

... A Quarter Of A Century Is Too Long

We Need A

PROGRESSIVE POLICY FOR AGRICULTURE

After a quarter of a century of neglect by successive Liberal administrations, the farmers of Prince Edward Island **DESERVE** a positive agricultural policy which will remove the doubt and uncertainty of existing farming conditions.

FOR A QUARTER OF A CENTURY THE FARMER HAS BEEN A FORGOTTEN MAN

When you elect a Conservative Government on September 1st you elect a government with a program designed to restore the farmer to his rightful place, designed to underline the forgotten fact that Agriculture is the Island's first industry. When you vote—consider! Here is an agricultural program for you—the Farmer.

When elected we will:

1. ESTABLISH A MARKET EXTENSION SERVICE to vigorously extend the demand for Island farm and fishery products recapturing lost markets and actively developing new ones.
2. BROADEN THE FARM SETTLEMENTS POLICY by changing the statutory age limit from 35 to 50 years of age. Enable a son of 19 years to qualify on a father and son basis.
3. PROVIDE FOR MODERN POTATO STORAGE AND WAREHOUSING FACILITIES at convenient shipping points.
4. INCREASE THE SUBSIDY ON GROUND LIMESTONE.
5. APPOINT A LIVESTOCK ADMINISTRATOR WITH special qualifications in cattle breeding and production.
6. Provide full support in the CONTROL OF POTATO DISEASES.
7. Assist in the establishment of an EFFICIENT SPRAYING SERVICE for farm and fruit crops.
8. PROMOTE PROCESSING PLANTS FOR FARM AND ANIMAL PRODUCTS.
9. ASSIST STUDENTS, ESPECIALLY FROM RURAL AREAS to take courses at the Vocational School in all phases of agriculture, farm management, farm mechanics, forestry and fisheries.
10. PROMOTE MODERN POTATO PROCESSING PLANTS.

PROSPEROUS FARMERS AND PROSPEROUS FARM COMMUNITIES MAKE FOR A PROSPEROUS PRINCE EDWARD ISLAND
