MARCH, 5, 1898. SCIENTIFIC MISCELLANY.

Considering three varying characteristics of races (cephalic index, or ratio of extreme width to extreme length of skull, measurement of stature, and color of skin and hair), a French anthropologist finds that, while under three headings these give twenty-seven possible combinations, in reality only six occur in considerable numbers among the inhabitants of Europe...

The primary object of the insect-grafting experiments begun a year or more ago by Mr. Henry E. Crampton, Jr., has been a study of insect coloration, concerning which the results have not yet been satisfactory. Chrysalides of moths have been joined in many ways. Twin unions—head to head, tail to tail, back to back, and wing to wing—have been most successful...

So small a creature as the beaver, according to Mr. H. B. Woodward of the British Museum, has changed the character of a considerable portion of the British Isles to a remarkable degree. The borders of the fens were once covered with forest, and the beaver was one of the most plentiful animals of the region...

A surgical operation upon a woman of thirty-eight has resulted in a fistula through which Dr. Franz Pataff has been enabled to study the effects of drugs on the secretion of bile. The investigations correct a general delusion by showing that drugs have no influence. Calomel and corrosive sublimate did not affect the flow of bile, salol caused a very slight increase marked effect was the woman's own toil and the only substance that produced any administered in pills. These pills increased the secretion more than a third in twenty-four hours, the quantity becoming less than before an ceasing to give the pills.

An effort has been made to determine the pulling strength of elephants, horses, and men. Attached to a dynamometer, Barnum and Pailey's largest elephant registered a pull of 2 1/2 tons on the second trial, but a smaller and more active elephant gave a record of 5 1/2 tons—whether as the result of a steady pull or a sudden jerk appears to be uncertain. A pair of powerful horses registered a ton and a half while it required the strength of 83 men to equal the pull of the smaller elephant.

The sterilization of grape-juice—a process having been devised by M. Rosenstiel, a French chemist—is urged in Algeria as a means of creating a home market for the product of the vineyards. The religion of the Mohammedans does not forbid the use of unfermented grape-juice, as it does that of ordinary wine, and temperance societies outside of Algeria would welcome a pleasing drink free from alcohol.

Wooden pavements in Paris have been condemned, as they serve as a breeding place for all kinds of dangerous germs.

A recent interesting discovery is that many lizards, in running rapidly, take an erect posture and use the hind legs only. This curious fact was first noticed by Mr. W. Saville-Kent, an Australian observer, in the Australian Frilled Lizard, and has since been seen by him in other Australian species. The structure of American lizards leads him to infer that many of them may run on two legs. Mr.

Henry Prestoe, who has lived twenty years in the West Indies, confirms these conclusions, stating that every lizard he has seen running—from the large Iguana which is five feet long and lives chiefly in trees, down to the smallest mite one sees occasionally about the stones—moves on two legs when hurried. The Diamond Lizard, common in Trinidad, often leaves on a muddy surface footprints exactly like those of a fowl or bird.

The earthworm, glorified by Darwin, is now accused of playing a considerable part in the spread of disease. Pasteur found germs of carbon near the surface of soil in which sheep that had died from the disease had been buried several years previously, and Dr. Halstead Boylan of Paris finds reason for believing that not only carbon but typhoid and yellow fevers and tetanus may be spread by germs brought to the surface from dead bodies by earthworms. An experience of yellow fever in the Amazon Valley, in 1850, seems to have resulted from microbes rising from the soil over the grave of a Jamaica man who had died from the fever and had been landed at Para for burial.

The production of what is known as silkworm gut for fishing lines is a curious industry that has followed the decline of silk culture in the vicinity of Murcia, Spain. The grub is fed on the usual mulberry leaves, but before it begins to spin it is drowned in vinegar, and the substance that would have formed the cocoon is drawn from the body as a thick silken thread. The threads are treated with chemicals, dried, put up in bundles of 100 and sold along the Mediterranean.

By experiments on rabbits Prof. Fischal has demonstrated that getting chilled has a most important effect in predisposing to disease.

OBITUARY.

On Wednesday, Feb. 23rd, Miss Lizzie MacIntyre, daughter of D. MacIntyre, postmaster of New Port, passed away at the early age of 29 years. Fortified by the last rites of the Catholic Church, the death-bed surrounded by relatives and friends, she died with a smile upon her lips. The funeral procession, consisting of one hundred and thirty sleighs, was ample evidence of the high estimation in which she was held. Requiem High Mass was sung by Rev. J. C. McLean, P. P., assisted by Rev. A. MacAnally, Morell. The sad and solemn ceremony over her mortal remains were laid in St. George's Churchyard there to await the final summons. To the sorrowing parents, brothers and sisters of the deceased we offer our heartfelt sympathy.

In the course of a recent interview, Archbishop Ireland is reported to have said: "I am overwhelmed with sorrow at the frightful disaster to our war ship in Havana. But I do not think this the time to become excited or to talk without carefully weighing our words. We must exercise patience and forbearance and have confidence in these charged with the administration of our public affairs. We must probe this matter to the bottom, and until we do this we should form no rash opinion. I want peace, if we can have it with honor, and war should be our last resort. I am as good an American as the average man, and I am the last one who would do an insult to our national honor, but I do not think we should precipitate what might be an unrighteous conflict. Therefore, I say, the instincts of true Americanism require each to be patient, and to trust those who have in their keeping the dignity of this nation."

Free Medical Advice

You need a doctor many times when you don't call one. You suffer pain in fifty forms and yet won't call the doctor, because you hope that the pain "will go away after a while." And, too, you know by experience, that that first visit of the doctor is generally followed by many others, with the inevitable consequence of a big bill "for professional services." You don't know what to do for yourself or what to take.

Eminent Physicians

in the United States? You can. The physician is right here. He has an office in the building, he has a staff of correspondents to assist him, and anyone and everyone, who needs medical advice is invited to write to him. If it's baby's health or mother's or the health of any member of the family you may write about it, sure of a careful reading of your letter, sure of a conscientious diagnosis of your case.

Sure of a Cure

if cure is possible. Every letter will be held as a strictly confidential communication. Remember these facts.

We offer you medical advice from one of the most eminent practitioners in the United States, whether our medicines suit your particular case or not. We offer you this advice at the cost of the two cent stamp which it will take to bring your letter to our office. Address the Medical Department, Dr. J. C. Ayer Co., Lowell, Mass.

ANCIENT STÜTTGART.

Postal and Traveling Accommodations of the Old German City. The post relations of ancient Stuttgart were unpretentious. The two maid-servants of the postmaster distributed through the city the daily letters, which they carried in the same basket with the family marketing. Letters were carried out of the city by postilions. There was a number of couriers, and as a surety against mistakes there hung in the post-office, beside the curious mail bags, a huge whip, with which, when the commission had been given to the courier, a powerful blow for the strengthening of his memory was dealt him.

Coaches and post wagons were innocent of any suggestion of comfort—a high, clumsy wooden box was secured by thick leathern straps, and in the cavernous bottom were confined together packages and passengers. Up and down hill, over ruts and rocks, the cumbersome vehicle rattled on its way, the hapless travelers being ever on the defensive against the assaults of tumbling boxes and bundles. And then the weary slowness of the way! Formerly the journey from Stuttgart to Tubingen was made in 12 hours. The same journey is now made in four hours. The postilions alighted to take refreshments when it pleased them, and one traveler has left a dismal record of a journey that he once made, during which the driver took the horses from the carriage and attached them to a hay wagon that had been left mired in the mud. The man drove the wagon into the next village, and when there he joined the grateful neighbors in a carousal, while the tired passengers languished on the dusty country road.—Elise J. Allen in Harper's Magazine.

The Modern Agnostic.

We look at our churches with their congregations, growing in numbers and dwindling in faith, says H. G. Chapman in The Atlantic, and we ask ourselves: In all these buildings, cheap or costly, what real prayers rise, and of those that rise do any get above the roof? What God hears them and has there ever been an answered prayer? We look at the face of the dead and repeat a burial service. If after the manner of men I have fought with beasts at Ephesus, what advantage it me if the dead rise not? And as we say the words we ask ourselves, "Do the dead rise?" And if any one is found who believes these things he knows that there is another at his elbow who believes them not a whit or an atom, and these two can hit on no universe that shall satisfy both, nor can one be post to the other.

IT DON'T PAY

To buy drinks for the boys—it don't pay to buy drinks for yourself. It will pay to quit, but the trouble has been to do this. The Dixon Vegetable Cure will absolutely remove all desire for liquor in a couple of days, so you can quit without any self-denial, and nobody need know you are taking medicine, which is perfectly harmless, pleasant to taste, and produces good appetite, refreshing sleep, steady nerves, and does not interfere with business duties. You'll save money and gain in health and self-respect from the start. Full particulars enclosed. The Dixon Cure Co., No 40 Park Avenue, (near Milton St.), Montreal. 4

\$50.00 FOR RELEASE

Rheumatism's Ruthless Hands Clutched Him for Five Years—Two Bottles of South American Rheumatic Cure Gave Him His Liberty.

William McLean, farmer, Greenmore P. O., writes: "For years I have been a sufferer from acute rheumatism. At times I have been completely laid up with it—could not put on my clothing without assistance. Before I had completed the second bottle of South American Rheumatic Cure I was a well man. If those two bottles had cost me \$50.00 I would have considered it cheap medicine." Sold by Dr. S. W. Dodd and Geo. E. Hughes.

SCEPTICS ARE CONVERTED

Scoffers and Doubters are Convinced that Pain

Celery Compound Makes People Well and Keeps Them Well.

An Almost Miraculous Cure in Cornwall, On

The Great Spring Medicine Saves Life After the Physicians Fail.

The almost miraculous cure of Mr. Thos. Warren of Cornwall, Ont., by Paine's Celery Compound, has truly demonstrated and proved to the satisfaction of all intelligent men and women that Paine's Celery Compound cures disease when all other means fail.

Mr. Warren, after his rescue from death by Paine's Celery Compound, sent the following strong testimony which is indorsed by Mr. E. H. Brown, Cornwall's popular druggist: WELLS & RICHARDSON CO.,

DEAR SIR:—Ten years ago I contracted a bad cold which subsequently developed into inflammatory rheumatism, and I was laid aside for nearly six months. I recovered and was able to work for a time, when I was again seized with the terrible disease. I kept getting worse, and suffered the most intense agony. My elbows were partially drawn out of place, and my knees were swollen to nearly double their natural size.

Words fail to express what I suffered, and for days at a time I could not get out of bed nor move myself. During all this time I was under the care and treatment of one of our best physicians, but he did not seem to be able to relieve me, and I kept getting worse.

Believing that the doctor's medicine was not producing any good I decided to give it up

and allow the disease to take its course. I grew weaker and weaker every day from the pain, and felt that there was little hope for me.

Having read about Paine's Celery Compound I decided to give it a trial. After the second week I began to improve, and on the 20th of May I was able to resume work. I have been working every day since, and am quite well at the present time. I continued the medicine until the middle of August, when I had used in all six bottles. Its effect was magical and permanent, and I consider it a wonderful medicine. I would advise any person who is afflicted with rheumatism to give Paine's Celery Compound a trial.

Yours respectfully, THOS. WARREN, Cornwall, Ont.

This is to certify that I have known Mr. Thos. Warren for about thirteen years, and that he has been a great sufferer from rheumatism. In fact, on two occasions, when suffering intensely from pain and being so reduced in strength, it hardly seemed possible he could recover. It is true he began to recover with the first bottle of Paine's Celery Compound, and continued until he seemed perfectly well.

E. H. BROWN, Cornwall, Ont.
