The Teacher
Who advised her pupils to strengthen their minds by the use of Ayer's Sarsaparilla, appreciated the truth that bodily health is essential to mental vigor. For persons of delicate and feeble constitution, whether young or old, this medicine is remarkably beneficial. Be sure you get Ayer's Sarsaparilla.
"Every spring and fall I take a number of bottles of Ayer's Sarsaparilla, and am greatly benefited."—Mrs. James H. Eastman, Stoneham, Mass.
"I have taken Ayer's Sarsaparilla with great benefit to my general health."
—Miss Thylza L. O'Leary, Palmyra, Md.
"My daughter, twelve years of age, has suffered for the past year from
General Debility.
A few weeks since we began to give her Ayer's Sarsaparilla. Her health has greatly improved."—Mrs. Harriet H. Batters, South Chelmsford, Mass.
"About a year ago I began using Ayer's Sarsaparilla as a remedy for debility and neuralgia resulting from material exposure in the army. I was in a very bad condition, but six bottles of the Sarsaparilla, with occasional doses of Ayer's Pills, have greatly improved my health. I am now able to work, and feel that I cannot say too much for your excellent remedies."—F. A. Pihlkham, South Molunness, Me.
"My daughter, sixteen years old, is using Ayer's Sarsaparilla with good effect."—Rev. S. J. Graham, United Brethren Church, Buckhannon, W. Va.
"I suffered from
Nervous Prostration,
with lame back and headache, and have been much benefited by the use of Ayer's Sarsaparilla. I am now 80 years of age, and am satisfied that my present health and prolonged life are due to the use of Ayer's Sarsaparilla."—Lucy Moffitt, Killingly, Conn.
Mrs. Ann E. Farnsworth, a lady 79 years old, So. Woodstock, Vt., writes: "After several weeks' suffering from nervous prostration, I procured a bottle of Ayer's Sarsaparilla, and before I had taken half of it my usual health returned."

Ayer's Sarsaparilla,
PREPARED BY
Dr. J. C. Ayer & Co., Lowell, Mass.
Price \$1; six bottles, \$5. Worth \$2 a bottle.

ANTHRACITE COAL.
DISCHARGING to-day per Brig. Corsican,
300 Tons Anthracite Coal,
(EXTRA QUALITY.)
C LYONS.
July 23, 1889.

Local and Other Items.
BASEBALL.—The Moncton's have actually won a game! On Saturday they defeated the Shamrocks, of St. John. The score stood 17 to 1.
APPLES AND BLOSSOMS.—An apple tree in the garden of Mr. McKenzie, Weldon Street, Moncton, has apples on one side and blossoms on the other.
THE CHARGES WITHDRAWN.—The owners of the American schooner Mattie Winslip have paid \$2,300, and all the charges have been withdrawn.
JOHN L. GETS A YEAR.—The trial of John L. Sullivan, for prize fighting, was concluded at Paris, Miss., on Saturday, and "the world's champion" was sentenced to one year imprisonment. Kilrain expects to get a similar dose.
THE GULLOTTINE.—The first gullotine ever seen in Halifax is now there en route to St. Pierre, where it is to be used in a few days for the execution of Gael, who recently murdered an old man in Jack the Ripper style.

REMEMBERED IN HIS WILL.—A man named Arthur C. Chambers, of Boston, was to have married Amanda B. Liddell, of Halifax, but took scarlet fever and died in Montreal while on his way to her. He has willed her \$30,000.
MUCH INJURY is done by the use of irritating gripping compounds taken as purgatives. In Ayer's Pills, the patient has a mild but effective cathartic, that can be confidently recommended alike for the most delicate patients as well as the most robust.
NEW CHURCH.—The new Presbyterian Church at Moncton was opened for public worship on Sunday. The pastor, Rev. Mr. McKenzie, was assisted on the occasion by Rev. Thomas Corbett, of Tyne Valley, and Rev. Mr. Shackford, of Mount Stewart.

NO MEDICINE in the world is in better repute or more widely known than Ayer's Sarsaparilla. As a safe and certain remedy for all manner of blood diseases, leading physicians and druggists everywhere recommend it in preference to any other.
LOOKS LIKE PROSPERITY.—Says the Summerside Pioneer: Changes and improvement are continually being made in the town. Not only are the dwellings being constantly improved, and new and handsome ones being built, but the streets are being kept in good repair and new ones opened up.

Y. M. C. A.—A meeting was held in Moncton on Monday to devise means for carrying out the plan for the erection of a \$15,000 Y. M. C. A. building in that thriving town, the land for which has already been secured at a cost of \$5,000. We have not yet heard what decision was arrived at.
THE GOLD YIELD.—Some beautiful specimens of gold quartz were brought to Halifax from the Annapolis mines at Montague, N. S., a few days ago, all the result of one shot. The quartz, which would, when compact, be about 18 inches long by 15 in height and 8 inches in width, is plentifully studded with pure gold, and the whole is roughly estimated to be worth over \$3,000.

PRESS MEETING.—The annual meeting of the Maritime Press Association will be held in New Glasgow, N. S., on September 11th. From New Glasgow the members will go on an excursion to Cape Breton. No doubt the sail down the Bras d'Or Lakes will be greatly enjoyed, as will also be the visit to the coal and copper mines of the Island, and to historic Louisburg.
THE DECISION RECONSIDERED.—An Ottawa despatch says that the executive of the Dominion Rifle Association has reconsidered its decision in reference to the alteration of sights on rifles and it has been decided to allow at the coming matches the use of rifles having a width of opening in the back sight not exceeding 26-one hundredths of an inch and cut down to permit the use of the bar at four hundred yards.

STRUCK BY LIGHTNING.—In the severe storm that passed over Irishtown, parish of Moncton, on the 19th inst., Mr. Morris O'Neill's horse was struck by lightning. The electric fluid appeared to enter by the chimney, ripping off the shingles, knocking off the plaster in its descent, and taking a course out of the cellar wall. The inmates of the building were dazed for a few minutes, but fortunately no person received serious injury.
M. W. M. S.—The Summerside Pioneer says: The annual meeting of the Methodist Women's Missionary Society of Summerside was held last Monday evening in the Methodist Church. The meeting was opened by singing and prayer. A general consultation was held on the subject of missions, but as the President was sick and unable to attend the reports were held over. The following are the officers for the ensuing year: Mrs. Robert Costain, President (re-elected); Mrs. C. W. Hamilton, 1st Vice-President; Mrs. F. W. Strong, 2nd do; Miss Ida G. Baker, Corresponding Secretary; Miss Jessie Strong, Recording Secretary; Mrs. D. Schurman, Treas. Mrs. C. W. Strong was appointed delegate to the Convention.

DEATH IN THE ELIXIR.—Dr. A. B. Shaw, of St. Louis, who has been making microscopic examinations of the Brown-Sequard elixir, discovered, while experimenting on Saturday last, that the fluid was alive with multiplying bacteria, although but three hours had elapsed since the elixir was prepared. Bacillus tuberculosis, the bacilli that are supposed to cause tuberculosis, were found in great quantity, thousands being in a single drop of the mixture. Dr. Shaw could arrive at but one conclusion, namely, that the glands were from a sheep infected with the bacilli of tubercle, as the mortar and pestle and the distilled water had been thoroughly sterilized before the mixture was made. Dr. Shaw estimated that in a drachm of the injection millions of these bacilli would have been put into the system, each one capable of multiplying itself indefinitely. The chances would be ten to one that tuberculosis in some form would manifest itself in the person inoculated. Dr. Shaw has since made other experiments, and in two of them the bacillus tuberculosis was discovered. The rod-shaped bacilli were also found in several samples of mixtures made.

Notes and Clippings!
—It is a very prevalent mistake to suppose that great things are accomplished by neglecting little things. Most of us look too high at the outset of life. We are content with nothing but great opportunities, great enterprises, whereas we are no more competent to begin with such things than Darius Green was competent to fly before he became an angel.
—The Fish and Game Protection Society is in active operation. The memorial to the Minister of Marine and Fisheries, prepared by the president, has been signed by the special committee authorized, and forwarded to the Department. This memorial puts the case forcibly and plainly, and we are satisfied that the Minister will aid by every means in his power the society for protecting our valuable fishing interests. The president has personally instituted some six prosecutions against persons violating the fishery laws, and more are to follow.

—Carefully repeated experiments made by an experienced English navigator at Santander, on the north coast of Spain, showed the crest of the sea waves in a prolonged and heavy gale of wind to be 32 feet high, and allowing the same for the depth between the waves, would make a height of 84 feet from crest to base. The length from crest to crest was found to be 336 feet. Other estimates of the waves in the South Atlantic during great storms give a height of 50 feet for the crests and 400 feet for length. In the North Sea the height of crest seldom exceeds 10 feet, and the length 150 feet.
—The number of horses exported from Britain during the six months ended June 30 was 5,015, against 5,348 for the corresponding period last year. The valuation of this year's exportation, however, is £234,548, against £215,822 for the first half of 1888, which figures are in evidence of the correctness of the prediction that fewer but better horses would be bought in Britain this season. The falling off in the number taken by the United States is marked. Up to July 1, 1888, 1,026 had gone to that country; the present year witnessed the departure of only 630 up to the same date. It is possible, however, that importers are a little late in shipping this season, so that when the returns are all in the deficit will not be so large.

—The new lock at American Sault Ste Marie will cost \$4,000,000, and is the greatest work of the kind ever contemplated. The existing docks opened in 1881 were supposed to be equal to the carrying capacity for half a century, but have already proved inadequate to meet the increasing demands of shipping, the tonnage here exceeding that of the Suez Canal. The new lock will take in at one time four of the largest lake-going steamers, and will have a depth of twenty feet instead of the fifteen feet now afforded. A new cofferdam, now in course of construction, will cost \$250,000. The Canadian Government awakened to the necessities of the situation propose to duplicate the old locks, thereby furnishing an alternate route.

—A native of Scotland just returned from a holiday trip to his native country, in speaking of the crop prospects says that there never was a year that farmers felt more gratified and hopeful than the present. The crops, especially in the south of Scotland, are abundant. Hay was secured early, and surpasses the crops of many years back, while turnips and potatoes are alike good. The weather during the former part of summer was warm and dry, and at one time there were fears for the oats; but two or three good days of rain dispelled these forebodings. Harvest in some quarters was commenced as early as the last day of July. Straw is long and heavily topped. The Scotch farmer has grumbled with good cause for some years back, but this season is a glorious exception. He admits his success, and has nothing but smiles for everyone. The summer, indeed, has been the best for many years, with just enough rain for the ground.

—An interesting interview with U. S. Postmaster-General Wainman appears in a New York paper. Perhaps it may be authentic, and perhaps not, but in any event it is an entertaining reading. It is in Mr. Wainman's department of the public service that a particularly large number of "removals" have taken place, and every day dolorful tales have been told of Democratic heels rolling in the dust. The interviewer asked: "They say you turn out a good many Democrats." "Yes, but we can't turn out more office-holders than the Democrats did. When we turn out as many Democrats as Cleveland did Republicans we will have to stop. But up to this time we are a little behind the Democrats, and we can never turn out more than they did. The Democrats should make no complaint until we cut off one more head than they did, which cannot occur. Still our aim is to make no changes without cause." And the very next day Mr. Wainman appropriately addressed the Y. M. C. A. at Saratoga on "Practical Christianity."

—According to Dr. Leuf, when water is taken into the full or partly full stomach, it does not mingle with the food, as we are taught, but passes along quickly between the food and lesser curvatures toward the pylorus, through which it passes into the intestines. The secretion of mucus by the lining membrane is constant, and during the night a considerable amount accumulates in the stomach; some of its liquid portion is absorbed, and that which remains is thick and tenacious. If food is taken into the stomach when in this condition, it becomes coated with this mucus, and the secretion of the gastric juice and its actions are delayed. These facts show the value of a goblet of water before breakfast. This washes out the tenacious mucus, and stimulates the gastric glands to secretion. In old and feeble persons water should not be taken cold, but it may be with great advantage taken warm or hot.
