

Audacious Boers.

The Marquis of Queensberry has volunteered to go as a trooper in Col. Sir Charles Warren's expedition to Bechuanaland. The latest advices from South Africa indicate that the audacity of the Boers is becoming more outrageous, and that some very severe fighting may be expected.

Defending the Ministry.

M. Ferry, in the Chamber of Deputies, a few days ago, defended the course of his ministry in the troubles with China, said the French had taken the offensive in Tonquin and that unless China paid the indemnity demanded the temporary occupation of Formosa would be made permanent.

India and Canada.

THE ADVANTAGES OF THE DOMINION—AN ARMY VETERAN'S EXPERIENCE.

The Earl of Dufferin, our late Governor-General, is evidently a man of destiny. His appointment to the Viceroyalty of India is a deserved honor, and he will have the best wishes of every loyal Canadian.

India has many natural advantages over other English dependencies, but Canada has a more healthful climate, and she is not vexed, with the problem of the government of aliens.

The heat of the lowland of India is somewhat dreadful, the average being over 80 deg. In the dry season the glass often registers 120 deg. Most of the wealthy class can flee to the mountains in summer, but the army officers and men have to endure it.

Some of us may at times feel like finding a little fault with our cold Dominion, but take it all in all we have a climate much preferable to that of India's coral strands, and we will stick to our own country.

An Animal Fifteen Times as Large as a Horse.

The discoveries at Shrewsbury, Mass., excite a great deal of attention among naturalists. The teeth were discovered seven feet below the surface of the ground, close to the bed rock, in soil composed of decayed vegetable matter.

These serrations are an inch or more in height, and they are all cased with a hard, bright enamel of a bluish cast, as fine and smooth as agate. Their surfaces show traces of the grinding they were once called upon to perform, and there are in the quartet a pair whose serrated surfaces fit quite closely into each other, as though they were from the upper and under jaws.
