'s armor, and for the time being crews are being trained to use United States B-29 Superfortresses, known here as Washingtons.

This month the new British Canberra twin-jet bomber goes into service with the R.A.F. though a tactical aircraft, believed to be capable of speeds over 600 miles an hour; the Canberra has great range and striking power.

Says Biggest Need Is Arms For West Europe

OTTAWA, Feb. 1 (CP) — Prime Minister St. Laurent today ruled out conscription for Canada at this stage of the world situation.

He told the Commons the Government believes the big need in building up defences of Western Europe now is for arms rather than troops, though he said that condition could change.

If so, Government policy would be based on the type of Canadian contribution that could be of "actual effective value" and not on sentimental, racial or religious grounds.

Mr. St. Laurent, leading off the Government's defence of its policies in the annual Throne speech debate, told the House he is confident North Atlantic Treaty countries' defences will be built up strongly enough to prevent aggression, but he warned it will call for the full effort of all Canadians.

He indicated to the House economic controls powers being sought by the Government would be on a stand-by basis, to be used as appeared beneficial. The Government would move "with dispatch but with caution."

Opposition Motions

As the traditional debate took precedence over other Commons business today, the Government ran into two Opposition motions of non-confidence, passage of which would mean overthrow of the administration.

The motions, which will not be voted on until later, were:

1. By George Drew, Progressive Conservative leader, on grounds that the Government had failed to give the nation leadership, to

(Continued on Page 5 Col. 7)

To Make Early Start On New Science Service Lab.

Construction of a new Science Service Laboratory to replace the one destroyed by fire Wednesday morning will probably be commenced this spring, it was learned last night from Mr. F. M. Cannon, officer in charge of the Entomological Laboratory.

Mr. Cannon, in touch with senior officials of the Entomological Department in Ottawa yesterday morning, was told over the telephone that "the machinery for the construction of a new building is being set in motion right away."

An Ottawa official will bring the plans of the proposed building to Charlottetown next week where they will be studied. The building will very likely be built on the same site occupied by the former laboratory.

Mr. Cannon stated that officials here are hoping for a building something along the lines of the new Polyclinic building on Euston St. It will probably be larger than the previous building, but nothing definite would be known until the plans were studied. The new structure will be fire proof. It is thought the new building will be fairly large in order to accommodate the expanding work of the Science Service here. It may not be as high as the Polyclinic but will probably cover more ground, it was stated.

Will Order Equipment

Mr. Cannon will order his laboratory equipment right away. He expects that certain materials may be difficult to obtain due to the war needs but that some of it will be readily obtainable.

Everything in the old laboratory building was destroyed in the morning fire which caused an estimated loss of \$100,000. Original building was under construction.

Mr. Cannon stated that officials here are hoping for a building something along the lines of the new Polyclinic building on Euston St. It will probably be larger than the previous building, but nothing definite would be known until the plans were studied. U. N. Assembly Brands China Aggressor

LAKE SUCCESS, Feb. 1 (AP) — The United Nations General Assembly today found Communist China guilty of aggression in Korea by a one-sided majority of 44 to 7.

But Britain warned the U. N. to take it easy on sanctions against the Chinese Reds until every effort is made at a peaceful settlement. That appeared to be the course the U. N. will take in the immediate future.

TORONTO, Feb. 1 (CP) — Minimum temperatures observed between 7:30 P. M. and 7:30 A. M. E. S. T.; maximum temperatures between 7:30 A. M. and 7:30 P. M.:

Victoria 30, 34; Edmonton 7b, 19; Calgary 15b, 26; Regina 25b, 6; Winnipeg 25b, 4; Toronto 9, 14; Ottawa 15b, 10; Montreal 4b, 13; Quebec 2b, 13; Saint John 3b, 33; Moncton 5b, 32; Halifax zero, 49; Charlottetown 4b, 39; Sydney 3, 42; Yarmouth 9b, 49; St. John's 5, 30.

HALIFAX, Feb. 1 (CP) — Official forecasts issued by the Dominion Public Weather Office and valid until midnight Friday.

Synopsis:

Temperature climbs in the Maritimes during the last 48 hours have been phenomenal. Localities in southwestern Nova Scotia are reporting values near the 50 degree mark tonight, a rise of over 90 degrees from Wednesday morning readings.

A storm centred near Albany, New York, will cross the Gulf of St. Lawrence Friday afternoon. Much colder air over the Middle West will flood into the Maritimes to the rear of the storm and temperatures will fall sharply. Clearing will be general except along westward coasts where snowflurries will return.

Forecasts:

Prince Edward Island — Drizzle and rain ending during the morning. Clearing at sunset. Much colder by evening. Winds northwest 30. Low and high Friday at Charlottetown 33 and 45.

High tide today at 7:18 A. M. and 5:57 P. M.

Sun rises at 7:33 A. M. and sets at 5:21 P. M.

Sunrise tide eighteen minutes later than Charlottetown.
