

SUMMERSIDE BOARD OF TRADE PRESENTS INTERIM ARGUMENTS AGAINST C. N. R. APPLICATION

The following is the text of a brief presented by Mr. John Mungo, president of the Summerside Board of Trade, to the Legislative Committee on Transportation...

It would be helpful to our Board in preparing a reply to their application if they would be consistent in their arguments. In Paragraph 9 they state that the present bus service operates on a year round basis...

While keeping the foregoing in mind we have examined the application of the Canadian National Railways and have viewed it in the light of public service and economy. In view of the figures submitted by them, economy would appear to be desirable...

LOCAL PASSENGER SERVICE The application has to do with local passenger service and it must be admitted that during most of the year this service is not heavily patronized...

More than the passenger service will suffer. The freight service (apart from L.C.1.) will probably be much slower. As this is an economy measure, it is not to be dispatched until there is a full train load of freight cars...
