LIVING IN MANILA

Living in Manila, says Joseph Earle Stevens in McClure's Magazine, is dirt cheap—if you are not fond of tinned peas and asparagus, that come from France and Germany.

"Our cook got 40 cents per diem to supply our table with an entire dinner for four people, and for 5 cents extra he would decorate the cloth with orchids and put peas in the soup. As a servant, the native is satisfactory if you have enough of him. He takes bossing well, and you compound his head if things go wrong. In fact, he rather expects it than otherwise, and does not put his arms akimbo and march out of the house when you mildly suggest that the quality of ants in the cake was not up to standard. For ants are everywhere, and unless the legs of your dining table and cook-stove stand in cups of kerosene, the ants will be apt to eat the dinner before you do.

"For wages, these boys—and they are called boys till they die—get some \$4 a month, and on this salary my own servant paid 10 percent to the government, supported a wife and two children, bought all his own food and ran a fighting cock. I don't know how much he stole, but he used sometimes to call on me for an advance, saying that he needed funds to bury some relative. At first I was touched at his loss, but later on, when he tried to bury his mother twice over, I found it necessary to keep a record of the family tree in order not to be led into paying an advance on the cost of two funerals for the same person."

If you are ill you need a doctor in whom you have confidence.

If you need a remedy you want one that has been tested for years; not an obscure, untried thing that is urged upon you, or on which you save a few cents—that is no consideration as against health.

For wasting in children or adults, Scott's Emulsion of Cod-liver Oil with Hypophosphites has been the recognized remedy for twenty-five years.

INSIDE OF A MOLECULE

The New South Wales government analyst, William M. Hamlet, delivered the presidential address in the section of chemistry at the recent meeting of the Australian Association For the Advancement of Science, the subject being "The Molecular Mechanism of an Electrolyte."

He defined an electrolyte as a body in solution or state of fusion, capable of being instantaneously decomposed by a current of electricity, and he claimed that if the explanation he offered was adequate for the electrolyte it must hold good for the constitution of the matter in the universe, so that the treatise on the electrolyte has a most important scientific bearing. The method of investigating the action of one body upon any other, he reminded his audience, was brought to a high degree of accuracy by the immortal work of Sir Isaac Newton. He alluded to some observations of the late Professor Clifford, made over 20 years ago, this authority remarking, almost prophetically, "We can look forward to the time when the structure and motions in the inside of a molecule will be so well known that some future Kant or Laplace will be able to make an hypothesis about the history and formation of matter."—Nature.

New York has a shop in which Bibles and rum are sold side by side. The place is at the foot of Washington street, not far from the Syrian colony, and its patrons include Syrians, Armenians, Turks, Russians and Irish longshoremen. The Bibles, together with other books of a religious character, are kept in a case at the end of the bar.

The Place for the Repentant.

"They had eloped and returned for the parental blessing.

"Father," the beautiful young woman said, "we are sorry for what we have done. Will you?"

"Then," the stern old man interrupted, "why don't you go to the lawyer around the corner? I'm no divorce court."—Chicago News.

One Consolation.

There is one consolation in being on the shady side of life. When a man gets to be 50 years or so and he says of a young woman, "Confound it, if I wasn't married already I'd marry the girl myself," he actually believes she would have him. This is as good as getting her, better perhaps.—Boston Transcript.

THE CAVALRY REGIMENT

The sabers clank'd, the men look'd young and healthy and strong; the electric tramping of so many horses on the hard road, and the gallant bearing, fine seat and bright faced appearance of a thousand and more handsome young American men, were so good to see. An hour later another troop went by, smaller in numbers, perhaps 300 men. They, too, look'd like serviceable men, campaigners used to field and fight. July 8.—This forenoon, for more than an hour, again long strings of cavalry, several regiments, very fine men and horses, four or five abreast. I saw them in Fourteenth street, coming in town from north. Several hundred extra horses, some of the mares with colts, trotting along. (Appear'd to be a number of prisoners too.) How inspiring always the cavalry regiments. Our men are generally well mounted, feel good, are young, gay on the saddle, their blankets in a roll behind them, their sabers clanking at their sides. This noise and movement and the tramp of many horses' hoofs has a curious effect upon one.—"The Wound Dresser," by Walt Whitman.

Lord Rothschild's Physician.

(One of the Chinese methods is, I believe, to pay the physician as long as the patient is in good health, with the obvious intention of making it the interest of the doctor to keep the patient well. Apparently this is the method Lord Rothschild has adopted. I hear that he pays Sir William Broadbent a retaining fee of 1,000 guineas a year, conditional on Sir William visiting him every Saturday to feel his pulse and see that he is keeping in good health.—Sheffield (England) Telegraph.
