Wants, Lost, Found, &c

PURSE LOST- This morning. Reward will be paid at this office.

LOST.—On Friday a small note book, with owners name upon it, containing money Reward will be paid for its return to Examiner Office. 11pd

WANTED.—To purchase a carriage hors must be gentle and reliable, with no bad habits. Apply to Chas. Smallwood, Richmond St. 21 p d

LOST—A gun metal watch, between Sunday and Tuesday Finder will be rewarded on leaving at Mrs Angus McDonald, Grafton Street, west. 151 pd11

TO LET—For the summer months, a cottage at Waterside, containing seven rooms, Beautiful location and very quiet neighborhood. John M. Haley, Pownal P O

HOUSE TO LET.—On Kent Street, formely occupied by Misses Coles, rent moderate. Apply to F. McRory on premises. 140 tf

TO LET—A house situated on Prince Street containing eleven rooms, suitable for a private residence or boarding house. Rent moderate. Apply to Mr. Thomas McQuaid, Lower Queen Street. 141

WANTED.—A girl for general housework Mrs T. J. Harris Brigh on Road. 140 tf

WANTED AT ONCE—3 pants makers and 2 vest makers; highest prices and constant employment at D. A. Bruce. 131 d&wtf

WANTED.—On the 24th of June, a cook. Good wages. Apply to Mrs. Edward Barfield Charlottetown, suar. s. side Journal 130

PLEASANT HOME WORK FOR MEN OR WOMEN—Day or evening. No canvassing or experience needed; plain instruction and work mailed on application for rosition Address Memorial Co., London, Ont.

TO LET—A dwelling house on Prince St., formerly occupied by Mr. S. C. Nash. Possession given immediately. Apply to Henry Smith, at County Court Office 123

TO LET.— House on Brighton Road, heated with hot water. Bath Rooms etc, at present cupied by T J. Dillon Esq. Possession given May apply to I. J. McKinnon 69

D. L. HOOPER

Agent for the Windsor, N. S. Plaster Co.—English Selenite Cement and Calcined Plaster.

Also agent for the Maritime Clay Work Brick. A stock always on hand.

Also a well furnished feed store adjoining grocery.

D. L. HOOPER.

ASYLUM INVESTIGATION.

(From The Patriot.)

FALCONWOOD ASYLUM, June 28.

Q. Also about the dustpan being used to gather the snow up?

A. To my knowledge, I never heard of such a thing. I consider the windows are out of repair. That could not occur without my notice while in the Asylum, but for the last nine years I have been in town. The fine snow and the driving wind would drift through good windows. It would drift through my windows at home.

Q. About the heaters?

A. The Engineer can tell more about that. One of the boilers is out of order and it will be replaced. It is an old boiler.

Q. In regard to the cleanliness?

A. About the changing of beds that is not correct. When Mr. McPhail first came here I gave him orders to carry out, that the beds were to be changed at once on being wet or soiled every night, of every patient. If that order has been obeyed, it cannot possibly be the case. It is Supervisor McPhail's place to see that it is obeyed. It is the attendant's duty to do it, and Mr McPhail receives his orders from me, and he sees that it is carried out.

Q Has the flour always been found to be of a good quality?

A. You saw the bread yourself to-day. There was a time when it was not as good as that.

Q. Within the last few months or six months?

A. Yes.

Q How long since is it, since the flour was poor?

A. Well, so far as I know, any poor flour we have had for some years past was between last January, when the new contract came into force, and two or three months ago when I called the attention of the Trustees to it.

Q. When did the change in the flour take place?

A. Two months ago. It was then changed for the better.

Q. Is it understood to be permanent or just to meet the Grand Jury's visit.

A. No, two months ago.

Q. You understand you are going to get that quality through the year?

A. Yes. I don't remember what brands of flour. I judge by the bread.

WILLIAM MCPHAIL, SUPERVISOR, EXAMINED.

Q. Have you made any request to have a new floor laid down?

A. I have spoken often. I never made a formal report.

Q. Is that the cause of many of the leaks?

A. Yes. If there was a good floor that would be remedied.

Q. About the plaster, we noticed in several places that it was down, has that been down long?

A. I could not say exactly how long, down for some time.

Q. Did you ever make any request to have those repairs made?

A. I don't know that I have in so many words.

DR. BLANCHARD: I mentioned that in my Annual Report.

Q. Is it a fact or not that a coil of steam pipes in the attic froze and burst?

A. It is a fact that something up there, I cannot tell whether that coil or a pipe below the floor froze. I understand it did not burst at all. It froze and would not let the steam through. Hot water was applied to it and that came down through. I understand the pipe never burst at all. Hearing it spoken I did not know but what it burst. The heat was let off at a certain time at night.

Q. There is a time when there is no heat at all?

A. Yes, from eleven o'clock until the morning at five. I don't know what it is in other establishments, that is the way it is here.

Q. Would you allow it in your own house?

A. I would take some means. I would keep it on all night in winter.

Q. On some nights certain wards don't get heat from some of the registers, many of them.?

A. Some of the registers at one side of the house and on the front of the house don't give any heat when the wind is a certain way, the heat does not go up there. At certain times in cold weather the patients are pretty cold and even in the day time.

Q. Are you in the habit of keeping a thermometer through the room?

A. Yes. There was one for each ward some time ago.

Q. Do you keep any record of temperatures.

A. That is supposed to be kept in the record that the attendants keep. There is a column for the purpose, so many degrees each morning- I don't know whether they mark it.

Dr. Blanchard: It was such a perfunctory thing, it was useless.

Mr. McPhail: We had some talk about it and it was remarked between us, "that was not much here nor there."

Q. Did you ever know the snow to drift in to cover up the patients?

A. No. I have known in houses in other places in a terrible snowstorm that the drift would come in somewhere.

Q. To some extent you would notice it?

A. Just once the complaint was made to me that snow came in a certain window a couple of winters ago, and in that connection I may say that we had a man tighten up the windows. I think the floor should be renewed by all means.

Q. Do you see the food given to the patients.

A. We go through it every meal. I go through it at breakfast regularly, either the matron or I. It is always well cooked. A time perhaps, once in three or four months or so, the steam might be a little late and the porridge a little raw. I mention that for simple truth's sake. That is not the rule. It took place once. When I say raw I don't mean raw altogether but just a raw taste.

Q. Did you ever see a dinner not well cooked? Turnips not boiled?

A. I never saw that.

man repairing the windows they are still out of repair?

A. I consider there is something necessary to be done to them. They are loose, open and rattle very much in stormy weather.

Q. What would it mean to keep the heat on in addition to the extra coal, what is the only other expense necessary?

A. I don't think there is any need of keeping a fire up all night but as a rule on a frosty night it would be kept up at 11 o'clock and after one o'clock.

Q. If it was kept up all night the pipes would not freeze?

A. No I don't think it is necessary to keep it up all winter only extreme frosty weather. It would be only an extremely frosty night I would keep it up all night. I have nothing to do with the letting of contracts for supplies.

Q. Do you know that the meat had not been good, not the right kind of meat?

A. The meat is all right but a little tough sometimes.

A. Would it be the quality called for that you should expect them to get? Has it been brought to your notice?

A. No not particularly. The meat is better sometimes than other times.

Q. Put is the other way, say worse sometimes?

A. You can do that if you like.

Q. Do you admit it was always sufficiently good for putting before patients at all times?

A. Yes.

Q. Regarding the orders of the house requiring the change of soiled bed clothes. Did you know at any time of any of the soiled beds being left there?

A. Beds were soiled sometimes.

Q. How are they looked after?

A. This is what takes place—There is a night watch male and female (I am speaking of the male) When they come to a patient, (they know who are the wet patients), they rouse them up two or three times a night to prevent them from wetting the bed and soiling it. Sometimes they do it in spite of everything. They then take the wet thing from under them, and there is a rubber sheet under that. They strip off that and put another in under them to be dry for the rest of the night and sometimes they wet again. Some of the epileptic patients.

Q. They are not allowed to sleep in wet clothes.

A. Not at all, the attendants can prove that.

Dr. Blanchard—I want to speak of the necessity of a new floor. I want to impress upon the Jury that it is not due to the officials in the Institution that there is not a new floor. It has been brought to the notice of the Government time after time. I mentioned it in my report.

Mr. McPhail. Five hundred and fifty feet of fire hose was got in April 1897, and placed in coils instead of hooks and water put on once a month for testing and for practice to attendants. The last test was June 5th, and the hose are always attached to the water taps.

Mr. Newson: Q. Going through the basement everything was nice and clean. I do not consider, perhaps it would be necessary to have it as clean as we found it to-day; but was the basement prepared for the Grand Jury to visit?

A. The basement is swept out once a week, every Saturday afternoon as a rule,

Q. Is it generally as clean as we found it to-day?

A. Yes. There was a pile of ashes or something that we saved to finish the concreting of a floor, and as I said to you the rats got into that, but that was removed not long ago.

Dr. Blanchard: It is just as it always is.

Q. Were the surplus cats removed?

A. No, that remains to be done. We choose the cats to the rats. It is the rule of the Institution that patients are to help in the work and that attendants have to do the work, and work with the patients. They are not to order the patients to work and not put their own hands to it.

Q. Would they order the patients to clean up?

A. Not to my knowledge, it might have been so when my back was turned. The patients sweep, scrub, and wash, along with the attendants. The attendants are always with them in the wash room.

Dr. Blanchard: It is against the rule for one patient to bathe another patient.

Mr. McPhail: They help and the attendant is there with them. I have seen an attendant and a patient both with sleeves rolled up to the shoulders washing away and bathing another patient.

JEREMIAH LARKINS, ATTENDANT, EXAMINED.

Q. You are in charge of the Hospital ward?

A. Yes.

Q. Do you know a patient named Wheeler?

A. Yes,

Q. Have you ever seen any vermin about his bed or any other?

A. No.

Q. Have you known him to make any complaints about it?

A. No, Sir.

Q. What precautions are taken to prevent it?

A. There was no precaution.

Q. Don't you take precautions?

A. Yes, we wash the beds

Q. How often do you wash them?

A. Clothes, sheets, pillow-slips shifted every week. The patients are bathed and clean clothes put on them once a week.

Q. Do you use kerosene oil or anything like that in bedsteads?

A. We wash beds and put kerosene oil on the bedsteads and clean them 3 or 4 times a year.

Q. How often do you change the straw?

A. The straw is changed 4 or 5 times a year. Dr. Blanchard, Some is changed almost every day, Witness. They get slack after a while and we have got to change them. I never saw vermin on patients since I came to work. There may be an odd bug in the bed. No lice of any kind. There is no truth that the bed was lousy a fortnight ago

Q. Did you ever see any snow come through the windows?

A. Not exactly so. Perhaps after a bad storm you might notice

Q. Does the rain come in on patients faces?

A. No, never seen or heard that. Might be a little in a real drifting snow storm.

Q. Do the rooms get very cold in very cold nights?

A. Yes when steam is shut off it gets pretty cold.

Q. What time do you shut steam off?

A. Nine or ten o'clock.

Q. There is no more steam until next morning at 6 or 7?

A. As soon as we get up; called out at 5 o'clock.

Q. You find it cold sometimes in the interval?

A. A frosty night it is cold and the patients complain.

Q. Did you ever see water freeze on the floor?

A. Not when scrubbing floor. I have seen floors around the heater the exhaust pipe from the heater, have seen it freeze.

Q. Would heat be on when it froze.

A I have seen it freeze after the steam would go down

Q. That would be in the wards? It would be below freezing in cold weather.

A. Yes. The fireman puts on fire at 5 o'clock. It does not take two hours. The whistle blows for breakfast at a quarter to seven.

Q. Have you known wards to remain damp in damp weather after washing.

Yes damp but not for three or four days, perhaps part of the day after being washed.

The Trustees being then notified returned to the room, and Hon. Mr. Farquharson said:—

If any weak point has been observed by the Grand Jury in their inspection of the premises, or if there are any instructions to give, the trustees present would be glad to hear them and to answer questions. The letter in the Examiner cast most serious reflections on the trustees, as people abroad would imagine we were barbarians. I think the editor of the Examiner should have been present at the enquiry. One of the boilers is a little small, but a new one has been ordered and will be put in when the annex is built. The windows are said to be open, but a glazier went over them a year ago and everything possible was done to them. I again repeat if there is any weak spot that you think you have discovered, we are here to justify it if it can be done, and if not to remedy it.

Mr. Haszard, Foreman—I think that statement is a very fair one, and it gives us an opportunity to bring to the notice of the trustees any objections we may see. It has been admitted by the evidence we have heard that the place is cold in winter at night time. We would like to ask the trustees about that, for that the heat be kept on continuously during the winter months.

It was here decided to summon the Engineer.

Robert McPherson Engineer, examined:

Q. (By Mr Haszard.) What hours have you for keeping the heat on and off?

A. The orders I got are 10 and sometimes 11 o'clock at night—a cold night. The coldest night in winter 11 o'clock.

Q. What time do you start in the morning?

A. At 20 minutes to 6 steam is on the building. We start at 5 o'clock.

Q. In cold weather there are 7 hours that the building has no heat?

A. Banked up.

Q. You were not instructed at any time by the Commissioners to shut off steam to save coal?

A. I used my own judgment and every cold night I ran up to 10 and 11 o'clock at night if necessary.

Q. Had you any instructions lately about a new boiler?

A. The trustees are going to get a new boiler, and asked me to make out a plan.

Q. How many years is it since some of the radiators have not been working in little rooms up stairs?

A. In this part of the building only three years.

Q. How many years has it been that way?

A. Since they were built. When there is a certain wind there is no heat for the patients.

Q. That matter has been reported often, you have reported it as engineer?

A. Yes, I have done everything a man could do, reported it to the doctor, to make them work, and nothing done about it. HON. MR. FARQUHARSON—I never heard a complaint of any patients being cold at any time with a certain wind. WITNESS: For 18 years.

Mr. Farquharson—It is the first time I have heard of it.

Q. Have you ever gone through the rooms at 10 or 11 at night and found out what the temperature was?

A. Yes.

Q. You have gone through frequently?

A. Yes, they have a temperature in the wards from 70 to 80 degrees.

Q. Did you ever know the temperature in the wards to go below freezing?

A. It is not my place to take temperature.

Q. What steam do you carry?

A. 40 lbs. of steam in the day time, all day until closing up, 35 to 40 lbs.

Q. How many rooms have you to heat, do you know the cubic contents of the building? What is the cubic contents of the boiler.

A. Tubular 14 feet long by 5 1-2 diamteer.

Q. Are there two boilers?

A. Two boilers. The other is 16 feet long by 4 1-2 diameter, 4 inches tube, and a new one will be ordered.

Q Was the freezing of the water on the floor in scrubbing brought to your notice?

A. I never heard it before. It is the first time I ever heard a complaint. I put in 19 hours out of the 24.

The foreman, Mr. Haszard, in answer to a question by Hon. Mr. Melean with regard to the conditions of the floors, said they were in bad condition. The worst ones were in male wards 1 and 2.

Mr. McPhail—Ward 3 wants as much as possible.

Mrs. Beaton, Matron, examined:

Q. About the food, bad meat, mice in meal, milk bad, do you know anything about that?

A. I have seen a little dust in the bottom of the pitcher sometimes, and as for the meat, I always seen it good, and the porridge, one day there was a little dust, black specks, in it. This was changed and we got some good meal, and as for the food it was cooked as well as can be. There never was a bit of anything raw went up since I came here. It is well cooked and the bread is good and everything I saw.

Q. Do you report everything not right at once?

A. I do.

Q. To whom?

A. The Doctor. I did not at that time.

Q. How did you overlook that?

A I just came here first, I did not know. I told Mr McPhail and the rest of them. As for taking things upstairs, I did it and it is only ones that are locked up that I take anything for, and anyone sick. The Doctor gives orders and I attend to that, and if they don't take it, I then take up myself an egg beaten, or milk, to see if they will take it sometimes, if they cannot take it when set before them. I never tried to excite the patients, but I used to take up things to win them over.

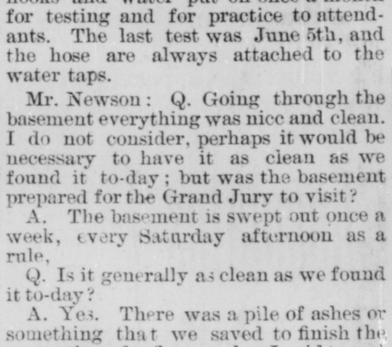
Q. But not contrary to orders?

A. I had no orders to do it, still I did it. It would be only a cake I would bring up to give them.

comes out here that is not fit for food?

A. Everything I see is fit and clean and nice that goes to them. I did not see anything, if I did would report it at once. We could take the food to our table as well as them and I take the food and taste it before it goes up. I see to them in every way as far as I can.

Inquiry adjourned at one p.m.



SICK HEADACHE

Positively cured by these Little Pills.

They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue Pain in the Side, TORPID LIVER. They Regulate the Bowels. Purely Vegetable.

Small Pill. Small Dose, Small Price.
