Joey Looks For Development Of Major Projects In Nfld.

By JACK PICKETTS

ST. JOHN'S, Nfld. (CP)—It would be a "wonderful dream" to come true if three major industrial projects were to start in Newfoundland this year, Premier Smallwood said here. He said he expects them to start in the not too distant future if it isn't this year.

Negotiations for all three—mining, paper and hydro-electric development — are underway, Mr. Smallwood indicated, and if they don't get started sometime "you will never be able to blame me for failure to try."

But Mr. Smallwood, in what is coming to be known as his "state of the union" address given each January to the St. John's Rotary Club, was obviously not afraid there would be any reason for fixing blame for failure on him.

He said he "would like to be able to announce" that a third paper mill for the province is about to begin.

This he couldn't do, he said, but there was a "great resurgence" of interest in the mill in the last two weeks which he expects to continue. This year "could see the commencement" of the third mill project.

Newfoundland has for years been trying to establish a third paper mill, last year passing legislation which was to result in a shuffle of timber rights to get crown timber into one general area for better acres.

Mr. Smallwood said Ontario is begging for electricity, which Newfoundland can supply if Hamilton Falls in Labrador is developed. The problem lies in the physical distribution because the electricity has to go through Quebec, he said.

This explained his several talks over the last year with Premier Jean Lesage of Quebec. Mr. Smallwood said. Without Quebec's co-operation it was possible the hydro-eletric potential of Labrador—something like 7,000,000 horse power—would never be fully realized.

"But," said Mr. Smallwood "why shouldn't Newfoundland and Quebec develop and distribute the power jointly? We have the power, Quebec has the land over which to transmit it."

Development of Labrador's Julian Lake iron ore deposit by Canadian Javelin Limited was the third project which Mr. Smallwood would like to see start this year, and which he said could start if negotiations now under way with Japan are successful.

President John C. Doyle of Javelin is now in Tokyo trying to sell 7,000,000 tons of iron ore a year for 20 years to the Japanese steel industry and Mr. Smallwood, who returned from Tokyo Monday, was "confident" of at least some success.

He said Javelin would process iron ore one step further than the companies now in Labrador, producing pig iron by a direct electrolysis process. But to start mining, Javelin needs markets for about 3,000,000 tons of ore.

Many Eskimos Are On Relief

OTTAWA (CP) — Between 25 and 50 per cent of the Eskimos in the Keewatin area of the Northwest Territories are drawing relief, the territories Council was told here.

Clare Bolger, the northern affairs department's Arctic administrator, said Keewatin, hugging the northwest side of Hudson Bay, is "certainly the depressing part of my district."

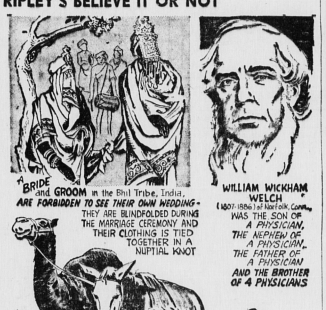
Keewatin has a population of 2,345, mostly Eskimos. Farther up in the district of Franklin, which has a population of 5,700, the unemployment rate is "roughly five per cent."

Mr. Bolger was asked by a council member to comment on press reports about dire hardship in the Keewatin settlement of Eskimo Point.

He said he hasn't seen the reports, but the situation there "is quite serious." Rankin Inlet and Baker Lake were also "distressed areas."

The industrial section of the department was making a concerted effort to establish some type of employment in the region, but N.W.T. Commissioner Gordon Robertson said there was still no clear-cut answer.

RIPLEY'S BELIEVE IT OR NOT



CONTRACT BRIDGE

By B. JAY BECKER

South dealer.
Both sides vulnerable.

NORTH
♠ K 8 2
♥ J 10 9 8 4 3
♦ A 8 7
♣ Q 10

WEST
♠ A 10 8 6 3
♥ 2
♦ J 10 6 4
♣ K 7 5

EAST
♠ Q J 9 4
♥ 7 5
♦ 9 3
♣ J 9 6 4 2

SOUTH
♠ 7
♥ A K Q J 6
♦ K Q 5 2
♣ A 8 3

The bidding:

South	West	North	East
1 ♥	Pass	2 ♦	Pass
3 ♥	Pass	4 ♥	Pass
4 NT	Pass	6 ♦	Pass
6 ♦	Pass	6 ♥	Pass

Opening lead—ace of spades.

How would you go about trying to make six hearts in this hand, assuming that you and your partner had bid the optimistic slam? West leads the ace of spades and continues with a spade.

It is plain to see that you can make the contract if the adverse diamonds are divided 3 - 3. In that case you could dispose of one of dummy's clubs on the fourth round of diamonds. However, this is not too good a prospect to rely on, since the 3-3 break occurs in only 36 per cent of hands, and you therefore look around for some other means of supplementing your chances.

One outstanding possibility is that the player with the diamond length (assuming the suit is not divided 3-3) also has the king of clubs among his possessions. If that is the case, you can make the hand by simply cashing your tricks in the right order.

There being no better line of play available, you proceed on the basis that the diamonds are either divided 3-3 or the defender with the majority of them also has the king of clubs.

You ruff the spade continuation with the jack of hearts, cash three high hearts and the ace of clubs, and then enter dummy with a trump. After you cash the king of spades and discard a club, this becomes the position:

North
♥ 10
♦ A 8 7
♣ Q

West
♠ J 10 6 4
♣ K

East
Immaterial

South
♠ K Q 5 2
♣ —

Now you lead the ten of hearts and discard a club, hoping that the squeeze position you carefully set up will be effective. In the actual hand, it is. West cannot discard in any way that will prevent you from winning the rest of the tricks.

Yesterday's Answer

DAILY CRYPTOQUOTE — Here's how to work it:
A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation
