MESSRS. R. PALMER & Co. have completed their new workshop on Lower Water Street, and are now busy in filling orders. The workshop is a large and commodious one and is well fitted out with first-class machinery. Messrs. Palmer & Co. will consequently be able to supply the trade with mouldings, etc., as cheap, if not cheaper, than any other firm on the Island or in Canada. They guarantee that everything turned out in their factory will be of superior workmanship, and desire a share of the patronage of the public of which they are worthy.

THE Quebec Chronicle says that Mr. B. Laurance visited St. Bridget's Asylum on Monday last, and going through the wards examined the sight of nineteen old persons, and without giving any of them a pair of spectacles to try and from simple examination of their eyes the same evening he sent nineteen pairs of spectacles which gave each individual examined perfect satisfaction. The Superiors of St. Bridget's Asylum begs to offer her most sincere thanks to the kind donor, Mr. Theo. L. Chappelle is the agent here of Mr. Laurance's celebrated spectacles.

"HARRARD'S GAZETTE," of the 23rd March, 1853, contains the following reference to the ship "Marco Polo," lately wrecked off Cavendish—

"The screw steamer "Antelope," which celebrated as having made one of the quickest passages on record between Rio Janeiro and England, recently greatly improved by a builder at Birkenhead, has been matched for a race to Australia and back to England, doubling both Capes, with the renowned New Brunswick built ship "Marco Polo." The latter ship has now world wide reputation for her late extraordinary passage out to and from Australia to England."

THE CAMP AT MILTON.—Sergeant J. Allan arrived in the city on Saturday night, and reports great improvement in discipline, drill, etc., in the camp at Milton. The officers are doing everything in their power to bring the volunteers up in line with regular soldiers, and their efforts in this respect have been heartily reciprocated by the latter, who seem equally anxious to improve themselves. The men have now passed through position drill and are now marching in battalion. The Sergeant, who is an old soldier, describes them as able-bodied intelligent men, and a credit to their Island home. They take great pains to present a clean and tidy appearance, and are exceedingly orderly. The Sergeant says that since he joined the camp, he has witnessed no sign of drunkenness amongst any of the men. To the officers in charge Sergeant Allan attributes great praise. No better class of officers could be found anywhere. The men, he says, take a pride in them, a pride which is well deserved. Staff-Sergt. Campbell, an experienced non-commissioned officer of the regular service, formerly of the 17th regiment of infantry, has done all in his power to bring the men to a high state of discipline, and his efforts have been in a manner rewarded. Efforts are being made to have a display on Thursday evening next, bonfires will be lighted and speeches made by several of the leading military gentlemen present. The Engineers are hard at work, and under the supervision of Lieut. Macdonald, who, the Sergeant says, is a good practical officer, are doing exceedingly well. They have constructed a fire place for cooking purposes which cannot be excelled. Field works have also been thrown up and other engineering work done. The Sergeant returned to camp this afternoon.

As the train on the Intercolonial Railway was near St. Anne's, Quebec, a few days ago, a passenger in the smoking car jumped off the train while it was running at the rate of 25 miles an hour. The train was stopped and the unfortunate man, whose name, so far, has not been learned, was picked up with a fearful gash on his temple and other facial injuries. He was removed to the depot, and at last accounts was in a poor way for recovery. The reason given for his jumping from the cars is that he thought to reach home by a short cut.—Moncton Times.

MR. J. B. HAMLIN, who has had experience of thirty years as a lobster packer, writes a letter to the Fictou News in which he alleges that the present law is doing more to destroy the lobster than would be done by all the factories combined, were there no law to regulate the season for catching. He says: "It is my opinion that one factory will destroy more fish in one month than the fish are spawning, than ten could possibly do in the other three months. Add to this the fact that during this month the fish are so poor that a penny is made by the packer." Mr. Hamlin thinks packers are being driven out of the business.
