

THE DAILY EXAMINER. JULY 31, 1893.

NOTES AND COMMENTS.

—We regret to learn as we go to press that Senator Montgomery passed away at ten o'clock this forenoon.

—The Toronto Globe is pointing out some of the advantages of direct taxation. Significant!

—The United States newspaper have begun to compliment Canada on its prosperity. When will the grift organs begin?

—The Globe: "No one pretends that the French claim in Siam is just. But the denouement never did have much effect in dealing with half-civilized people, especially when they were lacking in military strength."

—The Empire: "If the United States should enforce the Greely Act and increase Chinese hostility, it is a boon to Canada's good. The C. P. R. steamship line to China would get the bulk of a largely increased trade, which even now is growing steadily in tonnage, silk, etc. Chinese exports to the States would go via Canada."

—Montreal Star: "There is some not unusual apprehension in Canada lest the wave of financial disaster in the United States should reach Canada. There is really no reason why Canada should necessarily suffer. The causes which have led to the trouble in the United States do not exist here, and whatever little difficulties we have had have been confined to speculators in stocks. The principal thing to be feared here, as elsewhere, is panic. If our business men follow a conservative policy and attempt to do a safe business rather than a big business, their prospects are not bad this year."

—The Albany Journal says it is not sorry for Canada in the increase of business failures it is presumed to suffer from due to the result of the financial crisis in the United States, because "she wanted to have Mr. Cleveland elected, thinking only of her selfish interests and forgetting the fact that she too must suffer for any serious disarrangement of business in the United States side of the border."

—The proposition that the United States should establish all paper "money" of less than five dollars denomination is meeting with considerable favor. The Montreal Star remarks that this would create a considerable demand for silver for purposes as perfectly legitimate as the manufacture of watch cases or spoons. That this would satisfy the silver kings of the west is hardly probable because they have been encouraged to believe that the United States Government could work miracles in their behalf and could turn sixty cents into a dollar by simply calling it a dollar. There is really no more reason why the Government should undertake to create a demand for silver than for any other commodity. The amount of coin of any description in use is commonly much overestimated, because people hastily assume that the mass of metal which is an exchange of commodities for cash, whereas the actual transfer of coin forms but a very small proportion of the world's trade.

A RECORD OF DISASTER.

Over 300 Bank Failures in Less Than Six Months

MONEY SPENDING, Ky., July 28.—The New Farmers Bank has closed yesterday; deposits amount to \$300,000. The depositors will be paid in full.

BALTIMORE, Md., July 28.—The Manufacturers Record publishes a summary of bank failures in the United States from May 1 to July 22, inclusive, which shows 301 banking institutions with a capital of \$38,941,033 suspended. Five-sixths of these failures and two-thirds of the capital involved were in the Western and Pacific States.

The M. A. Thayer Bank and Bank of Sparta, at Sparta, Wis., suspended yesterday. Liquidation of the Thayer Bank, \$175,000; liabilities of the other, \$210,000. The Ellensburg National Bank at Ellensburg, Wis., suspended yesterday.

MARINEVILLE, Ind., July 28.—The O. M. Mitchell Bank, established 30 years ago, and backed by \$500,000, went into voluntary liquidation yesterday.

NEW YORK, July 28.—S. H. Morrison, lumber merchant at Camden, N. J., assigned yesterday; liabilities said to be \$100,000.

A HEAVY DEATH.

PITTSBURG, Pa., July 28.—At 2 o'clock Wednesday morning the first apartment distinguished a slight fire in the house of John Smouse, on Oak Alley, South Side. Firemen discovered in the house the dead bodies of Mrs. Smouse and her two little children aged 4 and 2. Mrs. Smouse's head was terribly gashed and the children had the appearance of having been smothered. Smouse, the husband, was placed under arrest. He declared he had no knowledge of how the tragedy and fire occurred. But his five year old child who had escaped the massacre told police that his father had killed his mother with a hatchet. The neighbors think that jealousy was the cause of the murder.

NEWS NOTES.

The first shipment of hay from Montreal to Hamilton was made on Wednesday last.

The Deering Company of Chicago has shipped 25 carsloads of harvesting machinery to Australia by the C. P. R. and the Austro-Canadian Steamship Line.

A New York Herald special from San Jose, Guatemala, says direct communication over the Central and South American telegraph wires was opened last week between Guatemala and the United States.

Mr. Gladstone has received a new title and a new name. At a recent examination in a Glasgow school the inspector asked who was the patron saint of Ireland and received the unexpected answer "Mr. Gladstone."

Everything looks well for the new Canadian-Australian steamship line. Mr. Huddart, the promoter, seems confident of success, and expects naturally to gain a large amount of American as well as Canadian traffic. The more the better.

It is interesting and even startling at the present time to hear that, in the maneuvers of the Channel squadron under Rear Admiral Seymour, there have been fourteen collisions in five days. These have resulted in considerable injury to hulls and machinery, and it is a healthy sign of the times that the tax-payers are growing a good British growl in consequence.

The Marquis de Barboles, brother of the Duke of Veragua, has put in a claim to part of the fund some title-worshipping United Statesers have proposed to raise for the distinguished descendant of Columbus, to recompense him for his speculative losses. The Marquis says he is poorer than the Duke, and as poverty is the best title to alms, there is logic in his claim for relief. There are many people who have no gratitude blood in their veins, however, who think, though, that a marquis would look better working than begging, and the chances are that the purse to be raised will not be worth the brothers quarrelling about.

DESTROYED BY FOREST FIRES.—Late despatches from Mefford, Prentice County and Field, in Wisconsin, say those towns have been wiped out by forest fires.

Bargains in Men's and Boys' Clothing: Cotton (English) very cheap at J. B. Macdonald & Co's. 41-43-29

THE POLITICAL PICNIC At Tracadie Beach.

The Resources of Acadia Hotel Fully Tested.

With Satisfactory Results.

A Large Gathering of People.

Summary Report of the Ministers' Addresses.

HAYMAKING and the mackerel fishing alike tend to lessen the attendance at the political picnic held at Tracadie on Saturday last. Under all the circumstances, the gathering was surprisingly large, and included many substantial farmers and intelligent young men. A list of the ladies and gentlemen from Charlottetown will be found in another column. The improved appearance of Hotel Acadia was the subject of remark. The Ministers and their friends were highly pleased with the management of the Hotel, and gratified by the attentions which they received. After dinner, a platform was erected in front of the Hotel. David Douglas, Esq., of St. John's, was called to the chair, and the Minister of Agriculture came forward.

HON. MR. ANGERS began his address by referring to the fertile fields and beautiful homesteads that he had noticed as he had passed along, and by declaring his opinion that no people in the world are more comfortable than the people of Canada. Compared with the farmers of Canada, the farmers of the United States are not, man for man, so well off. Nothing very desirable is to be gained by our young men and women from going to the United States to seek the servants of others. It is far better to stay at home and be happy and independent, and grow up with the country. Being born British, they would surely like to be British, and possess throughout life their own laws and institutions. The changed conditions of the market make necessary, from time to time to adopt changed methods of farming. Formerly the growth of potatoes and oats and the rearing of horses brought in the most profitable returns to the farmer. But the force of events—the opening up of the great prairies and the construction of railways and steamships—has made it necessary to resort to other means of making a living and gaining wealth. The present Government has been most anxious to reciprocate trade with the United States on terms honorable and mutually profitable to both countries. The Government of Canada have repeatedly offered the Government of the United States the best terms of reciprocity that could be accorded to a country desiring to maintain its independence in local affairs. But the answer to these overtures was the McKinley Tariff. The American people came to the conclusion that the farmers of the United States could not compete with the United States market for potatoes, eggs and horses, etc., and the McKinley Tariff was passed. It would be unjust to blame the Government of Canada because the Americans resort to reciprocal trade and enact the McKinley Tariff. The McKinley Tariff has injured not Canada alone, but Germany, France and England. These nations protested against the hostile trade policy of the United States. More than that, they withdrew their commercial friendship and the critical position of the United States today is in great part due to the enactment of the McKinley Tariff. Great quantities of gold have been drawn out of the States, and the foreign trade of the States has fallen off by millions upon millions. The Grits of Canada rejoiced at the passage of the McKinley Tariff, hoping that it would "burst the Government." Certain of their party—he would be sorry to call them Canadian—had advised the leading men of the States that Canada would, in this way, be forced to the wall. But the Government of Canada looked around to find a remedy for the evils imposed upon the country by the McKinley Tariff—and they found it. They encouraged the people to manufacture cheese for the British market, and to produce articles suitable for the British and European market. What is the consequence? The consequence is that in one year we lost \$2,000,000 in trade with the United States, and we gained seventeen millions in trade with Great Britain and Europe. So we have \$15,000,000 to the good. Moreover, that the agriculture of Canada has been advanced to a higher plane. The land which produced so much grain and horses for export to the States, will produce four times as much in the shape of fodies for the modest cow.

INCREASE OF BANKRUPTCIES.

Recent statistics show an increase of bankruptcies among English and Welsh farmers since the opening of the year of 40 per cent. The English market is the best in the world for agricultural produce and the English farmer carries on his business on the most advanced principles. Yet the result is not a happy one. The plan of campaign on which the Liberals hope to carry the next election is to subject Canadian industries to the unrestricted competition that in Great Britain produces such effects on members of the oldest and best established of occupations.

A TURKISH OUTRAGE.

New York, July 27.—Letters which were received here recently from the Presbyterian Board of Foreign Missions in this city contain news of an unprovoked attack upon Miss Emma Melton, stationed at the time of the outrage in a little village among the Nestorian mountains in Turkey. She escaped with her life, but was mercilessly beaten and bruised by her assailants. An enquiry was instituted by the authorities, but they were unable to find the perpetrators. The matter has been called to the attention of the State Department of Washington and a rigid investigation is likely to ensue. Miss Anna Melton has been a missionary for the Presbyterian Church for many years.

USE SKODA'S DISCOVERY, the great Blood and Nerve Recovery.

Unlike the Dutch Process No Alkalies or Other Chemicals are used in the preparation of W. BAKER & CO'S Breakfast Cocoa which is absolutely pure and soluble. It has more than three times the strength of Cocoa mixed with starch, Arrowroot or Sugar. It is more economical, costing less than one cent a cup. Delicious, nourishing, and easily digested. Sold by Grocers everywhere. W. BAKER & CO, Dorchester, Mass.

Hon. Mr. Foster was received with cheers. He said that the prosperity of the people of Canada is apparent to anyone who travels through the country as well as in the statistics. He was here with his colleague to make enquiries and preparations for a modification of the tariff con-

sistent with the changed condition of the country. The people are thinking about these things. They are discussing the matter. The Government invites discussion. All are asked to look into the matter—but not to look into it from only one side of the case. There is a class of politicians who seek to make the people believe that they are unhappy, that they are unprosperous. Their motive is similar to that of the patent medicine vendor who tries to make those who crowd around his wagon believe that they are sick. The vendor desires to sell his medicine, and the politicians desire to get into the public offices from which they are excluded. The Government has no mind to remain in power after it has been shown that they are of no use or benefit to the country. But they propose to exert their best ability on behalf of the country, and not to give up the reins of power until their failure to benefit the country has been demonstrated. The Finance Minister then reviewed the official statistics and returns, and asked if it was not a pretty sign that the policy and administration of the Government was in power the party in power was shown that its trade had advanced and its prosperity had advanced, while the trade and prosperity of the United States Great Britain, France, Germany and Australia had retrograded? Two years ago, he pointed out, three and a half millions of taxation had been struck off. This was a fact in striking contrast with an expenditure of taxation on the part of Sir Richard Cartwright, when he was Minister of Finance. The value of taxation under the McKenzie administration was 17 1/2 per cent, and the rate of taxation last year was 17 1/3 per cent. In the past four years the public debt of Canada was increased by only one and a half millions of dollars, or \$400,000 a year. When the McKenzie administration was in power the public debt mounted up at the rate of eight millions of dollars a year. In 1879 the interest on the public debt was \$1.59 per head of the population of Canada; last year it was \$1.25. The same statement was made of the population of the measure of the increased burden of taxation placed upon the shoulders of the people as a result of the construction of all the great public works, undertaken and completed. Liberal-Conservative party attained to power. The great Northwest has been opened and a country which in 1879 produced scarcely anything, produced last year 70,000,000 bushels of wheat. This is a citizen. Officer Watchorn is on that beat. Watchorn has been a soldier and the first duty of a soldier is to obey his instructions. As a policeman he has been sworn to do his duty. These duties are laid down in a book of instructions. These instructions specify that no persons are to be allowed to loaf on the street. Watchorn believes that he is sworn to literally carry out his instructions. Last night he went up to Kline and his companion ordered them to move on. "What do you say?" asked Policeman Kline. "Move on," responded Watchorn, and added in a jocular tone, "go home to your wife."

THE QUEEN HOTEL, Halifax, Nova Scotia.

The Lessee takes great pleasure in announcing that the rates are: Upper Floors, two in room, \$1.50 per day. Single Rooms, \$1.75, \$2.00 and \$2.50 per day, according to location.

This great reduction in rates will not in any way impair the present efficiency of the Hotel either as regards the service or cuisine. A single trial will convince anyone of the fact.
