

# The Danger of PILES

Too frequently overlooked, Dr. Chase's Ointment a Prompt and Positive Cure.

The suffering caused by the intense itching and burning sensations of piles is only one of the horrors of this disease, for there is always great danger of piles developing into fistula, one of the most disgusting diseases imaginable. Even the great danger and expense of an operation are preferable to running the risk of contracting this most loathsome of diseases.

But there is no necessity for a surgical operation for piles. Dr. Chase's Ointment is guaranteed to cure any case of piles, no matter how long standing, or how aggravated the case may be, so long as piles have not become fistula.

It is only by rare chance that internal treatment will cure piles. But it matters not from what cause they arise, Dr. Chase's Ointment will at once stop the itching and burning, and soon effect a perfect cure.

You can use Dr. Chase's Ointment with fullest assurance that what has cured scores of thousands of cases of piles will cure you. For sale by all dealers, or Edmanson, Bates & Co., Toronto.

# Facts are Stubborn Things

Sometimes they are also agreeable, as the following quotations from a few of our customers show:

The Royal Oak Soap just to hand, it is the pink of perfection.

Am delighted with our soap.

"Second to none"

I am thoroughly satisfied with the soap received at your factory this day, and beg to thank you for your prompt attention.

And so we might go on AD INFINITUM.

## Of Special Interest to our Farmers

Swine Breeding.

In the first place let us notice the outlook for this branch of farm production. The cry has been with regard to farm production that there has been either overproduction or under consumption in many lines, including the pig industry. The great hog producing states as well as corn growing states such as Iowa, Illinois, Wisconsin and Minnesota, have all been visited by hog cholera, which has perhaps more than decimated the number of hogs in those states. Many large herds have been completely wiped out. Great Britain imported in the year 1895, \$114,109,534 worth of dressed meats. Of that amount Canada furnished \$4,608,904 worth. Canadian bacon is in higher favor than ever before on the English market. There seems to be no reason why Canada should not have a larger share in the English market than she has now. Again, England imported in the same year \$14,317,446 worth of lard, and Canada sent of that amount only \$103,833 worth.

I believe there is room still for improvement in our swine herds as well as expansion. In selecting a sow as a breeder I would select one with at least twelve teats. I would want her to have a good heart girth, which means no hollow back or rain-bow belly. One of the most frequent mistakes by farmers is that they breed many of their sows too young. For well matured, growthy pigs I do not want the sow to breed under one year of age and I should certainly not have her farrow and her first litter under one year. With too many of us, however, this is more the exception than the rule. I would not breed from deaf sows, as they are apt to overlay their pigs, and many fine litters are decimated if not obliterated because of this infirmity. To tell whether a sow is deaf or not watch her when you call the other pigs to eat. If she does not come when you call but is simply aroused by others getting up and rests on her haunches a while until she sees the others eating and then starts up you may depend she has defective hearing.

A record of sows coming in heat should be kept. A sow comes in heat every three weeks or twenty one days. With a memorandum book one can tell when their sows will be in heat a second time if it is not wished to breed them when in heat the first time. There is a great advantage in having a memorandum book, as one can regulate the time for his sows to farrow. If a number of brood sows are kept, several can be had to farrow at the same time. A sow carries her young 112 days, but young sows often farrow in 108 or 110 days. Birth most frequently occurs at night, when everything is quiet, and by having a number of sows to farrow together, it is only necessary to play the midwife a few nights. Then if one has a lot of pigs the same size and age, they will please a buyer better and he will give the top price for them.

The selection of the boar is very important. He should be a pure bred, and as far as possible selected with a view to correct any defects which the sow may have. I want him to be a strong, vigorous boar, and a matured one is better than an immature one. One good service of the boar is sufficient, and far better than more services at the same time. Some men want a lot of pigs and think that several services are necessary to produce plenty of pigs. They don't know that deformed pigs, dead pigs, and difficult birth are more frequently caused by excessive service than by anything else. In the management of the boar, I want him to have a roomy yard to run in, also a shelter large enough for sleeping and eating in. The shelter should be high enough to admit a man easily, otherwise the hog might suffer from lack of cleanliness which is not conducive to the best results. The boar should have plenty of green food given

to him throughout the summer. Many weeds while green may be put to profitable use in this way. In winter, roots and clover leaves will take the place of green-growing plants.

In the management of brood sows I want them to have plenty of liberty for exercise and variety of food. The food I like to have largely made up of bone, blood and muscle forming foods. In winter, a mangel or turnip a day for each sow helps to keep them healthy. Steamed clover siftings with a little grain and a condiment of charcoal and salt helps to keep the sow in a good healthy condition. A week or so before farrowing I get the sows used to eating in the farrowing pen, but don't shut them up until two or three days before farrowing. Be careful not to feed too heavily, as milk fever is frequently caused by injudicious feeding just before or after farrowing and often a loss of the sow and her litter follows. After the sow has farrowed it is advisable, especially in winter, to give her a little lukewarm water to drink, with a little bran or shorts mixed in it. I feed water lightly for two or three days until danger from milk fever is over. Then I gradually increase the feed until she takes all she will, eating it up clean. I feed sloppy food at the first, such as will run from a pail, and a mixture of such foods as will build up bone and muscle. The pigs are allowed to run with the sow six or eight weeks for feeding purposes and three months if intended for breeding purposes. Then when the pigs are weaned, push them for all that is in them to the weight required by the market and in my opinion that is the best way to make money out of them. — T. G. Raynor, Rosehall, Ont., in the Farmers Institute Report of Ontario.

## Election of a Commissioner of Sewers & Water Supply

In pursuance of an Act of the General Assembly of this Island, made and passed in the 61st year of the reign of Her present Majesty Queen Victoria, intitled: "The Charlottetown Sewerage Act," and the Act of 62nd Vic Cap. 1 entitled "An Act to amend the Charlottetown Sewerage Act."

I do hereby give Public Notice that an Election for a Commissioner of Sewers and Water Supply for the City of Charlottetown, in the place of Hon David Laird, resigned, will be held on

Thursday, the 18th day of May, A. D. 1899,

at the several places, that is to say:

In Ward No. 1, at or near the office of Mr. John MacEachern, Queen Street.  
In Ward No. 2, at or near the house of Thomas Connolly, opposite Mr. R. Heartz's Warehouse, Sidney St, between Great George and Prince Streets.

In Ward No. 3, at or near the Market House.  
In Ward No. 4, at or near the City Hall corner of Kent and Queen Streets.

In Ward No. 5, at or near the carriage shop of Phillip Large & Son, Great George Street.  
And at the said Election the Poll will be opened at nine o'clock in the forenoon, and continue open until five o'clock in the afternoon of the same day.

DESCRIPTION OF WARDS.  
Number One shall comprise all that part of Charlottetown which lies south of Dorchester Street, and the parcel of land formerly known as the Military Barrack Ground.  
Number Two shall comprise all that part of Charlottetown which lies south of Richmond Street and north of Dorchester Street.  
Number Three shall comprise all that part of Charlottetown which lies south of Grafton Street and north of Richmond Street.  
Number Four shall comprise all that part of Charlottetown which lies south of Fitzroy Street and north of Grafton Street.  
Number Five shall comprise all that part of Charlottetown which lies north of Fitzroy Street, including the Common of the said Town.

NOMINATION DAY.  
THURSDAY, May 11th, A. D. 1899, from the time of Twelve at noon until the hour of Four o'clock in the afternoon of the same day.  
For qualification of Electors, see Act 61, Victoria, intitled "Charlottetown Sewerage Act," also 51 Victoria, Cap. 12.  
JAMES WARBURTON,  
Mayor of the City of Charlottetown.  
H. M. DAVISON,  
City Clerk  
City Clerk's Office, Charlottetown,  
May 1st, 1899.

## A Combination of Evils Bring on That Spring Trouble Known as "Tired Feelings."

Paine's Celery Compound Does a Wondrous Work for Every Run Down Man and Woman.

"Tired feelings!" These two words cover a multitude of dangers and perils, and should, when fully comprehended, be taken as serious warnings.

"Tired feelings" result from a vitiated and deranged condition of the blood and nerves, which causes a general weakness of the entire system. Constipation is usually one of the dominant troubles; digestive vigor is lacking, appetite is poor and sleep is never refreshing.

To banish "Tired feelings" the blood must be cleansed and purified, and the nerves toned and braced.

This foundation work is easily and quickly accomplished by using Paine's Celery Compound, the world's famous spring medicine. This noted remedy, purely vegetable, pleasant to the taste, is in every case just what is claimed for it. It is the one spring medicine that our best physicians vouch for; it is the great health restorer and strength giver that the best people of Canada talk about in the home and on the street.

A few bottles of Paine's Celery Compound used during the month of May, will banish all the troubles that regularly contribute to "Tired feelings" and ill health. If you are nervous, sleepless, have indigestion, dyspepsia, neuralgia, heart trouble, kidney or liver affections, your doctor or druggist will, if asked, promptly advise the using of Paine's Celery Compound.

TO CURE TOOTHACHE IN A MINUTE Use NERVOL. One application cures; if not, your money back. Equally good for Neuralgia and Headache. 25c. at all Druggists.

A. A. BARTLETT, Lieut. }  
C. C. RICHARDS, Lieut. }

# BEFORE you BEGIN

to paint anything, a hitching post or a house, a barn door or a parlor floor, see that you have the right paint for that particular purpose. No paint has ever been made equally good for painting everything—buggies and houses and furniture. The greatest triumph of modern paint-making is the making of a different paint that looks best and wears best for each class of painting. It has taken years to find out just what ingredients and what proportions are needed for each. Each must be ground and mixed by special machinery with the utmost skill and accuracy. If you go by the labels on the cans of

## THE SHERWIN-WILLIAMS PAINTS

you are sure of getting the best that can be made for your purpose. They have a reputation of 32 years' success, and every can is fully guaranteed. Our little book on painting will help you—it is free.

# SEED WHEAT

DEAR SIR,—

I am very glad to be able to inform you that after testing the WHITE FIFE WHEAT, imported by you from the North West last fall, I have no hesitation in recommending it to the farmers of P. E. Island.

I sowed twenty grains without making any special selection, and out of the twenty, nineteen grew strong and healthy.

Farmers in this section of the country pronounce your seed wheat the best sample that they have seen imported to this Island.

Yours etc.,  
R. P. BAGNALL, Farmer,  
Hazel Grove, P. E. I.

I still have a few bags of this specially selected wheat to dispose of.

HORACE HASZARD,  
QUEEN SQUARE  
Ch'town, April 18, 1899

## D. A. BRUCE'S

The tailor's goose is supposed to be always hot.  
Don't be a goose yourself; you pay for the best and you ought to have it.  
That's what we guarantee to give you

## D. A. BRUCE'S Fertilizer Facts!

The value of all Fertilizers consist in the amount of soluble Phos. Acid, Nitrogen, and Potash they contain, and the brand which shows the greatest value in these is the one to buy, on the same principle that milk testing 4 per cent. butter fat is more valuable than 3 per cent. milk ENGLISH MANUEES costing the same price, contain 20 per cent. to 25 per cent. more Phos. Acid, Nitrogen and Potash than any other complete Fertilizer on the market.

Or in other words the Plant Food contained in a ton of other Fertilizer costing, say \$35, can be purchased from us for about \$28. All fertilizers are sold under a guaranteed analysis enabling any who may, to verify the above, and the superior quality of these Manures is being shown by actual test year after year by the really wonderful results produced wherever used.
