

A "Low-Shoe" Cold.

A certain vivacious young girl on 19th street has been in the habit of wearing low shoes and a week or so ago caught a bad cold in consequence. Her mother told the doctor about it secretly, and asked him to advise her not to wear them. When the young lady was ushered into his presence he requested to give her tongue the usual outdoor exercise, and he examined it attentively. "Yes, I thought so," said he, "with a shake of the head, 'you have been wearing low shoes and have caught what we medical gentlemen call a 'low shoe' cold. Now you must quit wearing them at once, and take the medicine I am about to prescribe faithfully and according to direction." He wrote an innocent prescription, and was about to leave the house, when the patient called him back and paralyzed him by saying: "Since you were so clever in discovering a 'low shoe' cold by looking at my tongue, will you be kind enough to take of my shoes, look at my feet, and tell me if my hat's on straight?" The doctor says he has sworn off treating "low-shoe" colds—the girls nowadays are too smart altogether.—Washington Republican.

In Brief, And to the Point.

Dyspepsia is dreadful. Disordered liver is misery. Indigestion is a foe to good nature. The human digestive apparatus is one of the most complicated and wonderful things in existence—it is easily put out of order. Greasy food, tough food, sloppy food, bad cookery, mental worry, late hours, irregular habits, and many other things which ought not to be, have made the American people a nation of dyspeptics. But Green's August Flower has done a wonderful work in reforming this sad business and making the American people so healthy that they can enjoy their meals and be happy. Remember: No happiness without health. But Green's August Flower brings health and happiness to the dyspeptic. Ask your druggist for a bottle. Seventy-five cents.

DRINKING CARBOLIC ACID.—A boy named Flaherty, between seven and eight years old on Thursday night, swallowed a teaspoonful of carbolic acid in mistake for cough mixture. Dr. Addy was summoned and administered antidotes, the child at the time suffering very much from the effects of the acid.—St. John Sun.
