Scientific Miscellany.

A SUBSTITUTE FOR GLASS AND CELLULOSE.—A new glass-like material, which may be used for a great variety of purposes, has been produced by Friedrich Eckstein at Vienna. It is made by dissolving 4 to 8 parts of collodion wool in about 100 parts by weight of ether or alcohol, adding 2 to 4 per cent. of castor oil and 4 to 10 per cent. of rosin or Canada balsam, and drying upon a glass plate at a temperature of 120° F. The compound soon solidifies into a transparent sheet, having substantially the properties of glass. It resists the action of acids, alkalis and dilute acids, and has the advantage over glass of being flexible. It may be colored or ornamented with printed designs. The addition of magnesium chloride reduces its inflammability, and zinc white gives it the appearance of ivory, adapting it for use for cuffs, shirt fronts, etc. Increasing the relative proportions of castor oil and rosin imparts to it the toughness and pliability of leather, and it may even be made into driving belts.

ELECTRIC LIGHT WRITING.—A new system of electrical signalling, for marine and general use, has been shown at the Royal Naval Exhibition by Mr. C. E. Kelway. A framework contains 54 incandescent lamps in 6 rows of 9 each, and wires connect the lamps to a keyboard, like that of a typewriter. On pressing the proper key, the letter "A" is shown by the glowing of thirteen of the lamps arranged to form that letter. The other letters and the numerals respond in a similar manner when the corresponding keys are pressed, and messages spelled out may be read at a distance at night with great facility.

A COMPANY HAS BEEN ORGANIZED in Augsburg for the manufacture on a large scale of artificial silk, the invention of Dr. Lehner, a chemist. In appearance and elasticity the product cannot be distinguished from the natural silk. Its strength is two-thirds as great, and it costs only a fourth as much.

A FIRE in a spinning mill at Isenheim, Alsace, was extinguished by filling the building with steam. Much less damage was caused than if water had been used.

THE WORLD'S STEAM POWER.—A German authority affirms that four-fifths of the steam engines in existence have been constructed within the last 25 years. France has 47,590 stationary engines, 7,000 locomotives, and 1,850 marine engines; Germany, 56,000 stationary engines and boilers, 10,000 locomotives, and 1,700 marine engines; Austria, only 12,000 stationary engines and 2,800 locomotives. Excluding locomotives, the force of the steam engines of the United States reaches 750,000 horse power; of those of England, 7,000,000; of Germany, 4,500,000; of France, 3,000,000; and of Austria, 1,500,000. At the beginning of 1890, the world's locomotives numbered 105,000, representing from 5,300,000 to 7,000,000 horse power. The total horse power of the steam engines and locomotives on the earth may be taken as 49,000,000. This represents the working capacity of more than 1,000,000,000 men, or double the number of workers in the world,—the horse power of an engine being estimated as equivalent to the power of three horses, and the power of a horse as equivalent to that of 7 men.

LIGHTNING PROOF SHIPS.—A German commission reports that no case of damage by lightning to a ship with wire rigging has been recorded, except in a few instances where continuous connection had not been made with the hull. With iron or steel hulls and wire rope rigging, the whole ship forms an excellent conductor to lead the electric discharge safely to the ocean. This fact explains why it is that ships at sea suffer much less frequently from lightning now than in the days of wooden vessels.

A FRENCH BEE-KEEPER has experimented with his bees as carriers of dispatches. One difficulty of the bee service is that the insects will not return over a distance of more than 2 or 3 miles.

PIPES OF RAMIE FIBRE are made available for steam through hardening by tremendous hydraulic pressure. The finished pipe is 2 1/2 times as strong as steel, while remaining comparatively light.

A PRESSURE OF 1,200 ATMOSPHERES has been produced by M. Chabry by the electrolytic generation of gas in a closed iron sphere, the highest pressure pressure having been 447 atmospheres.

NEW ALLOYS.—This list of recently invented alloys is given by the Glasgow Engineer: Nickel aluminium, composed of 20 parts nickel and 8 parts aluminium, used for decorative threads; zinc nickel, composed of 90 parts zinc and 10 parts nickel, used as a pigment, nickel hardened, composed of 130 parts type metal and 5 parts nickel, used for metallic types and for electrotype; pistidine, composed of 60 parts of platinum, 35 parts nickel, 2 parts gold and 3 parts iron, used for crucibles and chemical utensils; roseine, composed of 40 parts nickel, 10 parts silver, 30 parts aluminium, and 20 parts tin for jewelers work; ambrone, composed of 60 or 40 parts cobalt, 10 parts aluminium, 40 or 30 parts copper; metaline, composed of 35 parts cobalt, 25 parts aluminium, 10 parts iron and 30 parts copper.

ELECTRICAL NOVELTIES.—A physician's case is made with an electric lamp and a storage battery in its head, and serves many of the purposes of a lantern. An electrical stop watch has been tested in a bicycle race, where it determined the winner, although he was only one hundredth of a second ahead. Edison's electric percussion drill can be worked at any distance up to 3 miles from the dynamo, and will bore three inches a minute into the hardest granite. The new electric log is claimed to give much more reliable measurements of the speed of fast vessels than the ordinary apparatus.

An ingenious camera for photographing the internal organs of men or animals has been invented in Germany. It is cylindrical,

cal in shape, is contained in a rubber tube, and has two hemispherical shutters and two minute incandescent lamps. Pressing a pneumatic bell moves the camera forward in the tube, opens the shutters, and makes the electric light contact. Removing the pressure closes the shutters, puts out the light and replaces the camera.

In three cases of gastric ulcer reported by Dr. Hersey, recovery has followed a diet of ice cream. The first patient, a woman of 35, had lost 25 pounds, and suffered from great pain at her breast, she was given from 1 to 3 quart daily of ice cream for two months, when she had gained 24 pounds, and her ordinary diet was gradually resumed.

Literary Notes.

The twenty-fifth volume of Harper's Bazar will begin with the number for January 2, 1892. This number will contain the opening chapters of a new serial by Walter Besant, entitled "The Ivory Gate"; also a charming Knickerbocker story, "The First Foot," by Agnes Carr Sage, illustrated by Rosina Emmet Sherwood.

The announcement of the establishment of a Canadian monthly magazine is a source of gratification to the very large class of readers who have been waiting to welcome just such a periodical from a Canadian publishing house. The Sabiston Litho. & Pub. Co., Montreal, have taken the decisive step, and the first issue of the Dominion Illustrated Monthly will make its bow to the public during January. It will be a 64 page magazine, handsomely illustrated, and Canadian and patriotic in tone. The most gifted of Canadian authors will contribute to its pages, especially. The subscription price, \$1.50, places it within the reach of all.

The rich men who during their lifetime carry out their philanthropic intentions are the ones who alone are sure that their wishes will be regarded as to the disposition of their property. Another millionaire has shown his practical wisdom as well as his philanthropy by founding under his own supervision a great school for practical education in the sciences and arts. Anthony J. Drexel, of Philadelphia, has just had the satisfaction of attending the dedication of the Drexel Institute, a building he has erected and endowed at a first cost to himself of \$15,000,000. It is to be an institution something like that founded by Peter Cooper in New York. The money spent in equipping such schools as our own, men of wealth, who can do no better way hand down names, the more they are honored by many generations of beneficiaries.

The original reply of the Bulgarian Government to the remonstrance of M. Lanel, the French diplomatic agent, was firm and dignified and at the same time moderate. It pointed out that M. Chabry had not now offered for the first time, that on two previous occasions his audacious falsehoods, tending to bring discredit on the Bulgarian Government, had induced the authorities to take measures for his expulsion and that it was only on the distinct understanding, as was well known through the agency, that he would not repeat the offence, that the order had not been executed. The French agent was called upon to confirm this statement from his own knowledge. Yet (as he also knew), M. Chabry, instead of being warned by those experiences, had persisted in his outrageous misrepresentations, all of a character to cast discredit on Bulgaria and to create difficulties abroad with its Government. It was to put an end to this state of things; which was becoming intolerable, that the Bulgarian Government, with much reluctance, found itself obliged to enforce the sentence of expulsion against a correspondent who had expiated his misdeeds. In so doing the Government had followed the principles of self-protection that ruled in all civilized states.

THE NEW TOILET GEM.—Philodermis owes its immense success to the fact that it is radically different from any preparation in the market. It is a bland and soothing liquid, nicely perfumed, and when applied to the hands and face produces a delicious sense of coolness and comfort, exercising also a direct curative action. It is entirely free from the sticky quality of glycerine and the greasy nature of camphor ice or cold cream. To those who are unable to use glycerine, from its irritating effect, Philodermis is a necessity. Those who use it have a beautiful complexion. It is harmless as milk. Sold by druggists everywhere. Price 25 cents. net 1m dw

ROSES IN DECEMBER.—The Victoria (B. C.) Colonist reports: To-day, on the 18th of December, a week only before Christmas, Victorians are sending to their friends in the East sprigs of holly, roses, and chrysanthemums, taken from their grounds and gardens. They could also send daisies, violets, arbutus, and other hardy flowers. Although the weather has been for the last two or three weeks, uncommonly inclement in Victoria, there are still seen in many of the gardens in the city and suburbs flowering plants. The ground is not frozen, and the grass is greener than it was in August. The weather too, just now, is milder than the October weather of Eastern Canada.

INCREASE YOUR WEIGHT.—If you are losing flesh and blood, commence at once taking Miller's Emulsion of Cod Liver Oil, which is far ahead of all other preparations of the kind in existence. By taking Miller's Emulsion people gain from 5 to 10 lbs. by the time the first bottle is consumed. It is the greatest blessing of the century to all in delicate health, or who suffer with coughs, colds and ailments that tend to consumption. Remember, Miller's Emulsion contains all the constituents found in what. It is used in the hospitals and asylums of the country. In big bottles, 50c. and \$1 at Charlottetown drug stores. net 1w 5

NASAL BALM

SOOTHING, CLEANSING, HEALING.
Instant Relief, Permanent Cure, Failure Impossible.
Many so-called diseases are simply symptoms of Catarrh, such as headache, toothache, sore throat, nasal discharge, itching and sneezing, general feeling of debility, etc. If you are troubled with any of these or kindred symptoms, you have Catarrh, and should lose no time in procuring a bottle of NASAL BALM. Be warned by time, neglected cold in head results in Catarrh, followed by consumption and death. Sold by all druggists, or sent, post paid, on receipt of price 50 cents and \$1 by addressing FULFORD & CO., Brockville, Ont.

CURES GOLD AND SILVER HEAD CATARRH

GRATEFUL—COMFORTING
EPPS'S COCOA
BREAKFAST.

"By a thorough knowledge of the nature and properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which will save many heavy doctor's bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle malaries are floating around us, ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Chas. Service Gazette

Card of Thanks!

TO THE PUBLIC:—We desire to take this opportunity of thanking our many friends and patrons throughout the island, but especially in the City of Charlottetown, for the very liberal and handsome way in which they have patronized us during the past year, and particularly for the confidence reposed in us by making such large purchases during the Christmas Season. In the past we have spared no pains, so that we might always have the newest and best in every line of goods we handle, and our prices have been made as low as possible within business principles. We trust, then, that everyone who has made a purchase at our Store has found—what we tried our best to give—satisfaction in every article purchased; and believing that we have succeeded in this, we would ask for the future a continuance of that patronage, which we will try to command by keeping at our Store the very best line of goods at the lowest possible rates. Again thanking you, we are, yours respectfully,
BAZAAR CO.,
A. FULTON, Manager.

MALTO PEPTONIZED PORTER
For Invalids, Consumptives and Dyspeptics.

Over 200 Medical Men and the Medical Press Generally Endorse It.

D. C. Allan, M. D., Jefferson Medical College, Philadelphia, N. S., himself a confirmed dyspeptic, writes of Malto Peptonized Porter: "In proportion to my stomach without distressing me, and so far as that which I have vainly looked for. I should like physicians, in the interest of such afflicted persons as I am from a starving disease, to know the good qualities of your preparation."
J. C. W. M. D., University of Penn., Springfield, Mass., says of Malto Peptonized Porter: "I find it a most valuable preparation in cases where the stomach is irritable and could not retain any food."
The above are a few of over 200 Medical Testimonials received. For sale by all Druggists.
A supply of M. P. P. has been stored with GEORGE E. HUGHES, Charlottetown, which will be delivered during the winter months to island patrons, by order from
The Malto Peptonized Porter Co. (Ltd.),
TRURO, NOVA SCOTIA.
