CANADIAN BUSINESS

Trans Canada Pipe Lines Reveals Heavy Gas Sales

By KEN SMITH
Canadian Press Business Editor

Trans - Canada Pipe Lines Ltd., the company that grew from the ashes of a bitter political fight, has had its sales men out in full force recently.

During the last 10 days the company, started at the insistance of the late C. D. Howe dispite strenuous opposition, has announced new sales contracts that could total 3,391,000 million cubic feet of natural gas during the next 25 years.

Value of the contracts is an estimated $1,500,000,000.

The largest sale is of up to 1,700,000 million dubic feet to Consumers' Gas Co. Its value is estimated at $725,000,000.

"Consumers' annual sales volume has increased from 46 billion cubic feet to 94 billion cubic feet over the last 10 years and this additional 75 billion cubic feet annually will be of material assistance in preparing for the further rapid industrial expansion and residential growth in our sales areas," Oakah Jones, Consumers' president, says.

The other contracts are for 991,000 million cubic feet to Union Gas Co. in southwestern Ontario and 700,000 million cubic feet to the Saskatchewan Power Corp.

SALES CONDITIONAL

Both sales to Eastern Canadian customers now are conditional upon completion of a new pipeline through the United States by Great Lakes Transmission Co., a corporation owned jointly by Trans-Canada and the American Natural Gas Co.

Permission to build the $200,000,000 pipeline south of the Great Lakes from Emerson, Man., to Sarnia, Ont., had been expected from U.S. and Canadian regulatory bodies without too much difficulty.

It has been delayed for more than a year, however, and a possible further problem occurred last week when Northern Natural Gas Co. of Omaha, Neb., applied for permission to build a competitive line.

James W. Kerr, Trans-Canada president, called the move a complete surprise and said the company previously had given no indication of any such plans.

There has been no official indication of what effect any serious delay in getting permission for the Great Lakes pipeline might have on the eastern provinces, but one industry observer said the market is too important to permit the gas people to forget about it.

IMIT COPPER EXPORTS

Elsewhere on the business scene, Acting Finance Minister Sharp announced export controls of copper.

His statement said the action was taken "as a precautionary move to ensure supply for Canadian users and to assist in maintaining orderly marketing in a situation of growing world shortage."

Highlighting the crazy copper price situation was one manufacturer who had several million dollars worth of fabricated copper products in his inventory. Because of the booming European market for copper, he understands, he could ship it overseas and sell it as scrap at a 50-per-cent higher profit than he could get in Canada. Shipments of fabricated products are not prohibited.

Last year's banking profits started appearing and—not surprisingly — they showed steady improvement. Among those reporting recently, with 1963 net figures in brackets:

Bank of Nova Scotia $10,400,000 ($9,700,000); Bank of Montreal $18,700,000 ($17,80,); Toronto-Dominion Bank $9,90,-000 ($9,000,000); Banque Canadienne Nationale $3,800,000 ($4,-000,000).

The Banque Canadienne Nationale figure for the latest fiscal year is slightly lower since it encompasses only 11 months. It changed its fiscal year to end Oct. 31, matching other banks, to make it easier for statistical analysis of financial figures.

Automotive Secret Is Out, Chrysler Has New Fastback

WINDSOR, ONT. (CP) — A closely-kept automotive secret is out, inadvertently.

A sharp-eyed reporter saw two examples of a new Chrysler passenger car mixed in with many familiar standard 1966 models at a railway siding here.

The car, a new fastback model — the Dodge Charger— was to have been made public in more than a week's time. Existence of the car had been a closely kept secret.

Tye car, automotive writer Walter McCall reports, appears to be built upon the 117-inch wheelbase Dodge Coronet and follows the styling of a similarly - named "dream car" shown by Chrysler at auto shows more than one year ago

It features a full-width grill and a long, gently-sloping roofline dominated in the rear by a large flat window.

Both cars were seen to have bucket seats, one showed to have a 38 3 cubic-inch V-8 engine, the other had a smaller V-8, probably the 318 cubic-inch 230 horsepower version.

The car is seen to be intermediate in size between the compact Dodge Dart and the full-size Polara and Monaco series.

The cars were spotted on the top deck of a tri-level automobile carrier at a railway siding here. They were inconspicuously mixed with a shipment of current production models by Chrysler which had just crossed the Detroit River on a train ferry, possibly bound for U.S. points in the east by the more inconspicuous Canadian route.

Disarmament, Birth Control Draw Interest

WASHINGTON (AP)—A world police, disarmament and birth control were some of the proposals drawing top attention Monday at the opening of a White House conference on international co-operation.

Vice - President Hubert H. Humphrey told the 2,000 delegates the United States should give full support to the United Nations in setting up a permanent peacekeeping force "ready to respond and to act if there is a threat to the peace of the world."

Senator Joseph S. Clark called for the creation of an international institution "capable of enforcing world peace through world law." Clark said the UN Charter will require drastic revision before the United Nations is capable of achieving world peace.

Humphrey and Clark, a Pennsylvania Democrat, spoke at the opening of a three-day conference called by President Johnson to explore every conceivable approach to peace.

One panel proposed that the United States appropriate up to $100,000,000 to help other countries organize birth-control programs as a check on population expansion.

URGE MOONPARK

Another group, composed of scientists, space experts and educationists, urged Johnson to seek a world pact that, in effect, would make the moon an international park, open to all space travellers.

Noting the space race between the United States and Russia, this committee said that "with multiple manned landings on the moon in prospect within the next several years," a treaty should be negotiated to prevent the moon from being turned into a military base.

Such a treaty could be sought through the UN committee for peaceful uses of outer space, the committee said. It added that essential provisions would include "suspension of sovereignty claims, free access by all for scientific purposes, exclusion of military manoeuvres and weaponry and a verification procedure."

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X E
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation

A E X G D D Q X G D W A E R W I P H
A E H S W W B C P A T G B G X O E K
Q E Y D R G X O . — T G S P R Y D A E K

Opening lead—two of hearts.

There are all kinds of rules and slogans which players get into the habit of relying on, but the fact is that many of these generalizations are at least partly inapplicable and should be shunned in favor of common sense.

As an example, take this adage of "third hand high." It is true that in most hands, when a defender leads a low card, his partner, who then becomes the third player on that trick, generally plays his highest card. However, quite often he does not, and there are many good and sufficient reasons for not always playing high.

Some of these cases where it is improper to play third hand high are not well known and occasionally lead to disaster for the defense.

Here is one such case. South is in six diamonds and West leads a low heart. Let's say that East plays the king, which forces out the ace. Declarer then takes a trump finesse, losing to the king, and East must now find the right return to defeat the contract.

If East returns a heart, which is what most players would do in the expectancy and hope that partner has the queen, south makes the contract. After drawing trumps, South discards his spades on the clubs and scores a cool 1,570 points.

The error is not so much East's heart play at trick three, which is excusable, as much as his play at trick one. East should play the jack of hearts on the opening lead, not the king.

True, this would be a violation of "third hand high," but it would be the right play just the same. By playing the jack East would learn, once if lost to the queen, that South had started with the A♠Q.

East could then put this information to use by returning a spade at trick three instead of making an obviously futile heart return. His foresight at trick one would be rewarded at trick three.
