Work To Begin On Bridge At Montague This Week

Construction of the temporary bridge across the Montague River will commence on Wednesday, it was learned yesterday. The location according to surveyor markings, is to be from a point between the Johnson canning factory and the Fire Department wharf on the north side, crossing to the property formerly owned by the late Peter Johnston on the south side. This property will require considerable fill-in and it is understood that this work may possibly begin today.

The bridge, to be of pile construction, will have an eleven foot roadway, permitting one lane traffic, and it is understood that one or two traffic directors will be stationed to control and direct traffic. The construction company of Noye and Rayner, who have the contract, will also construct the temporary understructure for the present bridge before the removal of the steel superstructure, which is also a part of their contract.

It was indicated yesterday that the building of the temporary bridge would be a relatively short job, so that the main work of re-erecting the superstructure would be undertaken as soon as possible. It is possible that the bridge may remain open during all or the most of this preliminary work, with the result that during the closing of the present bridge and the opening of the new one, only a relatively short time may elapse.

A charge on the public under the terms on which land for the purpose was supplied. He admitted that the city was getting a lot for nothing but thought citizens in general should help rather than add the expense to city charges. The report of the nominating committee was presented by Mrs. Byron Stewart and the following officers were elected for the ensuing year: Honorary president, Dr. G. S. A. Inman; president, Mr. Ralph Beck; vice president, Rev. F. N. Young; secretary, Mrs. E. H. Stewart; treasurer, Mr. Archie Hillech.

Resolution Defeated Councillor MacDonald then offered a resolution, seconded by Councillor McCormack, that the city erect a proper fence around the pool the cost to be repaid by the Kiwanis Club as fund possible.

Blood Clinic Tonight At St. Peter's Bay

Under the sponsorship of the Junior Chamber of Commerce, headed by Mr. Kenneth Anderson, no effort has been spared to insure a record breaking attendance at the Red Cross Blood Donor Clinic to be held in St. Peter's Bay tonight.

The Canadian Legion's commendation of the Red Cross for this clinic and the Women's Institutes of St. Peter's Bay and surrounding districts are providing the workers while the refreshments are being supplied by the Forest Hill Women's Institute.

The objective for this two hour clinic has been set at 100, but the Committee in charge hopes this quota will be considerably exceeded.

North Lake First Aid Class

The members of the first aid class at North Lake received their Red Cross awards recently.

Mrs. Charles McCormack instructed this group in standard first aid during the past few months.

Miss Margaret MacMillan, public health nurse represented the Red Cross at the presentation of certificates, cards and pins. She commended the group for their fine work on this course and complimented Mrs. McCormack on the good examination results of the class.

The following members received awards: Mrs. C. R. Campbell, Miss Genevieve Campbell, Mrs. Daniel Conway, Mrs. J. E. Dingwell, Mrs. Russell Dingwell, Mrs. Stanley Dingwell, Harold Hunter, Charles McCormack, Mrs. James MacDonald, Mrs. Ernest Morrow, Mrs. Hudson Morrow, Miss Mabel Rose, Mrs. Francis Gillis.

Moved in slightly to permit angle parking. It was felt by all councillors that the muddy section there was no credit to the city, especially across from the principal hotel.

Councillor George Keefe said he wished to clear up a point on which he was misunderstood. He said he was not being in favor of two schools if high schools are to be built.

Motorcycle Accidents

The antics of lads on motorcycles as Councillor Storey expressed it, called forth condemnation from all the Council. It was believed that too great a danger existed, especially when the drivers did not wear crash helmets.

A belief that all large purchases by the city should only be made after tenders are called was expressed by Councillor MacDonald.

The Streets Committee report said a misunderstanding has occurred with some citizens believing the city is not desirous of laying any more heavy pavement.

This chairman said arose from a motion at the last meeting to spend a proposed \$10,000 to pave one block was lost.

This was why, he stated, it was felt better to spend the money in treating the surface of approximately 10 miles of streets than to put all the money into one block.

He believed that the citizens in general would appreciate this attitude.

Police Report

The report of Police Chief Charles MacArthur showed 78 arrests in May with 74 convictions and one dismissal. Of the arrests 69 were in connection with liquor offences. There were 260 traffic tickets issued for meter violations and 136 for other violations.

The Chief felt that the operation of the motorcycle by Cnst. Russel Downe was having a good effect in the restraint of improper driving in the city.

Just before the adjournment Councillor Cudmore read a formal vote of thanks to all who had cooperated with him in making the Coronation Day program a success. He paid tribute to Administrator Justice M. R. MacGuigan and Mayor J. D. Stewart for their addresses, to Brig. W. W. Reid and Group Capt. A. G. Kenyon, R.C.A.F., to the Press, Radio and Telephone Company and to all the organizations which participated.

He also gave special thanks to city employees for the excellent decorating job and to the Firemen for the great fireworks display.

NOW YOU CAN TREAT VAGINITIS IN CATTLE. After extensive experimentation, Nixon Laboratories have developed an effective treatment for Vaginitis in cattle. This new Nixon product is easy to use and quite inexpensive.

TO PLAY WOLSEY—Alexander Knox, 45-year-old Canadian actor from Stratroy, Ont., has been chosen to play Cardinal Wolsey by London's famed Old Vic theatre. Knox will play in a Coronation production of Shakespeare's "King Henry VIII" opening in London early in May. Knox has played on Broadway and in Hollywood. He was last at the Old Vic 15 years ago as understudy to Laurence Olivier and Emyln Williams. (CP Photo)

Grass Silage

Continued from page 1 possible for convenience when feeding. When a location with good drainage cannot be found near the barn a surface horizontal silo should be used.

As hay crops mature they decrease very rapidly in palatability and digestibility. However, due to weather conditions it is often very difficult to make good quality field-cured hay when the crops are at the best stage of maturity.

Rainy weather, which occurs so frequently early in the season, does not materially increase dry matter losses for silage but may result in heavy losses if the forage is made into hay.

Early Cut Forage

The palatability of the early cut forage is so favourable that the total daily dry matter is considerably higher for early harvested forage. In addition, digestibility for the early cut forage is extremely high and decreases rapidly as the forage matures.

This range can extend from 70 per cent for digestibility of the early cut forage down to 50 per cent or less for late-cut roughage. The excellent combination of high palatability and digestibility permits the cow to consume a larger amount of digestible dry matter from early cut forage.

The moisture content of the grass should be around 70 per cent for proper fermentation and for best packing in a trench silo. Little or no outside moisture from rain or dew should be in evidence. If the silage is too dry it will heat and turn brown or even black, and may mold as thorough packing is difficult.

Heated silage loses much of its feeding value, including all of the vitamin A. If the silage is too wet it will not heat or mold and will have a good appearance but it will develop a strong disagreeable odor and the cows will not eat it with relish.

Losses of dry matter from seepage will be considerable and the lower portion of the silo will likely be waterlogged and spoiled. In general, loss is greater when the silage is too dry than too wet.

Once filling has been started it is important that there be no long shutdowns as this will result in layers of poor quality silage.

Important Factor The art of making good silage lies mainly in keeping out air. To do this the silo must be tight, have smooth walls, and the silage well tramped. A tractor makes the best job of tramping. Special care should be taken along the sides and corners. The silo should be topped off with 1-2 feet of wet green material to help keep out air and to pack the lower layers.

The silage should be thoroughly tramped every day for 5 to 7 days after filling is completed. The silo should then be sealed with limestone, sawdust or clay. Two to three inches of limestone makes a good seal that is easily removed when feeding. A good layer of sawdust or clay is also satisfactory but more difficult to remove. If desired a temporary removable roof made of boards may also be used. The main thing is to keep the rain out and prevent freezing.

Four points to remember in the making of good quality silage are: 1. Select a location with good drainage. 2. Cut early for greatest yields of digestible dry matter. This is win timothy is just coming in head. 3. Put in at the proper moisture content — 70 per cent. Be careful not to overwet. It is better to have the forage too wet than too dry. 4. Pack thoroughly while filling and for 5 to 7 days after filling is completed.

Drop Work On Book of Praise

TORONTO, (CP)—The Presbyterian Church in Canada has withdrawn from a project with the United States Presbyterian Church to produce a Book of Praise for use in North American Presbyterian churches.

A special committee reported the withdrawal Monday at the annual meeting of the Canadian General Assembly of the Presbyterian Church, because U. S. church leaders would not agree to the Canadians' wishes to have a separate section for metrical psalms.

Rev. Colin T. Miller, convener of the church worship committee, said the Book of Praise was the book normally used by Canadians while it was "just one of many books" from which individual U. S. congregations chose.

Montague Home, School Ass'n Annual Meeting

The annual meeting of the Montague Home and School Association was held in the new school last evening and was largely attended. In the absence of the president, Mr. Archie Hillech presided. The minutes of the last meeting were read by Mrs. E. H. Stewart, and were approved as read.

Mrs. J. D. MacLeod reported that the approval of the meeting, with the picture would be sponsored by the association in June. Plans were discussed and it was also decided to sell home made candy at both shows.

A committee, Glen Wigginton, and Cecil Mosher, attended the meeting, representing the association in grade eleven, to discuss plans for the annual graduation dance. Mr. John Hughes and Mrs. E. H. Stewart were appointed to work with the student committee on this matter.

The committee reported that the dance would be held early in the month and that an orchestra had been engaged. Mr. Ralph Beck reported that his committee, appointed to look into the possibilities of having grade twelve in Montague, decided to leave the report of this matter over until the next meeting.

The report of the nominating committee was presented by Mrs. Byron Stewart and the following officers were elected for the ensuing year: Honorary president, Dr. G. S. A. Inman; president, Mr. Ralph Beck; vice president, Rev. F. N. Young; secretary, Mrs. E. H. Stewart; treasurer, Mr. Archie Hillech, re-elected.

Mrs. E. H. Stewart gave a very interesting resume of the activities of the association since it was instituted on May 9, 1950. Some of the projects undertaken by the association were purchasing a projector and screen to be used for showing films in the school; sponsoring Halloween parties for the school children; sponsoring four amateur contests; sponsoring the graduation dances and school picnics and also sponsoring the ice sports in 1951-1952.

Each year donations were solicited for the school prizes, and \$10.00 was donated by the association for general proficiency in grade eleven. This past year the association was instrumental in obtaining a music teacher in the school and a duplicator was purchased for use of the teachers. The association is assisting financially in sending a grade ten student to attend a leadership training course at Mount Allison University in July.

Mrs. Harry Jamieson and Mrs. Horace Fraser were appointed on a committee in charge of soliciting for school prizes this year. Plans were discussed for the annual school picnic. The committee in charge includes: Rev. H. Blois, Rev. F. N. Young, Mr. Harold Stewart, Mrs. J. M. Clair, Mr. Carl Boehner and Mr. Doug Coffin. Mrs. J. D. MacLeod, Mrs. E. H. Stewart, and Mr. Ralph Beck were appointed as delegates to attend the annual meeting of the Provincial Federation of Home and School Associations.

Official Canada

Continued from page 1 cial. "They are very serious. There was general agreement that Canada likely will lodge new and stronger protest with the U. S. government, but there was no expectation that it would achieve any betterment of the situation for exporters of Canada and overseas countries who depend on the American market for their livelihood.

One informant said the whole issue will be studied shortly by the federal cabinet. The cabinet, he said, likely will not consider economic "retaliation" against Americans, but might consider withdrawal of certain tariff concessions.

These would be concessions resulting from previous tariff negotiations under which the U. S. government agreed to reduce tariffs on diary and other agricultural products. The whole question likely will be reviewed by Prime Minister St. Laurent and Trade Minister Howe when they return from London in the latter part of this week.

sociations to be held in Charlottetown in July.
