

WEATHER

A few showers, changing in afternoon to snowflurries; southwest winds 20, shifting to northwest. Low-high 15 and 35.

"Covers Prince Edward Island Like The Dew"

Icebreaker  
Is Stuck  
In Strait

PICTOU, N.S. (CP) — The federal icebreaker Tupper was reported stuck in ice in the Northumberland Strait today awaiting rescue by her larger sister, the icebreaker D'Iberville.

The Tupper was en route here to break up ice in Pictou harbor.

Sunday ice information officer Capt. Ed Kelso reported the Tupper was stuck in heavy ice between Pictou Island and Wood Islands, P.E.I.

Rescued Pilot  
Has One Wish,  
To Go Home

SUMMERSIDE — Pilot of a small aircraft, who landed here yesterday after a night on drift ice in the Gulf of St. Lawrence, just only one comment: "I just want to get back to Quebec City."

He was Jacques Vachon, 27, whose Cessna-180 was reported sinking slowly through the ice about 30 miles west of the Magdalen Islands.

An RCMP spokesman said Vachon became lost in a snowstorm Monday and managed to land on an ice floe. He immediately sent out an SOS.

He was commended by the RCMP for the manner in which he handled the emergency.

Meagre arrangements were being made to salvage the aircraft today if it was still afloat.

Early reports said the pilot entered hospital here after being landed by a helicopter from Grand Coulee.

However, there was no trace of him here and it was believed he was on his way home.

His condition after a night on the ice was described as good.

The aircraft was owned by Air Gasep Limited and was believed to have been taking part in the seal hunt.

A Dakota aircraft from RCMP Station Summerside was dispatched to search for the missing craft about 6:30 Monday evening but was unsuccessful.

The pilot and his aircraft were found by a search party after a search which dropped supplies and kept watch until relieved by an Arctic.

Gen. MacArthur  
Seriously Ill

WASHINGTON (AP) — Gen. Douglas MacArthur is seriously ill a day after his second major operation in less than a month, but his progress was favorable enough so he could speak to the city Tuesday.

Sugar Prices  
Are Increased

MONTREAL (CP) — Three major Montreal sugar refiners Tuesday announced a 20-cent decrease in the wholesale price of sugar to \$12.50 for a 100-pound bag.

The last price change by the three refiners — Canada and Dominion, St. Lawrence and Atlantic — was a 20-cent decrease March 16.

The price change will affect the price of sugar in the province.

The price change will affect the price of sugar in the province.

The price change will affect the price of sugar in the province.

Protesters  
Confidence  
Questions Listed  
For Spud Meeting

Potato growers from across the province will be asked Monday afternoon if they want more control and direction of the federation "to give its interested potato producers the opportunity of taking part in planning the future of their industry," a federation spokesman explained.

Good attendance will be an indication of interest in the industry's future, he added; it is likely that the meeting will be largely attended if the weather man can produce reasonably clear skies and safe driving conditions on the afternoon of March 30, something that has been lacking in the province for a large part of the last week or 10 days. The time is two o'clock.

The potato board activities regarding the topic of discussion and board members are invited to attend.

Hal Banks' Trial Has Slow Start

MONTREAL (CP) — Hal C. Banks' trial on a charge of conspiring to assault a rival union organizer seven years ago got off to a slow start Tuesday in a matter of defence requests and objections.

Judge Claude Wagner turned down a defence request that he be given the names of witnesses the Crown plans to call who had not appeared at Banks' preliminary hearing on the charge in December.

Another defence request for statements made by these witnesses to the RCMP or the Crown was also rejected.

The sitting broke off when Judge Wagner agreed that John Aherne, chief defence counsel, should be present at the appearance of key witnesses. Mr. Aherne was tied up in another court.

Small Sealing Plane Safe; Good Weather Aids Hunters

A plane which was thought to be missing was found only 12 miles from its intended landing place when the seal hunting halted for the day at St. Peter's last evening.

A light, one-engine plane that had been more than an hour overdue was reported safe and sound by its pilot who had ditched a ride about 12 miles into St. Peter's.

The plane was forced down due to lack of visibility and landed safely in a field.

There are nearly 100 men and 14 planes plus two small helicopters involved in sealing operations on the St. Peter's area.

An unconfirmed estimate of the number of seals landed yesterday in that area was placed in the vicinity of 1,500.

The good flying weather made for steady, contiguous trips to and from the herd located on the ice some 35 miles almost due north of St. Peter's mid-way between Prince Edward Island and the Magdalen Islands.

The size of the herd is unknown and the sealers are not giving any information in this regard.

There was some difficulty encountered by the planes landing on the ice, the otherwise perfect weather raised the temperature enough to cause slush on the ice making landing difficult.

Windsor Was  
Warmest Spot

TORONTO (CP) — Windsor, Ont., was the warmest place in Canada Tuesday with a high of 67 degrees, the weather bureau here reported.

The reading was the highest in Canada this year and set a March 25 record for the city. The previous record of 65 degrees was set in Windsor in 1959 and equaled last year.

Blistering Debate  
Fails To Gain Backing

OTTAWA (CP) — The minor Liberal government's supplanting of the Progressive Conservative party, easily turned back a Progressive Conservative motion of confidence Monday Tuesday night, winning the vote 159 to 80.

The House was in a jovial mood as MPs rose to record their votes in the second confidence vote of the six-day budget debate.

A blistering attack on government policies, from Opposition Leader Diefenbaker just before the vote, failed to rouse support for his non-confidence motion from the other Opposition parties.

Eighty Conservatives stood alone in support of the motion criticizing Finance Minister Gordon's budget policies. Against them were 111 Liberals, 17 New Democrats, 11 Creditors and nine Social Credit MPs.

The government had been expected to survive the budget debate shortly before the House was to vote on a Conservative non-confidence motion charging the government with failure to control rising expenditures and with budgeting for a "substantial" deficit despite higher tax rates.

The finance minister urged all interests involved in negotiations on Labrador's proposed plan to build a hydro power development to work out their differences "and get ahead with this vitally important project."

He said an early start on the \$500,000,000 project would be the best thing that could happen to provide employment for people in eastern Quebec and the Atlantic provinces where Canada's "fraternal" employment problem was centred.

He said an early start on the \$500,000,000 project would be the best thing that could happen to provide employment for people in eastern Quebec and the Atlantic provinces where Canada's "fraternal" employment problem was centred.

He said an early start on the \$500,000,000 project would be the best thing that could happen to provide employment for people in eastern Quebec and the Atlantic provinces where Canada's "fraternal" employment problem was centred.

Arts In Scientific Age  
Require Fresh Approach

Science knows. Art does. The distinction by Fowler in his Modern English Usage was noted by Mavor Moore in his lecture on "The Arts in a Scientific Age" delivered at Prince of Wales College last night.

The occasion was the annual Samuel Robertson Memorial Lecture.

In elaborating on the distinction, Mr. Moore stated that "science is, in fact, an ever-changing, ever-improving collection of data; the new builds on the old, in the way a small child builds its acrobatic skill of matter, developing and growing—a body of known facts, art, on the other hand, is in continual flux, like the creature inside the shell. It must keep on renewing itself, changing, fading to get out of the shell, always dynamic and experimenting—or it will become simply another datum."

Mr. Moore was his administrator of the Fathers of Confederation Memorial Building, Quebec City.

The thought-provoking treatise, delivered by the lecturer, was not without its dashes of humour, as he received with obvious enjoyment and appreciation.

SUGGESTS PROJECT

"It has occurred to me," said Mr. Moore in opening his address "that a fine project for this Centennial Year in Canada would be to rewrite our history books and give credit where credit is due. We call the early pioneers, those matchless European carpet-baggers, dis-

covered. Whereas in the meeting of Europeans and North Americans it must surely be the Indians who did the important discovering."

"What the Indians were to discover from the newcomers was that it was improper to talk while music is being played, to sing while dancing, or to dance while worshipping the Almighty, and that having no-

covered. Whereas in the meeting of Europeans and North Americans it must surely be the Indians who did the important discovering."

The minority Liberal government survived a Conservative motion in the budget debate 150 to 80.

Mr. Gordon announced the \$500 federal bonus for winter-bait homes will be repeated next winter.

Prime Minister Pearson said the government will not surrender to various minority threats against his motion to visit Quebec.

State Secretary Lamontagne said the CBC will televise its controversial Easter play "The Open Gate" scheduled for 15 for marriage.

Senator Marie Ferguson (N.S.) was criticised for calling for a basic minimum age of 18 for marriage.

WEDNESDAY, March 25

The Commons sits at 2:30 p.m. to discuss supplementary estimates. The Senate meets at 3 p.m.

Mr. Wain said that with all the security in the United States, a fanatic killed President Kennedy. He asked what special attention had been given to whether the Queen should be asked to come and to what protection could be given her.

SAYS ACT VICTIMS

Mr. Pearson said he had seen the press report, but termed the action "very serious" representing "a very small minority of the people of Quebec."

"I am aware that a minority of one can do a lot of damage. However, when the Quebec Consensus Canada's motto is 'One can do a lot of damage.'"
